Decision Making In Plastic Surgery

OMB No. 8450119433728 edited by

SHYANNE JAEDEN

Facial Plastic and Reconstructive Surgery Princeton University Press

With breast augmentation and tumor removal the #1 procedures

in cosmetic surgery and reconstructive surgery, respectively, according to latest ASPS information, this issue on breast augmentation presents discussion of procedures for cosmetic enhancement and for breast reconstruction. The first section includes topics such as: Evolution and Future Development of Breast Implants; Standardization of the Bra Cup; Process of Breast Augmentation with Special Focus on Patient Education, Patient

Selection and Implant Selection; Etiology & Prevention of Capsular Contracture; 3-D Imaging and Simulation in Breast Augmentation: What is the Current State of the Art?; Fresh Look at the Anatomy of the Chest Wall with Special Attention to the Pectoralis Major and Infra-Mammary Fold with Implications to Breast Surgery; Differences between Saline & Silicone Implants that Most Plastic Surgeons Don't Know; Shapes, Sizes, Shells and Surface and the

Selection Process of Breast Implants; Shapes, Proportions and Variations in Breast Aesthetic Ideals - definition of breast beauty: analysis and surgical practice. The next section presents surgical approaches and techniques for breast implant surgery: Teaching Breast Augmentation What are the Critical Intra Operative Steps & Decision Making: Maximizing Results and Minimizing Revisions; Mastering the Nuances of Highly Cohesive Shaped Breast Implants; Strategies, Challenges and Solutions in Augmentation Mastopexy Patients: The Most Difficult Primary Breast Procedure; Use of Scaffold Support of the Breast in Primary Augmentation Mastopexy; Considerations and Improvement of Breast Asymmetry in Primary Augmentation; Surgical Strategies in the Correction of the Tuberous Breast; Subfascial Approach to Breast Augmentation with Lipofilling of the Breast; Surgical Approaches to Breast Augmentation: Surgical Options for Incisions & Planes; Fat Grafting / Fat Transfer to the Breast; Use of Barbed Sutures in Primary Augmentation and Mastopexy. The final section presents special situations in surgical procedures: High Resolution Ultrasound and the Detection of Breast Implant Shell Failure; Breast Implant Associated ALCL.

Decision Making in Aesthetic Practice Springer

Cosmetic surgery is one of today's hottest topics. From daytime talk shows and popular magazines to conversations at the salon, it seems that almost everyone has had it, is thinking about it, or knows someone who is getting it. Statistics show more and more women—and men—are having cosmetic surgery. And with all the options now available, it's important to be fully informed before you make any decisions about having a procedure. Now, *Cosmetic Surgery For Dummies* is here to guide you through today's top procedures, candidly addressing both the benefits and the risks. R. Merrel Olesen, MD, the medical director of the La Jolla Cosmetic Surgery Centre, and Marie B.V. Olesen, a nationally known cosmetic surgery consultant, give you the tools you need to: Decide if surgery is right for you Find a qualified surgeon Set realistic expectations Evaluate the costs Enhance your recovery and results This plain-English guide shows you how to take advantage of all the advances in cosmetic surgery while avoiding the pitfalls that could compromise your safety or the quality of your result. From implants to liposuction to Botox, you'll understand the right questions to ask your doctor, how to prepare for surgery (both physically and financially), and the best ways to

influence the healing process. You'll also: Discover the latest surgery techniques and medications Understand the different surgeon specializations Sort through the various non-surgical facial treatments Evaluate your post-op care options Cope with complications Deal with family, friends, and coworkers before and after surgery Complete with lists of questions to ask before surgery and top Web sites for cosmetic surgery information, *Cosmetic Surgery For Dummies* is a practical, friendly guide that will help you say hello to a new you!

Current Techniques and Flap Atlas Springer

Decision Making in Plastic Surgery edited by Drs. Jeffrey L. Marsh and Chad A. Perlyn, is destined to become a favorite with all students of plastic surgery, whether residents in training or experienced practitioners. It provides essential tools for clinical problem solving for a wide range of aesthetic and reconstructive problems. The unique format, composed of algorithms with supporting text, provides the reader with a virtual roadmap for navigating the decision-making process that characterizes the management of plastic surgery clinical problems. *Comprehensive Coverage* Divided into three parts with numerous subsections and chapters, this book's coverage ranges from head to toe and from reconstructive to aesthetic. The first part discusses fundamentals and includes chapters on upper and lower facial lacerations, acute ear trauma, acute burns, frostbite, pressure sores, and scars. Part II, *Reconstructive Surgery*, includes comprehensive subsections on skin, head and neck (congenital anomalies, dentoskeletal malocclusion, craniofacial trauma, neoplasms, and reconstruction), breast and trunk, and upper and lower extremities. And Part III, *Aesthetic Surgery*, contains sections on skin, scalp, brow and periorbital area, face, nose, breast body contouring, and body contouring after massive weight loss. *Expert Editors and Contributors* Drs. Marsh and Perlyn are talented educators and expert surgeons. They have gathered an impressive group of rising stars and recognized leaders in plastic surgery to write chapters and share their expertise in patient management strategies for different clinical problems. *Unique Format* The decision-making format provides information in a convenient and accessible manner. Readers can compare their approach to that of the experts as they trace the decision trees outlining treatment options for different clinical problems. The design and organization of the book permits quick and easy

reading. On the right-hand page, the reader finds an algorithm to indicate the problem, surgical interventions and endpoints, surgical and nonsurgical options, and the hierarchy of what options work best for different situations. On the left-hand page is descriptive text that is keyed into the algorithms so the reader can easily follow the different steps being described. Legends introduce each section, providing a key to the colored boxes, bullet points, and arrows that point to the different treatment options. This book is essential reading for all students of plastic surgery. It provides a needed life boat when planning any surgical intervention. *Hot Topics* Body contouring Facial aesthetic surgery Hand trauma Facial fractures Limb reconstruction Breast surgery *Plastic Surgery E-Book* Thieme Fully updated to meet the demands of the 21st-century surgeon, *Craniofacial, Head and Neck Surgery and Pediatric Plastic Surgery, Volume 3 of Plastic Surgery, 3rd Edition*, provides you with the most current knowledge and techniques across your entire field, allowing you to offer every patient the best possible outcome. Access all the state-of-the-art know-how you need to overcome any challenge you may face and exceed your patients' expectations. Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability. Compatible with Kindle®, nook®, and other popular devices. Apply the very latest advances in craniofacial, head, neck, and pediatric plastic surgery and ensure optimal outcomes with evidence-based advice from a diverse collection of world-leading authorities. Purchase this volume individually or own the entire set, with the ability to search across all six volumes online! Master the newest procedures in pediatric plastic surgery, including conjoined twinning. Apply the latest clinical evidence and surgical techniques to facilitate the decision-making process for craniofacial patients, and optimize outcomes in the correction of congenital, oncologic, traumatic, and acquired deformities. Know what to look for and what results you can expect with over 2,000 photographs and illustrations. See how to perform key techniques with 28 surgical videos online. Access the complete, fully searchable contents online, download all the tables and figures, and take advantage of additional content and images at www.expertconsult.com!

Reconstructive Plastic Surgery of the Head and Neck CRC Press

This book starts with a description of the anatomy of the

umbilicus and its ideal shape. After a brief summary of the history of umbilical reconstruction, currently used umbilical reconstructive techniques are presented. The reader will also find information on the reconstruction of the umbilicus after malignant melanoma; outcomes and complications will be discussed in the last chapters. Written by respected authors, this book will offer residents and fellows as well as practicing and highly experienced plastic surgeons essential guidance on treatment and decision-making concerning umbilical reconstruction. Its numerous illustrations and clearly structured content make the book a must-read.

ADULT UMBILICAL RECONSTRUCTION

Springer Science & Business Media

This fourth edition of *Facial Plastic and Reconstructive Surgery* keeps readers up-to-date on recent developments in the field, including microvascular techniques, minimally invasive cosmetic procedures, and unique applied technologies. Along with comprehensive surgical chapters, the text addresses practical issues driving changes in facial plastic surgery practice: ethnic variations, anti-aging strategies, ambulatory surgical concerns, and evidence-based decision making. Key Features: Online access to more than 30 videos demonstrating the latest procedures and techniques New chapters on African rhinoplasty, facial paralysis treatment, evidence-based facial plastic surgery, tissue engineering, costal rib utilization techniques, and face transplants Clinical insights from luminaries in the field of facial plastic and reconstructive surgery More than 2,000 full-color images and illustrations demonstrate main concepts For over two decades experienced surgeons, fellows, and residents have successfully relied on *Facial Plastic and Reconstructive Surgery* to prepare for surgery and clinical rotations, as well as their in-service and board exams. Today's facial plastic surgeons know this new edition offers them the latest, most comprehensive coverage of facial plastic surgery. Practicing facial plastic surgeons, plastic surgeons, and otolaryngologists will use this book to stay up-to-date on developments in the field and to brush up on less familiar procedures.

Decision Making in Spinal Care Thieme

Written by experts from London's renowned Royal Free Hospital, *Textbook of Plastic and Reconstructive Surgery* offers a

comprehensive overview of the vast topic of reconstructive plastic surgery and its various subspecialties for introductory plastic surgery and surgical science courses. The book comprises five sections covering the fundamental principles of plastic surgery, cancer, burns and trauma, paediatric plastic surgery and aesthetic surgery, and covers the breadth of knowledge that students need to further their career in this exciting field. Additional coverage of areas in which reconstructive surgery techniques are called upon includes abdominal wall reconstruction, ear reconstruction and genital reconstruction. A chapter on aesthetic surgery includes facial aesthetic surgery and blepharoplasty, aesthetic breast surgery, body contouring and the evolution of hair transplantation. The broad scope of this volume and attention to often neglected specialisms such as military plastic surgery make this a unique contribution to the field. Heavily illustrated throughout, *Textbook of Plastic and Reconstructive Surgery* is essential reading for anyone interested in furthering their knowledge of this exciting field. This book was produced as part of JISC's Institution as e-Textbook Publisher project. Find out more at <https://www.jisc.ac.uk/rd/projects/institution-as-e-textbook-publisher>

Strategy and Operative Techniques World Scientific
Comprehensive in scope, *Aesthetic Orthognathic Surgery and Rhinoplasty* presents orthognathic surgery from an aesthetic perspective, encompassing analysis, diagnosis, treatment, 3D virtual planning, and adjunctive procedures. Easily accessible clinical information presented in a concise and approachable format Well-illustrated throughout with more than 1,000 clinical photographs Includes access to a companion website with videos of surgical procedures

A Clinical Roadmap from Function to Aesthetics Elsevier Health Sciences

An analysis of the cultural and economic drivers of the growing phenomenon of FGCS, written by cross-disciplinary experts, this book challenges the concept of individual consumer choice in FGCS: a decision that is rarely exercised in a socio-cultural vacuum. Four distinct aspects of FGCS are covered: variations in female genital anatomy; surgical techniques and evidence; historical contexts and ethical dilemmas; norm-critical understandings to inform professional responses. Rendering

philosophical critiques accessible, and exposing dubious social values that underpin the practice, this text is crucial in driving a broader understanding of FGCS as a cultural phenomenon of our times. Only with a fuller understanding of the multiple perspectives of FGCS, can there be sensible alternatives for women and girls psychologically troubled by their natural, healthy form. Offering explanations and interventions at individual, institutional and societal levels, this text will be valued by both professional and non-professional audiences.

Operative Techniques in Plastic Surgery John Wiley & Sons

A new approach to methodical and strategic thinking about tissue reconstruction. All the decision-making processes are broken down into algorithms based on the authors' clinical experience and the current literature. The atlas section describes the 25 most frequently used flaps, and shows them in standardised graphic form along with many practical tips and tricks. New here is the inclusion in the illustrations of practical suggestions for the surgeon, as well as rehabilitation protocols for post-operative management. In short, a maximum of information with a minimum of text.

Making the Body Beautiful BoD – Books on Demand

Learn how to manage commonly encountered problems in plastic and reconstructive surgery with this unique case-based approach Covering head, neck, trunk, extremities, and cosmetic concerns, this sourcebook uses numerous visual clinical scenarios to illustrate essential plastic and reconstructive surgical principles. Each chapter is organized by a well-illustrated case, followed by algorithms that take you through effective management strategies and clinically relevant information. The result is an ideal resource for oral board preparation and a valuable primer for students, residents, and attending physicians from diverse specialties. FEATURES: The first resource of its kind, based on visual clinical scenarios designed to sharpen clinical-decision making Each case includes an algorithm to guide management strategies An extensive, high-yield collection of information and insights for each case Practical pearls from leading authorities close each case and provide concept-clarifying take-away points Full-color clinical photos add emphasis to must-know points throughout each case Suggested references provide further information on each subject

An Atlas Lippincott Williams & Wilkins

Cosmetic Medicine and Aesthetic Surgery: Strategies for Success is a must for aesthetic surgeons interested in incorporating cosmetic medicine into their practices. It is also a lifeline for surviving the economic downturn. This is the right book at the right time! It offers surgeons the tools they need to meet the increasing patient demand for nonsurgical, minimally-invasive, anti-aging procedures. The editor, Dr. Renato Saltz, is one of the visionaries in the field who has been in the forefront of plastic surgery advocating cosmetic medicine. He has chosen contributors who are experts from different specialties-plastic surgeons, dermatologists, aestheticians, and practice management consultants; they share their expertise and practical advice to provide readers with a virtual goldmine of information. An Invaluable Resource This landmark work, the first of its kind, is packed with practical information on the financial and business aspects of cosmetic medicine as well as the step-by-step clinical descriptions of noninvasive procedures. It begins with a key chapter by Dr. Saltz, "Cosmetic Medicine: The Writing on the Wall," which focuses on current trends of patient demand and how cosmetic medicine can help aesthetic surgeons keep their practices busy and viable when requests for more invasive surgery are lagging. Dr. Saltz and his expert contributors show by example how cosmetic medicine services and products can breathe new life into an aesthetic surgery practice-appealing to a broader demographic consisting of young patients, baby boomers, and older patients. It is the key to practice growth and patient retention, helping aesthetic surgeons retain patients from the first visit for a nonsurgical procedure to a surgical procedure later to treat more aggressive aging changes. Practical and Comprehensive This book has something for everyone. Divided into four parts, it contains 28 comprehensive chapters. Part I includes five chapters, written by surgeons who practice what they preach. They provide pragmatic advice on choosing a practice model for incorporating cosmetic medicine into your existing surgery practice. Options range from office-based facilities in a private practice or academic setting, adjacent facilities, free-standing spas, and multi-specialty centers. Throughout each chapter, the authors focus on the advantages and disadvantages of each practice model along with specific financial and business issues that need to be considered. Part II is devoted to the Business Aspects of Cosmetic Medicine. It includes

the nuts and bolts of financial and business advice for preparing a business plan, developing a financial model, staffing, marketing, and legal preparations relevant to providing cosmetic medicine products and service. Parts III and IV contain the clinical chapters, with step-by-step advice on the range of services and product options to offer as part of your cosmetic medicine menu. These chapters include information on skincare and makeup products, botox and fillers, fat grafting, laser therapy, IPL and radiofrequency, hair removal, peels and cosmeceuticals, and vitamins and hormone therapy. The last chapter, Secrets to Success, offers valuable advice for opening and sustaining a successful cosmetic medicine business within your surgical practice. Key points and "take-away messages" are included in each chapter. Numerous preoperative and postoperative photos demonstrate results of combined surgical and nonsurgical procedures.

Volume 3: Craniofacial, Head and Neck Surgery Pediatric Plastic Surgery (Expert Consult - Online) Decision Making in Plastic Surgery

Decision Making in Aesthetic Practice The Right Procedures for the Right Patients Edited by Vincent Wong, BSc, MBChB, Vindoc Aesthetics, London, UK Healthcare professionals in Aesthetic Practice are often faced with a presenting complaint that may seem straightforward to treat but lends itself to more than one treatment option. To achieve and deliver the best natural-looking results, certain basic points about the face must be respected; there must be a good understanding of the specific root cause of each patient's complaint; and that knowledge must be communicated effectively with the patient. The aim of this book is to help guide a healthcare professional in selecting the best and most appropriate options for any patient. Contents: The Cosmetic Consultation * The Skin * The Forehead * The Periorbital Region * The Nose * The Cheeks* The Perioral Region * The Chin * The Jawline and Neck* The Scalp * Balancing Non-Surgical and Surgical Clinical Approaches

COSMETIC SURGERY FOR DUMMIES

Oxford University Press

Cosmetic surgery procedures are incredibly popular and a plethora of practitioners offer a tremendous diversity of procedures. However, much practice has been based on historical

preference, tradition and non-evidence based decision-making. This book demystifies the decision-making process for common cosmetic surgical procedures by examining their evidence basis. Each chapter deals with a different subject of cosmetic surgery - facelift, breast augmentation, liposuction and so on - and investigates the formal evidence that exists for each. Should a surgeon be using drains after facelifts? What is the best anatomical plane for placing a breast implant? Which hand rejuvenation procedures work, and which do not? These questions, and many more, are addressed in an objective manner based on peer-reviewed evidence in the medical literature. Recognising that best evidence will change constantly, the book also introduces the hashtag - #ebcs - to enable easier debate of the subject on social media. This is a subject of fast-growing international interest at the moment. Professional societies and politicians in the United Kingdom are calling for increased scrutiny and regulation of the cosmetic surgery industry, particularly in the wake of the most recent breast implant scandal. Incredibly there currently exists no resource collating the best available evidence for cosmetic surgery procedures, as already exists for other surgical disciplines and for non-cosmetic plastic surgery. This book is aimed at surgeons with an interest in cosmetic surgery - including Plastic Surgeons, Maxillofacial Surgeons, Ear Nose and Throat Surgeons, Breast Surgeons, General Surgeons, Dermatologists and General Practitioners - as well as affiliated professionals such as nurses and therapists. It would also be of interest to medical students, prospective patients and those interested in a succinct summary of existing research, such as journalists.

The Business of Plastic Surgery Thieme

The ultimate guide to aesthetic surgery from world famous aesthetic surgeon Foad Nahai The Art of Aesthetic Surgery: Principles and Techniques, Third Edition: Facial Surgery - Volume 2 by internationally revered aesthetic surgeon Foad Nahai, distinguished section editor Farzad Nahai, and an array of new contributors is part of an encyclopedic, three-volume masterwork. Considered the quintessential resource on cosmetic surgery since its inception, readers can purchase each volume separately or as a set, including a bonus e-book with access to online videos. New technology, noninvasive techniques, and new devices and products have enhanced surgeons' ability to provide patients with

a broader spectrum of options and improved outcomes. Volume two includes four sections and 26 chapters featuring the latest techniques for rejuvenation of the midface, face and neck, cheeks, chin, lips, and ears, as well as a full spectrum of rhinoplasty procedures. New chapters reflect the recent emphasis on volume enhancement in periorbital and facial rejuvenation with fillers and fat. Key Highlights Thousands of high-quality illustrations enhance understanding of state-of-the-art approaches Discussion of important topics including clinical decision-making, revision surgeries, and avoidance and management of complications in facial aesthetic surgery New chapters include structural fat grafting in the hand and face, facial implant augmentation, secondary/revision neck lift, and Asian rhinoplasty This critically acclaimed resource provides trainees and experienced practitioners with a solid foundation for learning basic principles and techniques in aesthetic surgery, with the ultimate goal of improving patient outcomes, developing innovations, and advancing the specialty.

Bostwick's Plastic and Reconstructive Breast Surgery, Third Edition Thieme

For nearly two decades and two editions, *Plastic and Reconstructive Breast Surgery* by John Bostwick III, MD, has been widely recognized as the definitive breast surgery reference for surgeons around the world. Filled with the best techniques and expert instruction, it has guided countless surgical professionals to better outcomes and, as a result, has given thousands of patients a better outlook on life. Winner of both the American Medical Illustrator's Award and the American Medical Writer's Award for the best medical book, this remarkable book has been widely praised by reviewers and readers alike as the "Bible of Plastic Surgery of the Breast." Completely Updated and Revised Under New Editorship Now this masterpiece has been totally updated and revised under the skilled guidance of its new author/editor, Dr. Glyn E. Jones, a highly talented surgeon and a close, former colleague of Dr. John Bostwick, the original author of this work whose guiding spirit and philosophy still pervade its pages. This third edition, *Bostwick's Plastic and Reconstructive Breast Surgery* pays full deference to John Bostwick's enormous contributions to the field. Dr. Jones continues the honored tradition of this book, adding his own considerable expertise to this master work and providing a personal and practical approach

to the topic. He is assisted by a select group of internationally recognized contributors. Together these leading surgeons share their vast experience and clinical insights in plastic surgery of the breast and bring you the latest techniques and developments in the field. The result is a virtual goldmine of valuable information, tips and tricks, and step-by-step operative detail with many new features added to make the book more valuable. Comprehensive Coverage Volume I begins with a section on fundamentals that includes basic chapters on the patient/surgeon relationship and applied anatomy and aesthetics. A new chapter has been added on decision making in implant selection, which updates the reader on device choices as well as their specifications, indications, advantages, and limitations with particular attention to the new cohesive gel offerings. Other chapters in this section focus on new techniques and concepts in breast imaging and the use of allograft materials in breast surgery. A new, cutting-edge chapter is included on fat grafting in the breast with a full exploration of its many applications. Chapters on augmentation, reduction, mastopexy, and aesthetic problems have been expanded and completely revised to reflect the newest aesthetic techniques and the current approaches of Dr. Jones and of contributing experts, Dr. Dennis Hammond, Dr. Elizabeth Hall-Findlay, and Dr. Gino Rigotti. An exciting new chapter by Dr. Peter Rubin thoroughly explores the hot topic of breast surgery in the massive-weight-loss patient with information on indications, choice of technique, step-by-step operative detail, and possible complications and their avoidance. Volume II is dedicated to the difficult procedures and rewarding results that can be accomplished in breast reconstruction. It includes extensive information on the latest perforator flap (Dr. Peter Neligan) and oncoplastic techniques (Dr. Albert Losken), as well as new information on breast reconstruction after radiation, prophylactic mastectomy and BRCA patients, refinements in TRAM flap surgery, liposuction applications, free flaps, and much, much more. Superbly Illustrated The educational value of this two-volume work is enormously enhanced by the superb medical illustrations that grace its pages. This edition has beautiful new artwork that elegantly depicts important breast anatomy as well as the step-by-step surgical technique for each of the operations that are comprehensively described. Now More than Ever, This Is the One Reference You Simply Must Own! Like the first two editions, this

masterpiece is a must for any professional performing breast surgery. Its clear organization, generous use of illustrations, and surgical guidance will improve your outcomes with your very next case. What's New in this Remarkable Third Edition? Eight completely new chapters: Decision Making in Implant and Expander Surgery Fat Grafting to the Breast Technological Advances in Breast Surgery Breast Surgery After Massive Weight Loss Imaging of the Breast Breast Cancer and High-Risk Breast Disease Decision Making in Breast Reconstruction Oncoplastic Surgery Major new sections on: Perforator Flap Reconstruction Vertical Mammoplasty with the Supero-Medial Pedicle Technique Cohesive Gel Implants Allograft Materials What Remains the Same in this New Edition? This magnificent book retains the format that made the first and second editions best sellers, including: Superb quality Semi-atlas format Personal and inviting writing style Consistent, comprehensive approach Focus on aesthetic and reconstructive breast surgery Two-volume format

NASAL SURGERY BY THE MASTERS, THIRD EDITION

McGraw Hill Professional

Reconstructive Plastic Surgery of the Head and Neck describes the current state-of-the-art techniques used in head and neck reconstruction. Residents, fellows and attendings can follow the up-to-date, step-by-step instructions and images in this book to perform reconstructive surgical techniques for head and neck cancer patients. The cutting-edge descriptions of computer modeling, robotic surgery, and composite tissue allotransplantation lay the foundation for continued innovation. Key Features: Algorithms for each head and neck sub-region to guide clinical decision-making Step-by-step technical descriptions of the most commonly used flaps in head and neck reconstruction "Pearls and Pitfalls" sections outline key concepts and critical nuances in surgical technique or patient management Edited by surgeons from the renowned MD Anderson Cancer Center in Houston, Texas, with commentaries from master surgeons around the world, this book is an essential resource for residents, fellows, and attendings to find the best surgical solutions when they are faced with challenging head and neck cancer cases.

Evidence-Based Cosmetic Surgery Hyperink Inc

This book presents the subject from a practical aspect that most other books miss out. It takes a patient centric view of how to

approach a given clinical situation, the variables involved in the process of decision making, evidence on controversial issues and options of management in each case. Some of the areas covered are tendon rehabilitation protocols, stepwise marking for a cleft lip repair and for BBR as well as principles that guide decision making in facial palsy, breast cancer reconstruction and brachial plexus injuries. There are specific sections that provide clinically oriented information on Moh's micrographic surgery, medical lasers and the principles of fracture fixation in hand surgery. Every chapter has a selection of hand picked literature references that will further distil the topic for the reader. Acknowledging that sometimes there is more than one correct course of action, this book separates fact from the author's opinion.

Principles and Techniques, Three Volume Set, Second Edition Elsevier Health Sciences

An excellent reference for the experienced breast surgeon is now available in Plastic and Reconstructive Breast Surgery, An Atlas. It

assumes that the reader has a solid foundation in plastic surgery and is familiar with various operative methods. It describes the complete range of breast surgery: augmentation and reduction mammoplasty, anomalies, the treatment of primary breast cancer and breast reconstruction. The various flaps and grafts are described with emphasis placed on the presentation of specific details and complications. This is done with a series of illustrations and an accompanying text that is very easy to read. By looking up a similar case, the surgeon will find direct help for his own decision-making. Many less common types of cases are included to provide the broadest coverage possible. Coming from a single hospital, this atlas gives up-to-date information based on years of expertise. The authors present only the methods and techniques that have proved most successful at their hospital in the past two decades. A comprehensive bibliography directs you to further reading.

FLAPS Thieme

This book presents more than 120 cases covering all areas of reconstructive surgery. Divided into six parts (Head/Neck, Upper Extremity, Lower Extremity, Trunk, Breast and Lymphedema), it guides the reader through the difficult path of problem diagnosis, analysis and decision-making, presenting concrete steps and techniques for the successful management of patients with specific reconstructive needs. Each full-color case starts with a patient profile and continues with the diagnosis, key decisions, treatment plan, surgical procedure(s) and technical steps, postoperative management, outcome and case conclusion. Further, each case includes a discussion of pros and cons, comments, learning points and suggestions for further reading. This book will be useful for all surgeons actively involved or interested in Reconstructive Microsurgery, especially Senior Residents and Fellows in Plastic, Head and Neck, Breast Surgery and Orthopedics.
