SOCIAL RESEARCHING

Routledge

This report expands on the work of an earlier National Research Council panel whose report, *Understanding Violence Against Women*, was published in 1996. The report is based on the presentations and deliberations of a workshop convened in January 2002, at the request of Congress, to develop a detailed research agenda on violence against women. While some of the research recommendations in the earlier report have been funded and carried out, the workshop demonstrated that important gaps remain. For example, prevalence and incidence

data are still inadequate to measure trends or to reveal whether interventions being designed under federal programs are, in fact, working. Among its primary recommendations, the committee underscored the importance of strengthening the data and research infrastructure in this area, especially the need for better prevalence data and longitudinal data to determine the causes of violent victimization of women and the impact of interventions.

An Integrated Approach to Communication Theory and Research United Nations University Press

Violence and aggression have existed as long as mankind, and the need to understand and control these forces has only continued to grow throughout history. Thanks to the advance of psychological research within the social and behavioral sciences, as well as several other scientific disciplines, we have more knowledge than ever before about the genetic, developmental, interpersonal, and cultural causes of aggression. Yet these

findings have not been integrated into meaningful discussions about how to transform aggression research into practical applications. With so many answers to the question "What makes a person violent?" there is surprisingly little insight into "How do we prevent violence?" In this comprehensive book, editors Phillip R. Shaver and Mario Mikulincer have assembled chapters from international experts to provide a broad-based and multidisciplinary analysis of aggression and violence, their negative consequences, and promising interventions. Five sections examine major theoretical perspectives, genetic and environmental determinants, and the psychological and relational processes underlying human violence and aggression. The tone of the book is realistic in its investigation of violence as an inherent part of human genetics and interaction, but hopeful in its exploration of researched-based interventions aimed at reducing violence in future generations. In its assessment of aggression and violence across individual, relational and societal levels, this book will engage a broad audience.

Advancing the Federal Research Agenda on Violence Against Women SAGE Publications

The updated Tenth Edition of this bestselling text provides students with the critical skills necessary to evaluate and carry out research. Each chapter integrates instruction in the core research methods with investigation of interesting aspects of the social world, including updated examples to reflect the tumultuous world since 2020. As always, the book seeks to communicate the excitement of social research and the importance of carefully evaluating the methods used in that research.

Researching Violently Divided Societies Routledge
Middle Grades Research Journal (MGRJ) is a refereed, peer reviewed journal that publishes original studies providing both empirical and theoretical frameworks that focus on middle grades education. A variety of articles are published quarterly in March, June, September, and December of each volume year.

Researching Domestic Abuse and Sexual Violence Policy Press

This compelling book provides cutting-edge information on studies on sexual violence against women conducted on North American campuses - and simultaneously contradicts backlash critics who claim that feminists exaggerate their statistics. Well-known researchers in the field describe their own work and that of others to illustrate both large-scale and local studies. Topics discussed include: researchers' own emotional experiences of working with rape research; experiences of harassment by subjects; feminist participatory research into lesbian battering; reflexivity in studying prostitutes; the gendered nature of research interviews; and white women studying battered black women.

Middle Grades Research Journal Routledge

Feminist research on gender, violence and abuse has been an area of academic study since the late 1970s, and has increased exponentially over this time on a global scale. Although situated in a predominantly qualitative tradition, research in the field has developed to include quantitative and mixed methodologies. This book offers a compendium of research methods on gender and violence, from the traditional to the innovative, and showcases best practice in feminist research and international case studies.

Researching Gender, Violence and Abuse covers: The origins of feminist research, Ethical considerations relating to research on gender, violence and abuse, Working in partnership with organisations such as the police or the voluntary sector, A comprehensive range of research methods including interviews and focus groups, surveys, arts-based research and ethnography, The challenges and opportunities of working with existing data, The influence of activism on research and the translation of research into policy and practice. This book is perfect reading for students taking courses on violence against women, domestic violence, gender and crime, as well as advanced students embarking on new research.

THE SAGE ENCYCLOPEDIA OF COMMUNICATION RESEARCH METHODS

Edward Elgar Publishing

This international, edited collection brings together personal accounts from researchers working in and on conflict and explores the roles of emotion, violence, uncertainty, identity and positionality within the process of doing research, as well as the complexity of methodological choices. It highlights the researchers' own subjectivity and presents a nuanced view of conflict research that goes beyond the 'messiness' inherent in the process of research in and on violence. It addresses the uncomfortable spaces of conflict research, the potential for violence of research itself and the need for deeper reflection on these issues. This powerful book opens up spaces for new conversations about the realities of conflict research. These critical self-reflections and honest accounts provide important

insights for any scholar or practitioner working in similar environments.

Researching Corporations and Global Health Governance SAGE Publications

Violent behavior is an unavoidable aspect of human nature, and as such it has become deeply integrated into modern society. Examining violence through a critical and academic perspective can lead to a better understanding of its foundations and implications. Violence and Society: Breakthroughs in Research and Practice explores the social and cultural influences of violence on human life and activity. Focusing on emerging research perspectives, case studies, and future outlooks, this comprehensive collection is an essential reference source for graduate-level students, sociologists, researchers, professionals, and practitioners interested in the effects of violence in contemporary culture.

The Routledge Handbook of International Crime and Justice Studies Rowman & Littlefield

Violence is a research topic that is fraught with difficulties. A notoriously sensitive subject, and one that is presumed to be largely hidden, researchers have long struggled with the question of how to measure its impact and how to explore its incidence. Arising from the ESRC's Violence Research Programme, Researching Violence is a practical guide both to these problems and to the obstacles encountered when negotiating this uneasy terrain. Comprising the reflections of researchers who have worked on diverse projects - from violence in the home to racial violence and homicide - this book demonstrates the ingenuity and at times courageous actions of researchers having to think

on their feet. It also investigates the ethical and emotional issues arising from working with the victims and perpetrators of violence. This book will be indispensable for students and academics doing research projects on violence.

World Report on Violence and Health BRILL

This new edition provides a comprehensive overview of current theory and research written by the top theorists and researchers in each area. It has been updated to address the growing influence of technology, changing relationships, and several growing integrated approaches to communication and includes seven new chapters on: ■ Digital Media ■ Media Effects ■ Privacy ■ Dark Side ■ Applied Communication ■ Relational Communication ■ Instructional Communication ■ Communication and the Law The book continues to be essential reading for students and faculty who want a thorough overview of contemporary communication theory and research.

RESEARCHING GENDER VIOLENCE

SAGE Publications

Though decades ago school shootings were rare events, today they are becoming normalized. Active shooter drills have become more commonplace as pressure is placed on schools and law enforcement to prevent the next attack. Yet others argue the traumatizing effects of such exercises on the students. Additionally, violence between students continues to remain problematic as bullying pervades children's lives both at school and at home, leading to negative mental health impacts and, in extreme cases, suicide. Establishing safer school policies, promoting violence prevention programs, building healthier

classroom environments, and providing better staff training are all vital for protecting students physically and mentally. The Research Anthology on School Shootings, Peer Victimization, and Solutions for Building Safer Educational Institutions examines the current sources of violence within educational systems, and it offers solutions on how to provide a safer space for both students and educators alike. Broken into four sections, the book examines the causes and impacts that peer victimization has on students and how this can lead to further violence and investigates strategies for detecting the warning signs. The book provides solutions that range from policies and programs that can be established to strategies for teaching nonviolence and promoting coexistence in the classroom. Highlighting a range of topics such as violence prevention, school climate, and bullying, this publication is an ideal reference source for school administrators, law enforcement, teachers, government and state officials, school boards, academicians, researchers, and upper-level students who are intent on stopping the persisting and unfortunate problem that is school violence.

Investigating Legal Studies for Queensland SAGE Publications

In this fundamental analysis, Rapoport asks: Why do we have wars? Doesn't humanity always seem on the verge of self-annihilation? Is there something in human genetic structure that makes people want to kill each other? Perhaps this impulse is a matter of good versus evil, or just plain human nature. Rapoport moves beyond clichés by claiming that the sources of modern violence reside in the imbalance between a lag in the system of values inherited from the past and the structure of science and technology that awaits no revision of values to move ahead. As a

result, Rapoport argues that the study of war and peace should be considered a science, just like biology or, for that matter, political science. The same rules of empirical engagement and experimentation should apply. Before we can have a theory of peace, we need a methodology of conflict. Using the writings of thinkers who have made significant contributions to the predominant ideas and ideals of our society, Rapoport weaves together the strands of independent thought and research into a single, thought-provoking work. After investigating the whys of violence, using ideological, psychological, strategic, and systemic perspective, Rapoport moves to an in-depth analysis of possible varieties of conflict resolution. He explores such mechanisms as mediation, education, and applying the results of scientific research. He documents the impact of ideologies countervailing dominant ones that place obstacles in the way of peacemaking. Rapoport argues that conciliation and game theories can be utilized to replace the concept of winner take all or total victory. *The Origins of Violence* is a needed contribution to our understanding of warfare, and provides a forward-looking perspective that can be of wide use to each of the policy sciences, starting with military strategy and ending with international development.

RESEARCHING VIOLENCE

American Psychiatric Pub

This book examines the multifaceted nature of conflict and the importance of the socio-economic and political contexts of conflict and violence and shows how to support ongoing initiatives and programs to build sustainable peace on the African

continent. Drawing on a range of conceptual framings in the study of peace and conflict, from gender perspectives to institutionalist to decolonial perspectives, the contributors show how peacebuilding research covers a whole range of questions that go beyond concerns for post-conflict reconstruction strategies. Chapters focus on the methodological, theoretical and practical aspects of peacebuilding and provide a toolbox of perspectives for conceptualizing and doing peacebuilding research in Africa. Anchored in African-centered perspectives, the book encourages and promotes high-quality interdisciplinary research that is conflict-sensitive, historically informed, theoretically grounded and analytically sound. This book will be of benefit to scholars, policy makers and research institutions engaged in peacebuilding in Africa.

RESEARCH ANTHOLOGY ON SCHOOL SHOOTINGS, PEER VICTIMIZATION, AND SOLUTIONS FOR BUILDING SAFER EDUCATIONAL INSTITUTIONS

Routledge

This book offers a critical examination of the ethical and moral challenges in conducting research about domestic abuse or sexual violence from the perspectives of student-practitioners and novice researchers within various professional disciplines, offering rich insights based on the experiences of each author. Including the research expertise of academics in this field and importantly, the experiences of student-practitioners in conducting their research, the book explores practice-informed research and research-informed practice, in relation to the examination of a range of issues and themes related to DA and

SV. All contributors consider the challenges and reflect on the salient issues related to their ethical research, and with some of the research conducted during the global pandemic of COVID-19, they also reflect on these additional challenges and how they sought to address them. The reader is invited to consider the different national and international, gendered, cultural, and social contexts of DA and SV from early childhood to old age. With a constant thread of critical reflection, they are encouraged to think about their own positionality to the unfolding discussions within each chapter, and how these may relate to their professional practice, their research, and their professional values. Overall, the book sets out to (1) articulate the dominant theoretical frameworks that have sought to offer explanations about domestic abuse and sexual violence within the research problems presented by the student-practitioners, (2) evaluate the significance of the legislation and policy provision within the UK in service provision and interventions for victims and perpetrators, (3) showcase best practice examples of research studies on domestic abuse and sexual violence based on the experiences of studentpractitioners, (4) promote a critical appraisal of the self and the positionality of the practitioner as researcher, through reflection on their personal and professional development, and (5) reflect on the impact of the shadow pandemic on the experiences of vulnerable individuals and the challenges of conducting research ethically and safely. This is essential reading for students either currently engaged in or with aspirations to work in professional practice in the DA and SV sectors. It is also useful for students on related graduate MA professional courses, practitioners in social work, health care, criminal justice,

counselling, and particularly in the multi-faceted 'women's sector'. It will also appeal to final-year students undertaking primary research in social work, health care, women's studies, and criminology.

Research Into Violent Behavior Eliva Press

This important Research Handbook explores the nexus between human rights, poverty and inequality as a critical lens for understanding and addressing key challenges of the coming decades, including the objectives set out in the Sustainable Development Goals. The Research Handbook starts from the premise that poverty is not solely an issue of minimum income and explores the profound ways that deprivation and distributive inequality of power and capability relate to economic, social, cultural, civil and political rights.

The Development of Aggression and Violence in Adolescence Routledge

This practical text combines social research methods with coverage of statistical analysis to help students develop the applied research skills needed for future careers in public and private organizations, while also delivering a solid foundation for those going on to graduate school. Throughout the book, the author offers a real-world example and then breaks it down into a decision tree, which helps lead students to a possible statistical decision (rather than starting with the statistic). This text gives students a toolbox of the most common and in-demand skills and demonstrates how those skills can be used to make the best research decisions. The book takes students through the entire

real-world research process, from the formation of a research topic to measurement and sampling, to methods for gathering information and making sense of the data, and finally presenting to a non-academic audience in a way that "gets the job done." Resources for instructors and students are available on an accompanying website for the book.

Researching Conflict in Africa Cambridge University Press
This book examines potential synergies between the fields of Terrorism Studies and Peace and Conflict Studies. The volume presents theoretically- and empirically-informed contributions, which shed light on whether the two fields can inform each other on issues of mutual interest and importance. The book examines key themes including the conceptualisation(s) of peace and violence; the exceptionalisation of terrorist violence; the relationship between scholarship and political power; the dysfunctionality of the liberal peace and the opportunities offered by post-liberal peacebuilding frameworks; and the implications and challenges of cyber-terrorism and cyber-conflict. Furthermore, the book intends to be a launching pad for future debate on whether the recent 'critical' turn in terrorism studies can offer a pathway for peace studies to engage with the so far largely ignored question of power. Consisting of not only key scholars but also practitioners and policy makers, the

contributors present a number of case studies, including Colombia, Northern Ireland, the Basque Country, and Iraq, where they explore the relationships between terrorism and peace and conflict approaches. They critically analyse the statist approach inherent in both terrorism approaches and liberal peacebuilding frameworks; the role of the grassroots levels of society; the inefficiency of simplistic frameworks of understanding and implementation; and the chains of governance from international (and transnational) actors to national actors and finally from national to local actors. This book will be of much interest to students of terrorism studies, peace and conflict studies, IR and security studies.
