This study examines how religious authority was distributed in early Islam. It

argues the case that, as in Shi'ism, it was concentrated in the head of state, rather than dispersed among learned laymen as in Sunnism. Originally the caliph was both head of state and ultimate source of religious law; the Sunni pattern represents the outcome of a conflict between the caliph and early scholars who, as spokesmen of the community,

assumed religious leadership for themselves. Many Islamicists have assumed the Shi'ite concept of the imamate to be a deviant development. In contrast, this book argues that it is an archaism preserving the concept of religious authority with which all Muslims began.

While the global economy

languishes, one place just keeps growing despite failing banks, uncertain markets, and high unemployment: Silicon Valley. In the last two years, more than 100 incubators have popped up there, and the number of angel investors has skyrocketed. Today, 40 percent of all venture capital investments in the United States come from Silicon Valley firms, compared to 10 percent from New

York. In *Secrets of Silicon Valley*, entrepreneur and media commentator Deborah Perry Piscione takes us inside this vibrant ecosystem where meritocracy rules the day. She explores Silicon Valley's exceptionally risk-tolerant culture, and why it thrives despite the many laws that make California one of the worst states in the union for business. Drawing on interviews with investors, entrepreneurs

, and community leaders, as well as a host of case studies from Google to Paypal, Piscione argues that Silicon Valley's unique culture is the best hope for the future of American prosperity and the global business community and offers lessons from the Valley to inspire reform in other communities and industries, from Washington, DC to Wall Street.  Patricia Crone reassesses one of the most widely accepted dogmas in contemporary accounts of the beginnings of Islam: the supposition that Mecca was a trading center. In addition, she seeks to elucidate sources on which we should reconstruct our picture of the birth of the new religion in Arabia.

THE OTHER BLACK DIASPORA

University of Texas Press
Gibson believes that four times in ancient history the Arab people united and poured out of the deserts to conquer other nations. The first is described in the Qur'an as the people of 'Ad. Gibson

identifies 'Ad with the Edomites and the Hyksos supported by various archaeological proofs. Years later Arabia united again under the Midianites. Some centuries later the Nabataeans unite Arabia. The Qur'an calls them the people of Thamud. In 600 AD the Arabian Peninsula was united under the flag of Islam. But there is more to this book than a study of the four times when

the Arabs demonstrated their greatness. This book also examines the geographical references in the Qur'an cross-referencing them with historical locations. The surprise comes when Gibson examines the Holy City of Islam, known as Mecca. Here Gibson finds evidence that the original Holy City was in northern Arabia in the city of Petra. He theorizes that during an Islamic civil

war the Ka'ba was destroyed and the Black Rock moved to its present location. Gibson examines archaeological, historical and literary evidence that support this theory. This book contains many references, as well as some useful appendices including a 32 page time line of Islamic history from 550 AD - 1095 AD, and a 20 page annotated selected bibliography of early Islamic

sources in chronological order from 724 AD - 1100 AD plus a list of many early Qur'anic manuscripts. Easy to read, fully referenced with many illustrations and photos.

Enemy of All Mankind Open Road + Grove/Atlantic
"MBS is the untold story of

how a mysterious young prince emerged from Saudi Arabia's sprawling royal family to overhaul the economy and society of the richest country in the Middle East-- and gather as much power as possible into his own hands. Since his father, King Salman, ascended to the throne in 2015, Mohammed bin Salman has leveraged his influence to restructure the kingdom's economy, loosen its strict Islamic

social codes, and confront its enemies around the region, especially Iran. That vision won him fans at home and on Wall Street, in Silicon Valley, in Hollywood, and at the White House, where President Trump embraced the prince as a key player in his own vision for the Middle East. But over time, the sheen of the visionary young reformer has become tarnished, leaving many

struggling to determine whether MBS is in fact a rising dictator whose inexperience and rash decisions are destabilizing the world's most volatile region. Based on years of reporting and hundreds of interviews, MBS reveals the machinations behind the kingdom's catastrophic military intervention in Yemen, the bizarre detention of princes and businessmen in the Riyadh Ritz-Carlton,

and the shifting Saudi relationships with Israel and the United States. And finally, it sheds new light on the greatest scandal of the young autocrat's rise: the brutal killing of journalist Jamal Khashoggi by Saudi agents in Istanbul, a crime that shook Saudi Arabia's relationship with Washington and left the world wondering whether MBS could get away with

murder. MBS is a riveting, eye-opening account of how the young prince has wielded vast powers to reshape his kingdom and the world around him"-- Publisher's description. Medieval Islamic Political Thought Cambridge University Press Yaron Ayalon explores the Ottoman Empire's history of natural disasters and its responses on a state, communal, and individual

level. Mbs Penguin UK Patricia Crone's book is about the Iranian response to the Muslim penetration of the Iranian countryside, the revolts subsequently triggered there and the religious communities that these revolts revealed. The book also describes a complex of religious ideas that, however varied in space and unstable over time, has demonstrated a remarkable

persistence in Iran across a period of two millennia. The central thesis is that this complex of ideas has been endemic to the mountain population of Iran and occasionally become epidemic with major consequences for the country, most strikingly in the revolts examined here and in the rise of the Safavids who imposed Shi'ism on Iran. This learned and engaging book by one of the

most influential scholars of early Islamic history casts entirely new light on the nature of religion in pre-Islamic Iran and on the persistence of Iranian religious beliefs both outside and inside Islam after the Arab conquest. Islamic Empires Crown Patricia Crone's Collected Studies in Three Volumes brings together a number of her published,

unpublished, and revised articles. The present volume pursues the reconstruction of the religious environment in which Islam arose and develops an intertextual approach to studying the Qur'ānic religious milieu.

ONE THOUSAND ROADS TO MECCA

Macmillan Through a series of photographs, Ahmed Mater charts the city's origins to its more

recent history over the last 5 years. It is a study of the site's recent transformation -- Mecca, until recently, embodied a unique urban tapestry, layered with histories that are stitched together by an abundance of organically rooted communities and cultures. It is a place that accommodate d not only sacred structures and sites but also huge fluctuations in population during Ramadan (up

to 3 million visitors a year travel to Mecca for Eid and Hajj). More recently, these sites and communities have been eradicated and are being replaced with five-star-studded high rise developments, transforming it from an active metropolis to the world's most exclusive, yet most visited religious tourist destination, reflective of an unprecedented

experimentati on with architecture and its possible impact on social stratification. This photographic essay is a celebration of Mecca's real and projected or imaginary states. It provides singular access to this site and its associated social and religious rituals, along with its architectural urban planned and proposed development. *The Routledge Companion to the Qur'an*

<p>Independent Scholar's Press This volume rejects the notion that Islam's sacred text is error free and cannot be critically evaluated. The study of the Koran must develop and mature. Scholars of Islam are of course familiar with the book's many errors and contradictions, but these inherent flaws have rarely been revealed to a wider public. The Origins of the Koran is an</p>	<p>attempt to remedy this deficiency by bringing together classic critical essays which raise key issues surrounding Islam's holy book. Divided into four parts, this important anthology begins with Theodor Nöldeke's first truly scientific study of the Koran. Part Two focuses on the difficulty of establishing a reliable Koranic text, while Part Three examines the Jewish,</p>	<p>Christian, and Zoroastrian sources of Muhammad's revelation. Part Four is a consideration of the controversial interpretations of contemporary scholar John Wansbrough, who questions the historical reliability of the earliest Islamic sources. This superb collection, which includes additional selections from Leone Caetani, Arthur Jeffery, David Margoliouth, Andrew Rippin, C.C.</p>

Early Islamic Qiblas

Cambridge University Press
Revealing the central yet intentionally obliterated role of Africa in the creation of modernity, *Born in Blackness* vitally reframes our understanding of world history. Traditional accounts of the making of

the modern world afford a place of primacy to European history. Some credit the fifteenth-century Age of Discovery and the maritime connection it established between West and East; others the accidental unearthing of the "New World." Still others point to the development of the scientific method, or the spread of Judeo-Christian beliefs; and so on, ad infinitum. The

history of Africa, by contrast, has long been relegated to the remote outskirts of our global story. What if, instead, we put Africa and Africans at the very center of our thinking about the origins of modernity? In a sweeping narrative spanning more than six centuries, Howard W. French does just that, for *Born in Blackness* vitally reframes the story of medieval and emerging

Africa, demonstrating how the economic ascendancy of Europe, the anchoring of democracy in the West, and the fulfillment of so-called Enlightenment ideals all grew out of Europe's dehumanizing engagement with the "dark" continent. In fact, French reveals, the first impetus for the Age of Discovery was not—as we are so often told, even today—Europe's yearning for ties with Asia, but rather its

centuries-old desire to forge a trade in gold with legendarily rich Black societies sequestered away in the heart of West Africa. Creating a historical narrative that begins with the commencement of commercial relations between Portugal and Africa in the fifteenth century and ends with the onset of World War II, Born in Blackness interweaves precise historical

detail with poignant, personal reportage. In so doing, it dramatically retrieves the lives of major African historical figures, from the unimaginably rich medieval emperors who traded with the Near East and beyond, to the Kongo sovereigns who heroically battled seventeenth-century European powers, to the ex-slaves who liberated Haitians from bondage and profoundly altered the

course of American history. While French cogently demonstrates the centrality of Africa to the rise of the modern world, *Born in Blackness* becomes, at the same time, a far more significant narrative, one that reveals a long-concealed history of trivialization and, more often, elision in depictions of African history throughout the last five hundred years. As

French shows, the achievements of sovereign African nations and their now-far-flung peoples have time and again been etiolated and deliberately erased from modern history. As the West ascended, their stories—siloes and piecemeal—were swept into secluded corners, thus setting the stage for the hagiographic “rise of the West” theories that have endured to this day.

“Capacious and compelling” (Laurent Dubois), *Born in Blackness* is epic history on the grand scale. In the lofty tradition of bold, revisionist narratives, it reframes the story of gold and tobacco, sugar and cotton—and of the greatest “commodity” of them all, the twelve million people who were brought in chains from Africa to the “New World,” whose reclaimed lives shed a harsh light on

our present world.

Is there any sound historical evidence that the prophet of Islam actually existed, or is the entire story of Muhammad fable or fiction? It is a question that few have thought—or dared—to ask. Virtually everyone, Muslim and non-Muslim alike, takes for granted that the prophet of Islam lived as

a prophet, as well as a political and military leader, in seventh-century Arabia. But this widely accepted story begins to crumble on close examination. In his blockbuster New York Times bestseller *The Truth about Muhammad*, historian and Islam expert Robert Spencer revealed the often shocking contents of Islamic teachings about Muhammad.

Now, in this newly revised and expanded version of *Did Muhammad Exist?*, he lays bare those teachings' surprisingly shaky historical foundations. This updated and enlarged version of this acclaimed book examines even more striking and compelling evidence that the story of Muhammad, who for so long was assumed to have lived in the "full light of history," could be more myth and

legend than historical fact. Spencer meticulously examines historical records and archaeological findings,	pioneering new scholarship to reconstruct what we can know about Muhammad, the Qur'an, and the early	days of Islam. The evidence he presents challenges the most fundamental assumptions about Islam's origins.
