25 YEARS OF WORLD BANK EXPERIENCE ON WHAT WORKS AND WHAT DOESN'T

World Health Organization

A very high portion of the seafood we eat comes from abroad, mainly from China and Southeast Asia, and most of the active ingredients in medicines we take originate in other countries. Many low- and middle-income countries have lower labor costs and fewer and less stringent environmental regulations than the United States, making them attractive places to produce food and chemical ingredients for export. Safe Foods and Medical Products Through Stronger Regulatory Systems Abroad explains that the diversity and scale of imports makes it impractical for U.S. Food and Drug Administration (FDA) border inspections to be sufficient to ensure product purity and safety, and incidents such as American deaths due to adulterated heparin imported from China propelled the problem into public awareness. The Institute of Medicine Committee on Strengthening Core Elements of Regulatory Systems in Developing Countries took up the vital task of helping the FDA to cope with the reality that so much of the food, drugs, biologics, and medical products consumed in the United States originate in countries with less-robust regulatory systems. Ensuring Safe Foods and Medical Products Through Stronger Regulatory Systems Abroad describes the ways the United States can help strengthen regulatory systems in low and middle income countries and promote cross-border partnerships - including government, industry, and academia - to foster regulatory science and build a core of regulatory professionals. This report also emphasizes an array of practical approaches to ensure sound regulatory practices in today's interconnected world.

The term 'Reserve Component' is used to refer collectively to the seven individual reserve components of the armed forces: the Army Nat. Guard (NG), the Army Reserve, the Navy Reserve, the Marine Corps Reserve, the Air NG, the Air Force Reserve, and the Coast Guard Reserve. These reserve components 'provide trained units and qualified persons available for active duty in the armed forces.' Since 1990, reservists have been involuntarily activated six times, incl. two large-scale mobilizations for the Persian Gulf War and in the aftermath of 9/11. This increasing use of the reserves has led to interest in funding, equipment, and personnel policy. This report provides an overview of key reserve component personnel issues. This is a print on demand report.

Americans are accustomed to anecdotal evidence of the health care crisis. Yet, personal or local stories do not provide a comprehensive nationwide picture of our access to health care. Now, this book offers the long-awaited health equivalent of national economic indicators. This useful volume defines a set of national objectives and identifies indicators--measures of utilization and outcome--that can "sense" when and where problems occur in accessing specific health care services. Using the indicators, the committee presents significant conclusions about the situation today, examining the relationships between access to care and factors such as income, race, ethnic origin, and location. The committee offers recommendations to federal, state, and local agencies for improving data collection and monitoring. This highly readable and well-organized volume will be essential for policymakers, public health officials, insurance companies, hospitals, physicians and nurses, and interested individuals.

This White Paper sets out the future relationships Defence seeks with reservists and their families, their employers and society. Under the Future Reserves 2020 programme the Government has committed an additional £1.8 billion over ten year. The route from selection, is being simplified, making it easier for reservists to get to the level of training required. There will be improved alignment of pay and benefits with regulars. Reservists' total remuneration will be increased through the provision of a paid annual leave entitlement. From April 2015, when the new Armed Forces pension scheme is introduced, reservists will accrue pension entitlements for time spent on training as well as when mobilised. Welfare support will also be delivered to regulars and reservists alike, and their families, according to the impact of military service and their need. Recruitment of Army Reserve officers and those leaving the Regular Army will be encouraged to join the Reserves through bonuses of up to £5,000. A National Relationship Management scheme will be established to strengthen relationships with employer organisations and the largest employers from both the public and private sector and there will be provision of extra financial support to small and medium sized employers. New legislation will be introduced to enable mobilisation for the full range of tasks which our Armed Forces may be asked to undertake. The Territorial Army will also be renamed the 'Army Reserve' to reflect the significant changes in its role and its integration into the Whole Force.
