Cost Management: A Strategic Emphasis Cengage Learning
 Cost Management: A Strategic Emphasis, by Blocher/Stout/Juras/Cokins is dedicated to answering the question: Why Cost Management? Blocher et al. provide the cost-management tools and techniques needed to support an organisation's competitiveness, improve its performance, and help the organisation accomplish its strategy. The text is written to help students understand the broader role of cost accounting in helping an organisation succeed - and not just the measurement of costs. While the text does include coverage of traditional costing topics (e.g., job-order costing, process costing, service-department cost allocations, and accounting for joint and by-products), its primary strength is the linkage of these topics, as well as more contemporary topics, to an organisation's strategy. This message is reinforced by a dynamic author team, all four of whom have close ties to current cost management practice.

True Cost Accounting for Food Cengage Learning

"As our eyes are drawn upward to the skyline of great cities, it's important to remember that these impressive constructions are able to reach such heights only because their foundations are strong. In much the same way, being successful in the business world begins with fundamental courses like financial and managerial accounting. It is only when students have a firm

grasp of concepts like the accounting cycle and managerial decision making that they have a base on which to stand, a strong foundation on which to grow. In this edition, as before, the Williams team has revised the text with a keen eye toward the principle of helping students establish the foundation they will need for future success in business. However, through new coverage of International Financial Reporting Standards and a revised globalization chapter, the Williams book also introduces students to larger themes and evolving concerns. This dual emphasis allows students to keep their eyes trained upward even as they become solidly grounded in accounting fundamentals"--
