**A Report** DIANE

Publishing

World War II--"the good war"--is here viewed from a new angle of vision, one that sheds fresh light on how major decisions were reached. More than just a

book on the strategy and outcome of American bombing in World War II, Wings of Judgment tells about choices in war, decisions that determined whether hundreds of thousands of people lived or died and whether famous cities and great monuments of civilization survived or were

destroyed. It is about the bombing of Dresden and Berlin and of dozens of cities and towns all over Germany and about the preservation of Rome and Florence. It is about the incineration of Tokyo, the bombing of Hiroshima, and the sparing of one of Japan's most beautiful and holy places, the city of

Kyoto. Describing U.S. air raids that terrified inhabitants of enemy nations and citizens of enemy-occupied countries, it raises serious questions about the military and moral effects of American bombing. It also tells of American efforts to avoid killing civilians needlessly. Taking us behind the scenes at military headquarters, Schaffer shows that even the toughest warriors occasionally found themselves offering moral arguments for their actions, arguing that they

were made right by enemy atrocities, by the justness of the Allied cause, and by the numbers of lives of American servicemen that Allied bombing might save.

Prentice Hall

This is the untold story of the small group of men who have devised the plans and shaped the policies on how to use the Bomb. The book (first published in 1983) explores the secret world of these strategists of the nuclear age and brings to light a chapter in

American political and military history never before revealed.

*Billy Mitchell* Oxford University Press on Demand

This unique book investigates the implications of the rising importance of supra-national regional organizations for global governance in general, and for the United Nations, in particular. It touches upon issues such as regional representation at the UN, high-level dialogues with regional organisations, as well as

the coordination of UN member states' voting behaviour in the UN General Assembly and the UN Security Council. The book further explores the regional dimension and coordination of UN operations in areas such as peace and security, human rights, and sustainable development. The contributions to the book are both in-depth chapters and shorter viewpoints, written by a combination of academics, policy-makers at regional organizations, and experts from

international think tanks. The book is essential reading for anyone interested in the future of global governance. *Nuclear Power and Radiation* Asian Development Bank The first of its kind, this book examines the mandates of and initiatives on electoral processes -- including election observation, electoral technical assistance and gender main-streaming -- of six regional organisations, the African Union, the Association of South-east

Asian Nations, the European Union, the League of Arab States, the Organization of American States and the Pacific Islands Forum. This publication captures the experiences of each organisation, including the regional context, achievements, limitations, challenges and prospects. This is a policy-oriented collection, and each chapter puts forward recommendations that could be food for thought for policy makers and practitioners. **The Rise of American**

**Air Power** Brookings Inst Press

"Cosmopolitanism, as an intellectual and political project, has failed. The portrayal of human rights, especially European, as evidence of cosmopolitanism in practice is misguided. Cosmopolitan theorists point to the rise of claims-making to the European Court of Human Rights (ECtHR) among Europe's Muslims to protect their right to religious freedom, mainly concerning the hijab, as evidence of cosmopolitan justice.

However, the outcomes of such claims-making show that far from signifying a cosmopolitan moment, European human rights law has failed Europe's Muslims. Human Rights, Islam and the Failure of Cosmopolitanism provides an empirical examination of claims-making and government policy in Western Europe focusing mainly on developments in the UK, Germany, France, Italy and the Netherlands. A consideration of public debates and European law of conduct in the public

sphere shows that cosmopolitan optimism has misjudged the magnitude of the impact claims-making among Europe's Muslims. To overcome this cul-de-sac, European Muslims should turn to a new 'politics of rights' to pursue their right to religious expression. This eye-opening book will be of interest to undergraduate and postgraduate students studying subjects such as Sociology, Human Rights, Minority Rights, Cosmopolitanism and

Ethnic and Racial Studies"

 In this excellent work of  
 narrative and analysis,  
 Herman Wolk of the Office  
 of Air Force History  
 untangles the complex  
 history that led to the  
 birth of the United States  
 Air Force after World War  
 II. After surveying the  
 struggle for independence  
 to 1941, and planning  
 during World War II for a  
 postwar air force, Mr.  
 Wolk details the events  
 that resulted in the

formation of a separate  
 Air Force in September  
 1947. Significantly, the  
 new Air Force at its birth  
 already possessed a long  
 history and a rich  
 heritage; some forty years  
 as part of the Army,  
 service in two world wars,  
 and a fully developed  
 understanding of its  
 usefulness in war. The  
 new Air Force already  
 possessed leaders who  
 knew that how the service  
 was constructed and how  
 it was led and  
 administered would affect  
 how air power could be  
 used, and whether it

could contribute fully to  
 the nation's security.

 Pickle Partners Publishing  
 The Asian Bond Markets  
 Initiative (ABMI) was  
 launched in December  
 2002 by the Association of  
 Southeast Asian Nations  
 (ASEAN) and the People's  
 Republic of China, Japan,  
 and the Republic of Korea--  
 collectively known as  
 ASEAN+3 to strengthen  
 financial stability and  
 reduce the region's  
 vulnerability to the  
 sudden reversal of capital  
 flows. This paper also  
 provides

recommendations for addressing new sources of market volatility and other challenges within and outside the framework of the Asian Bond Markets Initiative.

Life Cycle Sustainability Assessment for Decision-Making: Methodologies and Case Studies gives readers a comprehensive introduction to life cycle sustainability assessment (LCSA) methodology for sustainability measurement of industrial systems, proposing an efficiency methodology for stakeholders and decision-makers. Featuring the latest methods and case studies, the book will assist researchers in environmental sciences and energy to develop the

best methods for LCA, as well as aiding those practitioners who are responsible for making decisions for promoting sustainable development. The past, current status and future of LCSA, Life Cycle Assessment method (LCA), Life Cycle Costing (LCC), Social Life Cycle Assessment (SLCA), the methodology of LCSA, typical LCSA case studies, limitations of LCSA, and life cycle aggregated sustainability index methods are all covered in this multidisciplinary book. Includes models for

assessing sustainability in environmental, energy engineering and economic scenarios Features case studies that help define the advantages and obstacles of real world applications Presents a complete view, from theory to practice, of a life cycle approach by exploring the methods and tools of sustainability assessment, analysis and design of sustainability assessment

warfare.

### **Tables of Standards**

Project Management Inst  
General Leslie Groves and J. Robert Oppenheimer were the two men chiefly responsible for the building of the first atomic bomb at Los Alamos, code name "The Manhattan Project." As the ranking military officer in charge of marshalling men and material for what was to be the most ambitious, expensive engineering feat in history, it was General Groves who hired Oppenheimer (with knowledge of his left-wing

past), planned facilities that would extract the necessary enriched uranium, and saw to it that nothing interfered with the accelerated research and swift assembly of the weapon. This is his story of the political, logistical, and personal problems of this enormous undertaking which involved foreign governments, sensitive issues of press censorship, the construction of huge plants at Hanford and Oak Ridge, and a race to build

the bomb before the Nazis got wind of it. The role of groves in the Manhattan Project has always been controversial. In his new introduction the noted physicist Edward Teller, who was there at Los Alamos, candidly assesses the general's contributions-and Oppenheimer's-while reflecting on the awesome legacy of their work.

**Congressional Redistricting** Economic Outlook for Southeast Asia, China and India 2018 Fostering Growth

through Digitalisation Fostering Growth through Digitalisation PMI's latest foundational standard, The Standard for Organizational Project Management (OPM), expands upon the popular Implementing Organizational Project Management: A Practice Guide, published in 2014. This newly-created standard is a result of survey feedback that revealed acceptance of the approach and increasing interest in an expanded version. OPM is

defined as the integration of people, knowledge, and processes, supported by tools across all functional domains of the organization. The approach further advances an organization's performance by developing and linking portfolio, program, and project management principles and practices with organizational enablers (e.g., structural, cultural, technological, and human resource practices) and business processes to support

strategic objectives. OPM helps organizations deliver value through the following principles: •Aligning strategy •Consistent execution and delivery •Cross-functional collaboration •Adding value to the organization •Continuous training Although useful for any organization that is seeking to better meet its strategic objectives, this standard is particularly beneficial for organizations that do not have a unified project management approach.

Analytical but sympathetic survey of Mitchell's stormy career in aviation and the ideas and convictions that motivated his stand on

behalf of U. S. air power.

## **FAIRNESS AND EQUALITY**

Da Capo Press

Given the enormous destructive capacity of precision weapons in the modern era and the inherent vulnerabilities of modern society to high technology attack, this book is more relevant today than when it was first written in the midst of the nuclear age, in 1953. Remaining one of the finest texts ever written on the history of warfare and weapons

acquisition, this is a thorough and reliable work that should be a standard reference for acquisition managers and decision-makers, providing a guide to informed decision-making that reflects the experience and lessons of the past. Bibliographical notes. Index.

This book presents the technical aspects of an economic model used to

examine issues of global economic significance, such as the impact on the world economy of changes in trade and environmental policy. The book provides a number of studies using the model to examine trade reform, growth and investment, climate change, natural resources, technology, and demographic change and migration.

Report of the Secretary of  
Defense Routledge

This book examines the law of elections in Australia. It explores Australia's rich history of

electoral law innovation as well as exciting contemporary challenges such as electronic voting and party regulation. Topics covered also include the centenary of the first uniform federal franchise, the Gore v Bush 2000 US presidential election, and the role of scrutineers in the

electoral process. The volume draws together as contributors a range of insiders and other Australian and international commentators with long experience in electoral administration and electoral law. Authors include leading lawyers, political scientists, historians and electoral

administrators. [Crusader for Air Power](#)
