One of the most exciting
footballers of his era,
Vince Hilaire is a cult
sporting figure. His career
spanned over 600 games
and included spells at
Crystal Palace,

Portsmouth, Leeds United
and Stoke City, playing in
every professional
division. Vince shared a
dressing room with some
of football's biggest
names of the time,
including Kenny Sansom,
Mick Channon, Gordon
Strachan and Vinnie
Jones, and was managed
by some of the superstars
of British football. This
book offers a fascinating
insight into the methods

of these managers, from
Malcolm Allison and Terry
Venables, with their free-
flowing football
reminiscent of the famous
'Busby Babes', to the
contrasting rigidity of
Howard Wilkinson's
Leeds. A trailblazer in the
professional game, Vince
outlines the difficulties he
faced as a young black
player making his way in
football in the 1970s, and
the dread he felt playing

at certain grounds. Candidly detailing Vince's journey into and out of professional football, this hugely entertaining autobiography tells the story of the beautiful game as it used to be played.

Rajasthan Geography Harper Collins This book provides a unique perspective on the

linguistic relationships between the Ancient Egyptian and Bantu languages of East/Central/Southern Africa. It will be of interest to readers of Egyptology, linguists, students, and the wider public who wish to find out more about the structure of the Ancient Egyptian language and how it connects with other languages, particularly with Bantu languages. The subject matter is different from other books as it examines the etymology of words, together with their

sound/meaning relationships and shows by using verifiable hieroglyphic forms how Ancient Egyptian words may be pronounced by inserting Bantu vowels which fit the meanings derived from the skeletal templates of consonants in the Ancient Egyptian language.

Peterson's Master TOEFL Vocabulary Biteback Publishing
Expanded from its previous edition to include ages 13 and 14, this book

provides teachers and parents with a quick reference on important childhood developmental issues, explaining what children should be learning and doing in the classroom at each developmental stage. The book begins by discussing how developmental issues can affect administrative and classroom decisions in the areas of mixed age grouping, ability grouping, retention, food, exercise, the structure of the school day, and racial and cultural questions. Each of the 11 chapters, one for

each year, includes a narrative description and charts outlining growth patterns, classroom implications, and appropriate curriculum. The charts allow readers to identify developmental "yardsticks" for a given age. These charts outline characteristic growth patterns (physical, social, language, and cognitive) as well as what to expect in the classroom regarding vision and fine motor ability, gross motor ability, cognitive growth, and social behavior. The curriculum charts

summarize the developmental continuum between ages 4 and 14, covering reading, writing, mathematics, and thematic units in social science, science, and current events. The book concludes with a list of over 100 favorite books for different ages, and resources for parents and teachers. (HTH)
