TRANSDISCIPLINARY APPROACHES AND IMPLICATIONS

SAGE

Introduction to African American Studies: A Reader chronicles the experience of African Americans in the United States from their first arrival in 1619 to present day. The reader demonstrates how African Americans and their experiences have shaped America's historical, political, economic, and cultural history, as well as how the black experience continues to influence American life. In Part I, students read about the continued significance of race in America and receive a primer on African studies. Part II examines the arrival of Africans to America, the Atlantic Slave Trade, slavery and states' rights in the early republic, and the issue of democracy in Jeffersonian America. Part III contains readings about Jim Crow, the roots of Plessy vs. Ferguson, and the Niagara Movement. In Part IV, students learn about the impact of African American artists on literature, arts, and culture from 1927 - 1940. Part V includes readings on the Civil Rights Movement. The final part speaks to post-racial America in the age of Barack Obama. Gathering thought-provoking and critical literature, Introduction to African American Studies is an ideal resource for foundational courses within the discipline.

AFRICAN AMERICAN STUDIES IN THEORY AND PRACTICE

University of Illinois Press

Are the stars of the Civil Rights firmament yesterday's news? In *Living Black History* scholar and activist Manning Marable offers a resounding "No!" with a fresh and personal look at the enduring legacy of such well-known figures as Malcolm X, Martin Luther King, Jr., Medgar Evers and W.E.B. Du Bois. Marable creates a "living history" that brings the past alive for a generation he sees as having historical amnesia. His activist passion and scholarly memory bring immediacy to the tribulations and triumphs of yesterday and reveal that history is something that happens everyday. *Living Black History* dismisses the detachment of the codified version of American history that we all grew up with. Marable's holistic understanding of history counts the story of the slave as much as that of the master; he highlights the flesh-and-blood courage of those figures who have been robbed of their visceral humanity as members of the historical cannon. As people comprehend this dynamic portrayal of history they will begin to understand that each day we-the average citizen-are "makers" of our own American history. *Living Black History* will empower readers with knowledge of their collective past and a greater understanding of their part in forming our future.

Introduction to Black Studies SAGE

Woodson's classic work of criticism explores how the education received by blacks has failed to give them an appreciation of themselves as a race and their contributions to history. Woodson puts forward a program that calls for the educated to learn about their past and serve the black community. (Education/Teaching)

Black Studies in the United States Columbia University Press

Basil Davidson's famous book -- now updated in a welcome Third Edition -- reviews the social and political history of Africa in the twentieth century. It takes the reader from the colonial era through the liberation movements to independence and beyond. It faces squarely the disappointments and breakdowns that have dulled the early successes of the post-colonial era; yet, for all the sorrows and uncertainties of Africa today, Basil Davidson shows how much has been achieved since decolonization, and the mood of his new final chapter is hopeful and buoyant.

African American, Pan-African, and Global Issues Beacon Press

This is the classic history of the African peoples in Africa and the New World, a repudiation of the absurd belief, widely held in the post-Civil War period, that Africans had no civilization but the one foisted upon them by their slave-trading captors. Writing for a popular audience in 1915, DuBois, one of America's greatest writers, lays out in easy-to-read, nonacademic prose the striking and illustrious story of the complex history and varied cultures of Africa. He explores everything from the art and industry of the peoples of the continent to the dramatic impact the slave trade had both in Africa and on her descendants in the Western Hemisphere. Boldly proud and beautifully written, this essential work will delight readers of American and African history as well as students of great American literature. American writer, civil rights activist, and scholar WILLIAM EDWARD BURGHARDT DU BOIS (1868-1963) was the first black man to receive a PhD from Harvard University. A co-founder of the NAACP, he wrote a number of important books, including *Black Folk*, *Then and Now* (1899) and *The Negro* (1915).

The Quotable Karenga John Wiley & Sons

World-renowned scholar and visionary bell hooks takes an in-depth look at one of the most critical issues facing African Americans: a collective wounded self-esteem that has prevailed from slavery to the present day. Why do so many African-Americans—whether privileged or poor, urban or suburban, young or old—live in a state of chronic anxiety, fear, and shame? *Rock My Soul: Black People and Self-Esteem* breaks through collective denial and dares to tell this truth—that crippling low self-esteem has reached epidemic proportions in our lives and in our diverse communities. With visionary insight, hooks exposes the underlying reality that it has been difficult—if not impossible—for our nation to create a culture that promotes and sustains healthy self-esteem. Without self-esteem people begin to lose their sense of agency. They feel powerless. They feel they can only be victims. The need for self-esteem never goes away. But it is never too late for any of us to acquire the healthy self-esteem that is needed for a fulfilling life. hooks gets to the heart and soul of the African-American identity crisis, offering critical insight and hard-won wisdom about what it takes to heal the scars of the past, promote and maintain self-esteem, and lay down the roots for a grounded community with a prosperous future. She examines the way historical movements for racial uplift fail to sustain our quest for self-esteem. Moving beyond a discussion of race, she identifies diverse barriers keeping us from well-being: the trauma of abandonment, constant shaming, and the loss of personal integrity. In highlighting the role of desegregation, education, the absence of progressive parenting, spiritual crisis, or fundamental breakdowns in communication between black women and men, bell hooks identifies mental health as the new revolutionary frontier—and provides guidance for healing within the black community.

ENCYCLOPEDIA OF BLACK STUDIES

Routledge

Not Only the Master's Tools brings together new essays on African American studies. It is ideal for students and scholars of African studies, philosophy, literary theory, educational theory, social and political thought, and postcolonial studies.

The African American Studies Reader Routledge

In this book, the most prolific contemporary African American scholar and cultural theorist Molefi

Kete Asante leads the reader on an informative journey through the mind of Maulana Karenga, one of the key cultural thinkers of our time. Not only is Karenga the creator of Kwanzaa, an extensive and widespread celebratory holiday based on his philosophy of Kwanzaa, he is an activist-scholar committed to a "dignity-affirming" life for all human beings. Asante examines the sources of Karenga's intellectual preoccupations and demonstrates that Karenga's concerns with the liberation narratives and mythic realities of African people are rooted in the best interests of a collective humanity. The book shows Karenga to be an intellectual giant willing to practice his theories in order to manifest his intense emotional attachment to culture, truth and justice. Asante's enlightening presentation and riveting critique of Karenga's works reveal a compelling account of a thinker whose contributions extend far beyond the Academy. Although Karenga began his career as a student activist, a civil rights leader, a Pan Africanist, and a culturalist, he ultimately succeeds in turning his fierce commitment to truth toward dissecting political, social, and ethical issues. Asante carefully analyzes Karenga's important works on Black Studies, but also his earlier works on culture and his later works on ethics, such as *The Husia*, and *Odu Ifa: The Ethical Teachings*.

African American Religious Studies Peter Lang Incorporated, International Academic Publishers
This book aims to expand what scholars know and who is included in this discussion about black studies, which aids in the democratization of American higher education and the deconstruction of traditional disciplines of high education, to facilitate a sense of social justice. By challenging traditional disciplines, black studies reveals not only the political role of American universities but also the political aspects of the disciplines that constitute their core. While black studies is post-modern in its deconstruction of positivism and universalism, it does not support a radical rejection of all attempts to determine truth. Evolving from a form of black cultural nationalism, it challenges the perceived white cultural nationalist norm and has become a critical multiculturalism that is more global and less gendered. Henry argues for the inclusion of black studies beyond the curriculum of colleges and universities.

How a Radical Social Movement Became an Academic Discipline Black Classic Press
Shedding light on the black power movement, Black Studies programs, and American higher education, this historical analysis reveals how radical politics are assimilated into the university system.

The Afrocentric Paradigm JHU Press

What constitutes black studies and where does this discipline stand at the end of the twentieth century? In this wide-ranging and original volume, Manning Marable—one of the leading scholars of African American history—gathers key materials from contemporary thinkers who interrogate the richly diverse content and multiple meanings of the collective experiences of black folk. Here are

numerous voices expressing very different political, cultural, and historical views, from black conservatives, to black separatists, to blacks who advocate radical democratic transformation. Here are topics ranging from race and revolution in Cuba, to the crack epidemic in Harlem, to Afrocentrism and its critics. All of these voices, however, are engaged in some aspect of what Marable sees as the essential triad of the black intellectual tradition: describing the reality of black life and experiences, critiquing racism and stereotypes, or proposing positive steps for the empowerment of black people. Highlights from *Dispatches from the Ebony Tower*: Henry Louis Gates Jr. and Manning Marable debate the role of activism in black studies. John Hope Franklin reflects on his role as chair of the President's race initiative. Cornel West discusses topics that range from the future of the NAACP through the controversies surrounding Louis Farrakhan and black nationalism to the very question of what "race" means. Amiri Baraka lays out strategies for a radical new curriculum in our schools and universities. Marable's introduction provides a thorough overview of the history and current state of black studies in America.

A STUDY IN CLASSICAL AFRICAN ETHICS

Psychology Press

There is an ongoing debate as to whether African American Studies is a discipline, or multidisciplinary or interdisciplinary field. Some scholars assert that African American Studies use a well-defined common approach in examining history, politics, and the family in the same way as scholars in the disciplines of economics, sociology, and political science. Other scholars consider African American Studies multidisciplinary, a field somewhat comparable to the field of education in which scholars employ a variety of disciplinary lenses—be they anthropological, psychological, historical, etc., --to study the African world experience. In this model the boundaries between traditional disciplines are accepted, and researches in African American Studies simply conduct discipline based an analysis of particular topics. Finally, another group of scholars insists that African American Studies is interdisciplinary, an enterprise that generates distinctive analyses by combining perspectives from different traditional disciplines and synthesizing them into a unique framework of analysis.

The Encyclopedia of Black Studies is the leading reference source for dynamic and innovative research on the Black experience. The concept for the encyclopedia was developed from the successful *Journal of Black Studies* (SAGE) and contains a full analysis of the economic, political, sociological, historical, literary, and philosophical issues related to Americans of African descent. This single-volume reference is the vanguard of the recent explosive growth in quality scholarship in the field. More than a chronicle of black culture or black people, this encyclopedia deals with the emergence and maturity of an intellectual field over the past four decades. Beginning with the protests at San Francisco State College in 1967 that led to the first degree-granting department of Black Studies, the field's rapid growth over time necessitates an authoritative account of the discipline.
