Green explores all stages of the life course through key research studies and theories, in conjunction with issues of social inequality and critical examination of lay viewpoints. She highlights the many ways the life course can be interpreted, including themes of linearity and multidirectionality, continuity and discontinuity, and the interplay between nature and nurture. The second edition updates key data and includes additional material on topics such as new technologies, changing markers of transitions to adulthood, active ageing, resilience and neuropsychology. This comprehensive approach will continue to be essential reading for students on vocational programmes such as social work and nursing, and will provide thought-provoking insight into the wider contexts of the life course for students of psychology and sociology.

*Student Study Guide to accompany Child Development* Psychology Press

How children think is one of the most enduring mysteries--and difficulties--of parenthood. The marketplace is full of gadgets and tools that claim to make your child smarter, happier, or learn languages faster, all built on the premise that manufacturers know something about your child's brain that you don't. These products are easy to sell, because good information about how children's minds really work is hard to come by. In their new book, neuroscientists Sandra Aamodt and Sam Wang separate fact from fiction about the inner workings of young minds. Martialing results from new studies and classic research, Aamodt and Wang provide the most complete answers out there on this subject. It liberates readers from superstitions and speculation, such as Freud's idea that all relationships are modeled on one's mother, or that it's not safe to eat sushi while pregnant. And it will reveal new truths about everything from how to make your baby sleep, to why we love to snuggle, to how children learn, forget, play, talk, walk, and feel. Welcome to *Your Child's Brain* is eye-opening and necessary, soon to become a staple for parents and children alike.
