Integrierte Kosten- und Leistungsführerschaft als Orientierungsmuster Analytical CRM Developing and Maintaining Profitable Customer Relationships in Non-Contractual Settings

Kerap ketika siswa tidak berperilaku sesuai aturan dan belum dapat mengembangkan perilaku yang positif, yang disalahkan hanyalah siswa itu sendiri. Padahal, ada banyak sekali faktor yang menyebabkan pola perilaku siswa yang belum bisa dikatakan positif, terutama apabila dikaitkan dengan tri kaya parisuddha dalam ajaran Agama Hindu. Faktor-faktor tersebut ternyata selain berasal dari pribadi siswa itu sendiri juga berasal dari luar, utamanya keluarga dan teman sebaya. Sejauh mana hubungan faktor-faktor tersebut berpengaruh pada perilaku siswa dibahas tuntas dalam buku ini. Dr. Drs. I Wayan Suwendra, S.Pd., M.Pd. adalah penulis yang telah memiliki spesifikasi dalam bidang keahlian psikologi Hindu.

Penelitian-penelitiannya berpusat pada pendidikan karakter dan psikologi siswa yang berdasarkan kepada ajaran-ajaran moral-religius Hindu. Buku ini adalah hasil penelitian disertasinya yang mengungkap faktor-faktor eksternal dan internal yang mempengaruhi perkembangan moral siswa, antara lain keharmonisan keluarga, interaksi sosial antarteman sebaya, kematangan emosi, konsep diri dan sikap. Faktor-faktor tersebut ternyata memiliki peran besar terhadap penerapan tri kaya parisuddha dalam keseharian siswa. Buku ini sangat cocok dibaca oleh kalangan akademisi maupun mahasiswa sebab buku ini disusun secara sistematis mengikuti pola penelitian ilmiah. Kalangan akademisi maupun mahasiswa yang ingin memperdalam pengetahuan mengenai metodologi penelitian dapat membaca buku ini sebagai referensi yang dapat dipercaya. Bagi khalayak umum, buku ini bisa menjadi bukti bahwa pendidikan karakter anak-anak tidak hanya mesti dibebankan kepada sekolah, namun sebenarnya lebih menitikberatkan pada peran positif keluarga sebagai tempat bernaung anak-anak.

Issues and Applications Springer-Verlag

Using empirical analyses on the basis of sound theoretical foundations, Markus Wübben shows how customer relationships can be broadened, i.e., how customers' cross-buying behavior can be stimulated and how customers' relationship length and depth, meaning customers' activity and purchase-levels, can be predicted.

□□□□□□□□□□ Nilacakra

Classic graduate-level introduction to theory of computability. Discusses general theory of computability, computable functions, operations on computable functions, Turing machines self-applied, unsolvable decision problems, applications of general theory, mathematical logic, Kleene hierarchy, more.

Wiley

Marcus Liehr untersucht, wie individuelle Kritische Massen empirisch bestimmt werden können. Hierzu schlägt er mit der Hierarchischen Limit Conjoint-Analyse eine Variante der traditionellen Conjoint-Analyse vor, die er am Beispiel der Adoption eines UMTS-fähigen Kamera-

Handys empirisch auf ihre Eignung überprüft.

*Applied Structural Equation Modeling using AMOS* Springer-Verlag

Hendrik Schlüter analysiert die Nutzungsintensität des Controllerbereichs für Beratungsaufgaben durch den Manager. Er zeigt, dass sich eine hohe Nutzungsintensität positiv auf den Controlling- und den Unternehmenserfolg auswirkt.

### **MESSUNG, WIRKUNGEN, DETERMINANTEN**

Logos Verlag Berlin GmbH

Carsten Sieber untersucht die Zusammenarbeit von Zentral- und Bereichscontrolling. Er nimmt zunächst eine Analyse der Schnittstelle beider Bereiche vor und entwickelt auf dieser Grundlage ein Messmodell zur Erfassung der Kooperation.

The Current Index to Statistics (CIS) is a bibliographic index of publications in statistics, probability, and related fields.

*Technologietransfer zwischen Wissenschaft und Wirtschaft* Lynne Rienner Publishers

The Turkish party system has undergone significant changes since the 1940s, moving from a two-party system to one encompassing nineteen parties - and resulting in a highly fragmented parliament. The contributors to this volume assess the intertwined effects of party fragmentation and voter volatility in Turkey. Presenting a wealth of data, they illuminate the trajectory of democratic consolidation, as well as underlying issues of representation, participation, and govern-ability.

**Qualitätsmessung im Private Banking** Springer-Verlag

Almuth C. Patz leitet die Aufgaben des Controllerbereichs systematisch aus den Controllingkonzeptionen ab. Sie entwickelt Messmodelle, um die Relevanz der Controllingship in 402 deutschsprachigen Unternehmen zu analysieren.

*On the Profitability of Long Lifetime Customers* Tata McGraw-Hill Education

*Scaling Procedures: Issues and Applications* examines the issues involved in developing and validating multi-item self-report scales of latent constructs. Distinguished researchers and award-winning educators Richard G. Netemeyer,

William O. Bearden, and Subhash Sharma present a four-step approach for multi-indicator scale development. With these steps, the authors include relevant empirical examples and a review of the concepts of dimensionality, reliability, and validity. *Scaling Procedures: Issues and Applications* supplies cutting-edge strategies for developing and refining measures. Providing concise chapter introductions and summaries, as well as numerous tables, figures, and exhibits, the authors present recommended steps and overlapping activities in a logical, sequential progression.

*Basic to Advanced Techniques* Routledge

This is an essential how-to guide on the application of structural equation modeling (SEM) techniques with the AMOS software, focusing on the practical applications of both simple and advanced topics. Written in an easy-to-understand conversational style, the book covers everything from data collection and screening to confirmatory factor analysis, structural model analysis, mediation, moderation, and more advanced topics such as mixture modeling, censored data, and non-recursive models. Through step-by-step instructions, screen shots, and suggested guidelines for reporting, Collier cuts through abstract definitional perspectives to give insight on how to actually run analysis. Unlike other SEM books, the examples used will often start in SPSS and then transition to AMOS so that the reader can have full confidence in running the analysis from beginning to end. Best practices are also included on topics like how to determine if your SEM model is formative or reflective, making it not just an explanation of SEM topics, but a guide for researchers on how to develop a strong methodology while studying their respective phenomenon of interest. With a focus on practical applications of both basic and advanced topics, and with detailed work-through examples throughout, this book is ideal for experienced researchers and beginners across the behavioral and social sciences.

*Books in Print* Wageningen Academic Publishers

This publication contains the proceedings of the 5th international conference on chain and network management in agribusiness and the food industry. Papers will focus on the paradoxes caused by conflicting interests in the fields of economics and ethics, technology and environment, legislation and internationalisation, etc. The modern consumer demands high quality products, in broad assortments throughout the year, and for competitive prices. Society

imposes constraints on companies in order to economize on the use of resources, ensure animal-friendly and safe production, and restrict pollution. Together with technological developments and increased international competition, these demands have changed the production, trade, and distribution of food products beyond recognition. Demand is no longer confined to local or regional supply. The food industry is now swiftly becoming an interconnected system with a large variety of complex relationships. This is changing the way food is brought to the market. Currently, even fresh produce shipped from halfway around the world can be offered at competitive prices. These developments are accompanied by national and international regulations and legislation in the area of food quality and safety. In response to these changes, business strategies must now focus not only on traditional economical and technological interests, but also on topical issues such as the safety and healthfulness of food products, animal friendliness, the environment, etc. To effectively address paradoxical demands facing businesses, many problems and opportunities must be approached from a multi-disciplinary perspective, and trade-offs must be made between different aspects of production, trade and the distribution of food.

### **Developmental Trajectories of Anxiety and Depression from Preschool Childhood to Early Adolescence** SAGE

This handbook and ready reference presents a combination of statistical, information-theoretic, and data analysis methods to meet the challenge of designing empirical models involving molecular descriptors within bioinformatics. The topics range from investigating information processing in chemical and biological networks to studying statistical and information-theoretic techniques for analyzing chemical structures to employing data analysis and machine learning techniques for QSAR/QSPR. The high-profile international author and editor team ensures excellent coverage of the topic, making this a must-have for everyone working in chemoinformatics and structure-oriented drug design.

Grasindo  
Gregor Mark Schmecken präsentiert eine umfassende Studie zur strategischen Orientierung, zur Gestaltung und zur Erfolgswirkung des E-Commerce. Auf der Basis einer branchenübergreifenden empirischen Untersuchung von über 200

deutschsprachigen Unternehmen analysiert er dominante Wettbewerbs- und E-Commerce-Strategien. Darüber hinaus zeigt er relevante Erfolgsfaktoren für die Gestaltung des E-Commerce auf.

*The British National Bibliography* Springer Science & Business Media

Although consumers find it difficult to evaluate the quality of healthcare services in general and dental services in particular, they do make such evaluations. The most widely accepted measurement scale for service quality is SERVQUAL (Parasuraman, Zeithaml and Berry 1988). A more parsimonious alternative to SERVQUAL, SERVPERF, has also been developed (Cronin and Taylor 1992).
