This book explores the history and global expansion of AB Volvo, one of the hundred largest corporations in the world, through the experiences of its workers in Sweden, Mexico, South Africa, and India. It investigates how neo-liberalisation has transformed the company into a promoter of lean production, at the expense of the

workers' needs.

A Review of the United Nations Oil-for-Food Program Springer

Medium- and heavy-duty trucks, motor coaches, and transit buses - collectively, "medium- and heavy-duty vehicles", or

MHDVs - are used in every sector of the economy. The fuel consumption and greenhouse gas emissions of MHDVs have become a focus of legislative and regulatory action in the past few years. This study is a follow-on to the National Research Council's 2010 report, Technologies and Approaches to Reducing the Fuel Consumption of Medium-and Heavy-Duty Vehicles. That report provided a series of findings and recommendations on the development of regulations for reducing fuel consumption of MHDVs. On September 15, 2011, NHTSA and EPA finalized joint Phase I rules to establish a comprehensive Heavy-Duty National Program to reduce greenhouse gas emissions and fuel consumption for on-road medium- and heavy-duty vehicles.

As NHTSA and EPA began working on a second round of standards, the National Academies issued another report, Reducing the Fuel Consumption and Greenhouse Gas Emissions of Medium-and Heavy-Duty Vehicles, Phase Two: First Report, providing recommendations for the Phase II standards. This third and final report focuses on a possible third phase of regulations to be promulgated by these agencies in the next decade.

EDITORIAL: Letztendlich sollte man jeden Tag so leben, wie den ersten und/oder letzten. Der Vorteil unserer modernen, strukturierten Zeit - es kann bei Katastrophen schnelle Hilfe organisiert werden. THEMAWECHSEL: Die grossen Filmfeste unserer Zeit sind eine ideale Gelegenheit, sich in der Welt zurecht zu finden. Klar, dass man nicht nur vor der

Glotze haengen soll. Aber: Gerade auch Religion oder Soziales wird in der filmischen Moderne dezidiert und eklektisch behandelt - auch kritisch: Wofuer gibt es einen Gott? Braucht ihn das einfache Volk? Einige Fragen. Man sollte die Welt kennen und bereisen. Filmkunst kann daraus gewonnene philosophische Erkenntnisse erstellen und vertiefen. Filmfest Cannes ist auch eine intellektuelle Bereicherung und hebt den Blick ueber den Tellerrand - welches entscheidend ist. THEMAWECHSEL: Armin Laschet hat in Bundesdeutschland eindeutig den Vorteil vor anderen Kanzlerkandidaten, dass er vom Amtsbonus seiner Parteigenossin Angela Merkel profitiert. Laschet hat es bislang immer geschafft, sich erfolgreich zu behaupten. Insofern wird seine Wahl

zum Bundeskanzler wohl keine Ueberraschung. Fakt bleibt: Konkurrentin Baerbock ist eine echte Alternative, ja, das grüne Experiment. THEMAWECHSEL: Es ist an der Zeit, dass sich die Corona-Pandemie so langsam in Wohlgefallen auflöst. Letztendlich ist es, wie bei jeder elenden Seuche (Pocken, Pest, Tuberkolose) auch in der Vergangenheit: Wenn Politik, Wirtschaft und Verbraucher sich darauf verständigen, dass eine krankheitsbedingte Einschränkung des ökonomischen Lebens ohne einen totalen Kollaps nicht mehr aufrecht zu erhalten ist, werden die panikartigen Lockdowns zurückgehen, ja, sich erübrigen. Menschen sterben immer. Es wird dann nur schlicht nicht mehr erhoben, woran genau. Abgesehen davon, dass mehr Menschen an Krebs

oder Herzinfarkt sterben, als an Corona, kann eine dauerhafte Rückfuhr der ökonomischen Grundlage von so vielen, einfach nicht getragen werden - von keiner Gesellschaft. Fazit: Die Pandemie hat ihren Zenit überschritten. Es geht jetzt darum, das Leben der (Welt-)Bevölkerung wieder in normale, geordnete Bahnen zu lenken. Bleibt zu hoffen, dass von den positiven Effekten etwas hängenbleibt - Entschleunigung; Hygienebewusstsein; emotionale Regulierung. THEMAWECHSEL: Noch knapp zwei Monate, dann ist Bundestagswahl. Um ehrlich zu sein, haben wir doch nur die Wahl zwischen Pest und Cholera. Ob jetzt Armin Laschet für die CDU Kanzler wird, Annalena Baerbock (Grüne) oder Olaf Scholz für die SPD, bleibt sich, bei Licht betrachtet,

gleich. Keiner der drei chancenhaften Kandidaten ist in der Lage, dass Übel an der Wurzel zu packen, die drei drängendsten Fragen unserer Gesellschaft zu lösen: Umwelt; Arbeit; soziale Gerechtigkeit. Ja, die bürgerlichen Parteien prockeln hier alle nur an der Oberfläche. Gleichwohl ist dafür Sorge zu tragen, dass, aufgrund der großen Politikverdrossenheit in weiten Teilen der Bevölkerung, nicht die extreme Rechte einen größeren Schub erhält, als jedem lieb sein kann. Wiederholt sich die Geschichte? Vor 80 Jahren war es Adolf Hitler, welcher, vom Großkapital gepusht, Deutschland und die Welt an den Rand des Abgrunds führte. Nicht zuletzt deshalb gehören erzreaktionäre Parteien wie die AfD ein für allemal verboten und von den

Wahllisten gestrichen. Echte Basisdemokratie gibt es im Bund ohnehin nicht. Die Politik regiert über die Köpfe der Bevölkerung hinweg. THEMAWECHSEL: Solange die umkämpften Gebiete nicht effektiv befriedet werden, wird es keine Ruhe in den Regionen geben. Die Folge sind berechnete Massenfluchten etwa nach Europa. Es muss Schluss sein mit Waffenlieferungen der westlichen Welt, welche die Kriege befeuern. Denn: Sie dienen nur den Profitinteressen des Westens auf der Suche nach Bodenschätzen, Landmarken auf Kosten der arabischen Bevölkerung. *B & B. Springer*

SP's MILITARY YEARBOOK

Springer Science & Business Media

The book presents the results of the research project Fleets Go Green from different engineering disciplines. It includes comprehensive empirical data as well as different methods and tools for evaluating and integrating electric vehicles into corporate fleets. Finally, the authors give recommendations for fleet owners, vehicle manufacturers and

political decision. The aim of the joint research project Fleets Go Green was the integrated analysis and evaluation of the environmental performance of electric and plug-in-hybrid vehicles in everyday usage on the example of fleet operations. The potential of electric vehicles for reducing the harmful environmental impacts of road transport in everyday conditions can only be analyzed and evaluated in field tests. If electric vehicles should realize their potential to reduce emissions and minimize the consumption of resources, an integrated life cycle assessment is required.

'An Introduction to Modern Vehicle

Design' provides a thorough introduction to the many aspects of passenger car design in one volume. Starting with basic principles, the author builds up analysis procedures for all major aspects of vehicle and component design. Subjects of current interest to the motor industry, such as failure prevention, designing with modern materials, ergonomics and control systems are covered in detail, and the author concludes with a discussion on the future trends in automobile design. With contributions from both academics lecturing in motor vehicle engineering and those working in the industry, "An Introduction to Modern Vehicle Design" provides students with an excellent overview and background in the design of vehicles before they move on to specialised areas. Filling the niche

between the more descriptive low level books and books which focus on specific areas of the design process, this unique volume is essential for all students of automotive engineering. Only book to cover the broad range of topics for automobile design and analysis procedures Each topic written by an expert with many years experience of the automotive industry

Building on its best-selling predecessors, *Basic Statistics and Pharmaceutical Statistical Applications*, Third Edition covers statistical topics most relevant to those in the pharmaceutical industry and

pharmacy practice. It focuses on the fundamentals required to understand descriptive and inferential statistics for problem solving. Incorporating new material in virtually every chapter, this third edition now provides information on software applications to assist with evaluating data. New to the Third Edition Use of Excel® and Minitab® for performing statistical analysis Discussions of nonprobability sampling procedures, determining if data is normally distributed, evaluation of covariances, and testing for precision equivalence Expanded sections on regression analysis, chi square tests, tests for trends with ordinal data, and tests related to survival statistics Additional nonparametric procedures, including the one-sided sign test,

Wilcoxon signed-ranks test, and Mood's median test With the help of flow charts and tables, the author dispels some of the anxiety associated with using basic statistical tests in the pharmacy profession and helps readers correctly interpret their results using statistical software. Through the text's worked-out examples, readers better understand how the mathematics works, the logic behind many of the equations, and the tests' outcomes.
