Merriam Press Military Monograph 59. Sixth Edition (January 2012). The big adventure for the men of D Troop, 94th Cavalry Reconnaissance Squadron, Mechanized (their official name), really began on October 8, 1944, when following a long cramped train ride they arrived at Camp Shanks, New Jersey. The journey which started in Camp Campbell, Kentucky, was finally over, and morale took a noticeable turn for the better. This was the staging area for the New York Port of Embarkation (POE), and the start of the Big One for which they had trained so long and so hard. At that point in time the author's Main Occupational Specialty (MOS) was to man the .50-caliber machine gun in a "Peep" (the armored soldier's name for a jeep). Later, he became the gunner of an M8 armored car. The story of the author and his unit starts with their shipment overseas on the troopship Gen. James A. Parker and their landing in Marseilles, France. They undergo more training, followed by their first foray into combat in early December 1944. The rest of the story unfolds as the author and his unit move inexorably towards Germany and the end of the war. The story will be familiar to all veterans, with episodes of camaraderie, laughter, combat, fear, losses, tears, peace and joy. This is not a war story, nor is it a story about war; rather it is a story about men whose lives happened to become entangled in a war. The material for it has been derived from several sources; first of all from Troop and Platoon diaries in the author's possession which were written during the months of occupation shortly after the end of the conflict; secondly from the published history of the 14th Armored Division, and lastly drawn from several published texts which pertain to the events and places which are depicted. That it is written in the first person was not the author's original intention, as it is meant to be a narrative about a team of which he was only one player, but once started this seemed the only practical way to accomplish the end product. Contents: Foreword; Chapter 1: Embarkation; Chapter 2: Arrival in France; Chapter 3: Mount Up; Chapter 4: First Combat; Chapter 5: Taking Gamsheim; Chapter 6: Radio Watch; Chapter 7: Into Germany; Chapter 8: Booby Trap; Chapter 9: Holding Position Inside Germany; Chapter 10: Operation NORTHWIND; Chapter 11: Hatten-Rittershofen; Chapter 12: Withdrawal; Chapter 13: Spring Thaw; Chapter 14: Siegfried Line; Chapter 15: Across the Rhine; Chapter 16: The Final Curtain. 52 B&W photos; 5 maps; 13 documents; 1 illustration.

The author seeks to clarify early Quaker views and explain how Friends came to differ so significantly in their beliefs from other English Protestants. By examining the Baptist-Quaker relationship in particular, he is able both to identify a primary link between the two and, at the same time, discover explanations for some of their dramatic differences. He draws on scores of previously unused tracts and manuscripts produced by the Baptist-Quaker disputes - materials which, in setting forth accusations, clarifications, and rebuttals, shed new light on the beliefs of the antagonists.

Innocent Blood recounts the heart-rending stories of Cape rebels and republican soldiers executed by the British during the Anglo Boer War. These previously untold tales evoke vivid scenes of the brutality that accompanied complete lack of justice, while sketching the tragic details of the

suffering and emotional devastation that were the real-life stories touched by these executions. Captivating as these stories are, they were researched extensively - the authors spent months travelling to the sites that witnessed the stories. They were then also condoned by two professors of history.

Real World Application of the Judeo-Christian faith for the Military, Intelligence, and Law Enforcement communities. Principles and guidelines for those serving in all nations and cultures. The Lord God says "Thou shalt not kill", yet kill we do. Cain killed Abel. Criminals steal, destroy, and kill. Soldiers kill the enemy. The enemy kills us. Then comes the day you pull the trigger and send someone into eternity. You did what must be done. Some say it had to be done, but you still sinned. Others say it's all a sin and should not be done at all. But, where does that leave you? This book has the answers. Is "Thou shalt not kill" really that cut and dry? Are there Biblical precedents or provisions for Christians to do what is necessary in the line of duty without sinning? Is doing your duty, to God and Country, the dirty work, really a sin? No, it's just the opposite. What God authorizes and the support He provides will surprise, encourage, and empower you. Ministers of Vengeance Gives Biblical guidance during undercover ops: for lying, stealing, sabotage, and more. Looks at subjects like lethal force authority, and different religious views of warfare. Draws a blueprint for prayer and a covenant mindset toward the enemy and for yourself. Discusses PTSD; concepts of mental, emotional and physical healing, help, and prevention. Examines spiritual gifts and help from the Holy Spirit and angels for the dirty work. Tackles the Problem of Evil and presents a Biblical Just War Theory or Doctrine of Violence. THE LINE THROUGH THE HEART

Createspace Independent Pub

The suicidal proclivity of our time, writes the acclaimed philosopher J. Budziszewski, is to deny the obvious. Our hearts are riddled with desires that oppose their deepest longings, because we demand to have happiness on terms that make happiness impossible. Why? And what can we do about it? Budziszewski addresses these vital questions in his brilliantly persuasive new book, *The Line*

Through the Heart. The answers can be discovered in an exploration of natural law—a venture that, with Budziszewski as our expert guide, takes us through politics, religion, ethics, law, philosophy, and more. Natural law, the author states plainly but provocatively, is a fact about human beings; as surely as we have hands and feet, we have the foundational principles of good and evil woven into the fabric of our minds. From this elemental fact emerges a natural law theory that unfolds as part of a careful study of the human person. Thus, Budziszewski shows, natural law forms a common ground for humanity. But this common ground is slippery. While natural law is truly an observable part of human nature, human beings are hell-bent—quite literally—on ignoring it. The mere mention of the obligations imposed on man by his nature will send him into a rage. In this sense, *The Line Through the Heart* explores natural law as not simply a fact and a theory but also a sign of contradiction. While investigating the natural law and its implications, Budziszewski boldly confronts—and offers a newly integrated view of—a wide range of contemporary issues, including abortion, evolution, euthanasia, capital punishment, the courts, and the ersatz state religion being built in the name of religious toleration. Written in Budziszewski's usual crystalline style, *The Line Through the Heart* makes clear that natural law is a matter of concern not merely to scholars; it touches how each of us lives, and how all of us live together. His profoundly important examination of this subject helps us make sense of why habits that run against our nature have become second nature, and why our world seems to be going mad.

I hope the essays in this book will help to warn the people of the United States and help them prepare for a nuclear war for failure to heed the warning of Netanyahu. I fervently pray that this will not be so. We must wait to see whether the United States will welcome the warning of Netanyahu. We know what happened after the first warning of Churchill. We must wait to see if the United States will heed the warning of Netanyahu.

The book examines and analyses in depth the specific issues which are currently occupying the marine insurance markets and the law. The London market is currently re-examining its practices and international competitiveness; and the English case law is growing significantly. The issues identified in the book are the "fundamental issues" on which marine insurance law is based, and which are in the process of being re-examined and developed further to respond to the needs of modern insurance practice. They are of wider interest to insurance law in general and the evolution of English law is analysed against the backdrop of legal developments in Europe and Scandinavia.

This "impeccable, myth-busting study" of WWII maritime operations sheds new light on the conflict with sharp analysis and an international perspective (The Sunday Times, UK). Command of the oceans was crucial to winning World War II. By the start of 1942 Nazi Germany had conquered mainland Europe, and Imperial Japan had overrun Southeast Asia and much of the Pacific. How could Britain and distant America prevail in what had become a "war of continents"? In this definitive account, Evan Mawdsley traces events at sea from the first U-boat operations in 1939 to the

surrender of Japan. He argues that the Allied counterattack involved not just decisive sea battles, but a long struggle to control shipping arteries and move armies across the sea. Covering all the major actions in the Atlantic and Pacific oceans, as well as those in the narrow seas, this book interweaves for the first time the endeavors of the maritime forces of the British Empire, the United States, Germany, and Japan, as well as those of France, Italy, and Russia.
