### NETHERLANDS EXPORT-IMPORT, TRADE AND BUSINESS DIRECTORY VOLUME 1 STRATEGIC INFORMATION AND CONTACTS

Barkhuis  
Binnenvaart over de Zuiderzee is zeer belangrijk geweest voor de spectaculaire groei van de vroegmoderne Nederlandse economie (1550-1700). Dat concludeert promovendus Wouter Waldus. Hij heeft voor zijn promotie de vloot van de turfschipperij op de Zuiderzee goed onderbouwd berekend en vergeleken met andere sectoren. Daarnaast heeft hij de Zuiderzee als maritiem transportlandschap volledig in kaart gebracht: vaarroutes, markeringen, redes, etc.. Zo kon hij het unieke karakter van het binnenvaartnetwerk duidelijk maken. Waldus vond tijdens zijn onderzoek ook aanwijzingen voor gezinsbewoning aan boord van binnenschepen rond 1650, veel vroeger dan tot nu toe werd aangenomen.

### DK EYEWITNESS TRAVEL GUIDE AMSTERDAM

010 Publishers  
Analyses the contexts, drivers and outcomes of community action and planning in the global north: from emergent neighbourhood planning in England to the community-based housing movement in New York, and from active citizenship in the Dutch new towns to associative action in Marseille.

DK Eyewitness The Netherlands Reaktion Books  
This volume contains the papers presented at IALCCE2018, the Sixth International Symposium on Life-Cycle Civil Engineering (IALCCE2018), held in Ghent, Belgium, October 28-31, 2018. It consists of a book of extended abstracts and a USB device with full papers including the Fazlur R. Khan lecture, 8 keynote lectures, and 390 technical papers from all over the world. Contributions relate to design, inspection, assessment, maintenance or optimization in the framework of life-cycle analysis of civil engineering structures and infrastructure systems. Life-cycle aspects that are developed and discussed range from structural safety and durability to sustainability, serviceability, robustness and resilience. Applications relate to buildings, bridges and viaducts, highways and runways, tunnels and underground structures, off-shore and marine structures, dams and hydraulic structures, prefabricated design, infrastructure systems, etc. During the IALCCE2018 conference a particular focus is put on the cross-fertilization between different sub-areas of expertise and the development of an overall vision for life-cycle analysis in civil engineering. The aim of the editors is to provide a valuable source of cutting edge information for anyone interested in life-cycle analysis and assessment in civil engineering, including researchers, practising engineers, consultants, contractors, decision makers and representatives from local authorities.

Rem Koolhaas/OMA Nai010 Publishers  
The activities of Rem Koolhaas and his staff were widely discussed even before the foundation of the Office for Metropolitan Architecture in 1975. Today, many contributions on the work of OMA can be found in the international architectural press, including Koolhaas' own writings. The book contains about 150 selected texts—interviews, feature articles, essays, lead articles, reviews, letters, introductions, appraisals, and

competition reports that have been compiled for the first time. This compilation not only provides a fresh and critical view of the oeuvre of one of the most important contemporary architects, but also represents an account of the debate on architectural and urban design in recent decades.

### Almere Stad (Netherlands) Trip Journal: Lined Travel Journal/Diary/Notebook with Almere Stad (Netherlands) Map Cover Art

Almere, the Netherlands' newest town, took a significant step towards maturity with its recently completed city center, designed by Rem Koolhaas, leader of the Office for Metropolitan Architecture (O.M.A.), the Netherlands' most internationally oriented architectural practice. Compared to such high-profile O.M.A. achievements as Euralille and Generic City, Koolhaas' scheme for Almere is an interesting departure as it succeeds both in the contexts of old Dutch towns and contemporary metropolitan design. The scheme for the Almere city center shows Koolhaas at work in the context of the old Dutch townscape and the dynamic of the "polder model": it shows how O.M.A. absorbed Dutchness -- and still stuck to its principles. In addition to documenting the city center design, this book explores the design process involving the city, the property developers, and the project leaders. Also included are the designs made to flesh out the master plan, amongst them a theater by Kazuyo Sejima, housing by Claus & Kaan and Frits van Dongen, William Alsop's pop/rock center, Benthem Crouwel's business center, O.M.A.'s parking garages and cinema, and the public space design by DS Landschapsarchitecten.  
Independently Published

Today, our cities are an embodiment of the complex, historical evolution of knowledge, desires and technology. Our planned and designed activities co-evolve with our aspirations, mediated by the existing technologies and social structures. The city represents the accretion and accumulation of successive layers of collective activity, structuring and being structured by other, increasingly distant cities, reaching now right around the globe. This historical and structural development cannot therefore be understood or captured by any set of fixed quantitative relations. Structural changes imply that the patterns of growth, and their underlying reasons change over time, and therefore that any attempt to control the morphology of cities and their patterns of flow by means of planning and design, must be dynamical, based on the mechanisms that drive the changes occurring at a given moment. This carefully edited post-proceedings volume gathers a snapshot view by leading researchers in field, of current complexity theories of cities. In it, the achievements, criticisms and potentials yet to be realized are reviewed and the implications to planning and urban design are assessed.

Life Cycle Analysis and Assessment in Civil Engineering: Towards an Integrated Vision Penguin

This first critical monograph places the work of Rem Koolhaas and OMA in a cultural context that allows the reader to better understand the creative process of modern architecture, retracing the career of Rem Koolhaas in chronological and thematic order.  
The Rough Guide to The Netherlands Routledge

Written by some of the founders of complexity theory and

complexity theories of cities (CTC), this Handbook expertly guides the reader through over forty years of intertwined developments: the emergence of general theories of complex self-organized systems and the consequent emergence of CTC.

Landscape Planning EPFL Press

This work springs from the idea that human aspirations for the city tend to overstate the role of rationality in public life. The author explores the part serendipity plays in urban experience.

### OMA/REM KOOLHAAS

Edward Elgar Publishing  
Complexity, Cognition and the City aims at a deeper understanding of urbanism, while invoking, on an equal footing, the contributions both the hard and soft sciences have made, and are still making, when grappling with the many issues and facets of regional planning and dynamics. In this work, the author goes beyond merely seeing the city as a self-organized, emerging pattern of some collective interaction between many stylized urban "agents" - he makes the crucial step of attributing cognition to his agents and thus raises, for the first time, the question on how to deal with a complex system composed of many interacting complex agents in clearly defined settings. Accordingly, the author eventually addresses issues of practical relevance for urban planners and decision makers. The book unfolds its message in a largely nontechnical manner, so as to provide a broad interdisciplinary readership with insights, ideas, and other stimuli to encourage further research - with the twofold aim of further pushing back the boundaries of complexity science and emphasizing the all-important interrelation of hard and soft sciences in recognizing the cognitive sciences as another necessary ingredient for meaningful urban studies.

Amsterdam Birkhäuser  
Bringing together a comparative analysis of the accessibility by public transport of 23 cities spanning four continents, this book provides a "hands-on" introduction to the evolution, rationale and effectiveness of a new generation of accessibility planning tools that have emerged since the mid-2000s. The Spatial Network Analysis for Multimodal Urban Transport Systems (SNAMUTS) tool is used as a practical example to demonstrate how city planners can find answers as they seek to improve public transport accessibility. Uniquely among the new generation of accessibility tools, SNAMUTS has been designed for multi-city comparisons. A range of indicators are employed in each city including: the effectiveness of the public transport network; the relationship between the transport network and land use activity; who gets access within the city; and how resilient the city will be. The cities selected enable a comparison between cities by old world-new world; public transport modes; governance approach; urban development constraints. The book is arranged along six themes that address the different planning challenges cities confront. Richly illustrated with maps and diagrams, this volume acts as a comprehensive sourcebook of accessibility indicators and a snapshot of current policy making around the world in the realm of strategic planning for land use transport integration and the growth of public transport. It provides a deeper understanding of the complexity, opportunities and challenges of twenty-first-century accessibility planning.

Urban Vitality in Dutch and Chinese New Towns Lulu.com  
A thorough overview in words and visual material of the work of one of this country's largest architectural firms. Founded in 1954 by Piet Zanstra, ZZDP grew into one of the Netherlands' largest architectural practices in the 1960s and '70s. ZZDP steps off from

the architect's own responsibility in working to achieve the highest architectural quality. The designer adopts a businesslike and pragmatic role, with ideological and theoretical reflections taking a back seat. Originally ZZDP specialized mainly in housing and, by extension, facilities indispensable to dwelling. With the collapse of the housing market at the end of the 1970s ZZDP turned to designing offices until housing returned to the portfolio in the '90s.

DK Eyewitness Travel Guide: Amsterdam will lead you straight to the best attractions this great city has to offer, including the Van Gogh Museum, the Anne Frank House, and the most scenic canals. Visit the city's finest art galleries, museums, and landmarks, and discover the flavors of Amsterdam - from local cheeses and fresh fish to cozy cafés and gourmet restaurants.

Discover DK Eyewitness Travel Guide: Amsterdam. + Detailed itineraries and "don't-miss" destination highlights at a glance. + Illustrated cutaway 3-D drawings of important sights. + Guided walking tours, local drink and dining specialties to try, things to do, and places to eat, drink, and shop by area. + Area maps marked with sights and restaurants. + Detailed city maps include street finder index for easy navigation. + Insights into history and culture to help you understand the stories behind the sights. + Suggested day trips and itineraries to explore beyond the city. + Hotel and restaurant listings highlight DK Choice special recommendations. With hundreds of full-color photographs, hand-drawn illustrations, and custom maps that illuminate every page, DK Eyewitness Travel Guide: Amsterdam truly shows you this city as no one else can.

[Almere New Town](#) 010 Publishers

This book advocates a fresh approach to planning that anticipates, rather than reacts to, the changes in climate currently in process. Today's spatial planning procedures rely on historical evidence instead of preparing for factors that by definition lie in the future, yet which are relatively uncontroversial: shortages of water, sea level rise and rises in average temperatures being but three examples. Arguing for more flexibility, the contributors view 'complexity' as the key to transforming the way we plan in order to better equip us to face uncertainties about our future environment.
