*Geschichte der deutschen

recognized as the most
original and
comprehensive study to

giants as Lessing, Goethe,

emphasizing the
connections of criticism
with other public
discourse. The editor,

the history of German

The bibliography includes the entire primary and (international) secondary literature (with proof of all primary and multiple publications, information about bibliophilic special features of the editions, etc.) published from 1947 to 2011. The bibliography is thus an important reference work on one of the most important German authors of today.

Our understanding of the function and structure of chromosomes and their interrelationship has grown in recent years.

The chapters in this issue describe the advances that have been made possible by combining microscope techniques

with sophisticated biochemical and genetic approaches to unlock the secrets of chromosomes. The authors look at many aspects of chromosome biology, such as protein, DNA and RNA composition of chromosomes, defined chromosome structures, unusual chromosome structures and specialized chromosomes and microscope tools for chromosome analysis.

'Chromosome Structure and Function' will be an invaluable resource for undergraduate and postgraduate students in fields such as plant and animal sciences, genetics, and molecular biology. In fact, any student, teacher or researcher interested in chromosome biology will find this special issue indispensable.

There is an element of fascination which many people feel about geographical maps, because these maps allow fantasies about strange landscapes, other peoples, travels, even adventures. Distribution maps, depicting the area which a plant (or animal) species occupies, would appear to be less romantic, but they are equally able to exercise our imagination, or rather: to stimulate our scientific curiosity. Some distribution patterns are repeated time and time again, although rarely fully identical, and with their study comes the inescapable question: what is it that determines a plant's area of distribution? Almost immediately we find ourselves in the area of ecology, for it is the plant's demands of its environment (climate, soil) which determines where it will be able to grow and where not. However, that is not all there is to it, for species as well as landscapes have their history, and one needs to be informed about the climate and about the distribution of land and sea in the past,

for instance, before one can understand present distributions. This aspect of change in space and time (historical plant geography) is possibly the most fascinating part of plant geography. However this atlas, covering a minuscule part of the world, is not meant to be primarily a book of historical plant geography. It is true that a dynamic aspect is very prominent, but this is on the smaller time-scale of man-made changes, which mostly led to impoverishments.

Routledge
Examensarbeit aus dem Jahr 1998 im Fachbereich Didaktik für das Fach Deutsch - Pädagogik, Sprachwissenschaft, Note: 3,0, , Sprache: Deutsch, Abstract: Homo Faber wurde von Max Frisch in einer Zeit geschrieben, in der die Identitätskrise ein beherrschendes literarisches Thema war. Hierin knüpfte die Nachkriegsliteratur zum Teil an Werke der Zwanziger- und Dreißigerjahre an, in denen bereits die

Wahrnehmung der menschlichen Existenz zum Problem und die Möglichkeit der Identitätsbildung in Frage gestellt wurde; hinzu kamen die Erfahrung des durchlittenen Krieges, das Gefühl der Traditionslosigkeit und eine neue von Modernisierung und Technisierung geprägte Entwicklung, wie sie in unsere heutige Gegenwart geführt hat. Die Erzählstruktur in Max Frischs *Homo Faber* zeichnet sich durch eine zeitliche Diskontinuität der Erzählfolge aus. Durch die Montage von Erzählteilen, die unterschiedlichen zeitlichen Aufzeichnungs- und Erlebnisebenen angehören, wird die Chronologie aufgehoben. Entscheidend ist, daß sich die Abfolge der Erzählteile nicht aus der Chronologie des Geschehens ergibt, sondern am seelischen Entwicklungsprozess der Hauptfigur Walter Faber orientiert; die den Eindruck von Sprunghaftigkeit vermittelnde Verknüpfung der Erzählteile spiegelt Fabers Identitätskrise wider.

Volume 12, the final volume of *Historisches*

Wörterbuch der Rhetorik, provides a rich and extensive bibliography (sources and research). *Chaos, Control, and Consistency* Springer Science & Business Media Este libro recoge en esencia la vida del escritor suizo Ulrich Bräker, nacido en 1735 en una familia campesina muy pobre, criado en medio de grandes necesidades, que fue soldado mercenario, escapó de la guerra, volvió a casa, se casó, se dedicó al negocio del hilo, tuvo hijos y poco más. Una vida como la de muchos de sus paisanos y vecinos, nada especial, y sin embargo esta autobiografía novelada, o novela autobiográfica, ha recibido los elogios de autores como Hofmannsthal o Walter Benjamin. *The Elements of Arithmetic* Virago Press This book analyzes the changing portrayal of GDR literature in German Gymnasium textbooks 1985-2015. Addressing the need for textbook research to broaden its focus from GDR history to GDR literature, the author presents case studies of well-known GDR authors (Bertolt Brecht, Johannes R. Becher, Anna Seghers, Wolf Biermann, and

Christa Wolf), each examining a particular aspect of the societal discourse about GDR literature and the tension between (literary) text and (historical) context. Taken together, the case studies reveal the frequently underestimated power of ideology in literature textbooks. They also show how attempts to package these authors into simplified categories ultimately reveal the profound complexities of the GDR literary legacy. By examining the clear tension between literature and politics in textbooks and curricula, the author demonstrates how ideological messages are transmitted in all textbooks, as well as the importance of attending to overt and covert ideology. *СЪПОСТАВИТЕЛНО ЕЗИКОЗНАНИЕ* Königshausen & Neumann Schreiben ist ein zentrales Medium wissenschaftlicher Kommunikation. Die Fähigkeit, wissenschaftliche Texte zu verfassen, ist eine Kompetenz, die den Erfolg in Wissenschaft und Studium wesentlich mitbestimmt. Diese Fähigkeit bedarf systematischer

Vermittlung - eine Aufgabe für Schule und Universität. Neueste Entwicklungen in der Linguistik erarbeiten Grundlagen für eine solche Schreibdidaktik. Der Band bietet einen repräsentativen Überblick über die aktuelle Diskussion und den derzeitigen Kenntnisstand. *Chromosome Structure and Function* Springer Nature The United Nations Conference on the Environment and Development (UNCED), held in Rio de Janeiro in 1992, spawned a multitude of programmes aimed at assessing, managing and conserving the earth's biological diversity. One important issue addressed at the conference was the mountain environment. A specific feature of high mountains is the so-called alpine zone, i. e. the treeless regions at the uppermost reaches. Though covering only a very small proportion of the land surface, the alpine zone contains a relatively large number of plants, animals, fungi and microbes which are specifically adapted to cold environments. This zone contributes fundamentally to the planet's

biodiversity and provides many resources for mountain dwelling as well as lowland people. However, rapid and largely man-made changes are affecting mountain ecosystems, such as soil erosion, losses of habitat and genetic diversity, and climate change, all of which have to be addressed. As stated in the European Community Biodiversity Strategy, "the global scale of biodiversity reduction or losses and the interdependence of different species and ecosystems across national borders demands concerted international action". Managing biodiversity in a rational and sustainable way needs basic knowledge on its qualitative and quantitative aspects at local, regional and global scales. This is particularly true for mountains, which are distributed throughout the world and are indeed hot spots of biodiversity in absolute terms as well as relative to the surrounding lowlands.

 A practical guide to the

protection and management of ecosystems against invasions by non-indigenous plant species. The authors seek to offer an accessible account of the subject and how to protect natural habitats. The majority of countries suffer from invasive plants and there are case studies from North America, Europe, Australia, South and South East Asia and the Pacific and Atlantic islands. There is also a list of invasive species, with their countries of origin and regions of introduction.

 Literaturdidaktik als Teil der Literaturwissenschaft. Von den traditionellen Aufgaben bis zu den aktuellen Diskussionen um die Krise der Interpretation und um die Kanonisierung reichen die Themenfelder. In die 2. Auflage sind die Ergebnisse der Pisa-Studien eingearbeitet.
Cilias Springer-Verlag
 A collection of correspondence between Claude Eatherly, a former air force pilot, and Günther Anders, a German philosopher. Eatherly was the pilot who gave the all-clear for the dropping of the atomic bomb on Hiroshima: an

action the implications of which he had not known at the time. Returning from the mission and learning of the devastating impact of the atomic bomb Eatherly was unable to calmly accept his role. Though he was treated as a hero in the press, Eatherly was morally distraught over his actions and felt that he could not silently accept the accolades. Over the course of some 71 letters Anders and Eatherly struggled with the problem of taking moral responsibility in a time when ethics were the last thing that most people seemed to want to discuss. Part of what fascinated Anders about Eatherly - and prompted the former to contact the latter - was precisely this way in which Eatherly sought to take responsibility for something which he easily could have ignored as having been a matter of "just following orders." *Burning Conscience* is a fascinating and troubling book - not simply because it provides a first-hand account of an oft untold moral story in the aftermath of World War II, but because the matters being discussed by Anders and Eatherly are as important today as

they were during the lives of the correspondents.— Lib. Ship.
