As a serial entrepreneur, Kevin Kruse has seen time and again that the leadership practices that actually work are the opposite of what is commonly taught and implemented. *Close Your Open Door Policy* shows how a contrarian approach can be a better, faster, and easier way to succeed as a leader. Chapter by chapter, Kruse focuses on a piece of popular wisdom, then shows with real-world case

studies and quantitative research that the opposite approach will lead to better results, encouraging leaders to play favorites, stay out of meetings, and, of course, close their open doors.

Most leaders feel the inevitable interruptions in their jam-packed days are troublesome. But in *TouchPoints*, Conant and Norgaard argue that these—and every point of contact with other people—are overlooked opportunities for leaders to increase their impact and promote their organization's strategy and values. Through previously untold stories from Conant's tenure as CEO of Campbell Soup Company and Norgaard's vast consulting experience, the authors show that a leader's impact and legacy are built through hundreds, even thousands, of interactive moments in time. The good news is that anyone can

develop "TouchPoint" mastery by focusing on three essential components: head, heart, and hands. TouchPoints speaks to the theory and craft of leadership, promoting a balanced presence of rational, authentic, active, and wise leadership practices. Leadership mastery in the smallest and otherwise ordinary moments can transform aimless activity in individuals and entropy in organizations into focused energy—one magical moment at a time.

Understanding the power of trust

Manchester University Press

In *The Book of Trust*, 13-times author and founder of the Trust Building Institute Dr. Yoram Solomon shows

you how to build the most important quality you can have: your trustworthiness. A trustworthy salesperson can sell the same product for 29.6% higher price. A trustworthy leader can increase productivity by 64%. Trustworthy CEOs generate 286% better shareholder returns. Yet, trust is deteriorating rapidly in our country. We have lost trust in the government, the media, major brands, our companies, and in each other. This book explains the seven laws of trust: Law #1: Trust is Continuous. Law #2: Trust is Contextual. Law #3: Trust is Personal. Law #4: Trust is Asymmetrical. Law #5: Trust is Transferable. Law #6: Trust is Reciprocal. Law #7:

Trust is Two-sided. The model in this book demonstrates how to build your trustworthiness through six components: competence, shared values, fairness/symmetry, positivity, time, and intimacy. This model is based on more than a decade of research done by the author, decades of experience as an executive and board member of multiple organizations, from startups to multi-billion dollar entities, as an elected official, and as a member of the Israeli Defense Forces 35th Airborne Paratroopers brigade. This book is not theoretical. While based on research, it offers a strong action plan that helps you identify and build the

habits that will make you trustworthy. It is accompanied by a series of mini-books that include specific, one-page habits that would address any trustworthiness issue you might have in any relationship, professional or personal.

From Stephen R. Covey's eldest son come a revolutionary book that will guide business leaders, public figures and their organizations towards unprecedented productivity and satisfaction. Trust, says Stephen M. R. Covey, is the very basis of the 21st century's global economy, but its power is generally overlooked and misunderstood. Covey shows you how to inspire immediate trust in everyone you encounter - colleagues, constituents, the marketplace - allowing you to forego the time-killing and energy-draining check and balance bureaucracies

that are so often relied upon in lieu of actual trust.

BUSINESS STRATEGY.

"The 4 Disciplines of Execution" offers the what but also how effective execution is achieved. They share numerous examples of companies that have done just that, not once, but over and over again. This is a book that every leader should read! (Clayton Christensen, Professor, Harvard Business School, and author of "The Innovator's Dilemma)."
Do you remember the last major initiative you watched die in your organization? Did it go down with a loud crash? Or was it slowly and quietly suffocated

by other competing priorities? By the time it finally disappeared, it is likely no one even noticed. What happened? The whirlwind of urgent activity required to keep things running day-to-day devoured all the time and energy you needed to invest in executing your strategy for tomorrow.

"The 4 Disciplines of Execution" can change all that forever.

BUILDING TRUST AT THE SPEED OF CHANGE

John Wiley & Sons
From the bestselling author of *The Speed of Trust* and *Smart Trust*, a revolutionary new way to lead. Stephen M. R. Covey has made it his life's work to understand trust in leadership and organizations. In his newest and most transformative book, *Trust and Inspire*, he makes the compelling argument that even though our world has changed drastically, our leadership style has not. Most organizations, teams, schools, and families today still operate from a model of "command and control," focusing

on hierarchies and compliance from people. But because of the changing nature of the world, the workforce, work itself, and the choices we have for where and how to work and live, these old rules of leadership no longer apply. Covey's solution is simple, yet bold: a shift from this "command and control" model to a leadership style of "trust and inspire." Covey challenges our beliefs about people and leadership that have been deeply engrained in management approaches for decades. Trust and Inspire is a new way of leading that starts with the belief that people are creative, collaborative, and full of potential. People

with this kind of leader are inspired to become the best version of themselves and to produce their best work. People don't want to be managed; they want to be led. Trust and Inspire is the solution to the future of work: where a dispersed workforce will be the norm, necessitating trust and collaboration across time zones, cultures, personalities, and technology. Trust and Inspire calls for a radical shift in the way we lead in the 21st century, and Covey shows us how. *Leading Without Power* Simon and Schuster Imagine what you could do with the time you spend writing emails every day. Complexity is killing companies' ability to innovate and adapt,

and simplicity is fast becoming the competitive advantage of our time. Why Simple Wins helps leaders and their teams move beyond the feelings of frustration and futility that come with so much unproductive work in today's corporate world to create a corporate culture where valuable, essential, meaningful work is the norm. By learning how to eliminate redundancies, communicate with clarity, and make simplification a habit, individuals and companies can begin to recognize which activities are time-sucks and which create lasting value. Lisa Bodell's simplification method has several unique principles:

Simplification is a skill that's available to us all, yet very few leaders use it. Simplification is the right thing to do--for our customers, for our company, and for each other. Operating with simplification as our core business model will make it easier to be respectful of each other's time. Simplification drives culture, and culture in turn drives employee engagement, customer relations, and overall productivity. This book is inspired by Bodell's passion for eliminating barriers to innovation and productivity. In it, she explains why change and innovation are so hard to achieve--and it's not what you might expect. The reality is this: we spend our days drowning in mundane tasks like

meetings, emails, and reports. These are often self-created complexities that prevent us from getting to the meaningful work that truly matters. Using simple stories and techniques, *Why Simple Wins* shows that by using simplicity as an operating principle, we can eliminate the busy work that puts a chokehold on us every day, and instead spend time on the work that we value.

The State of the World's Land and Water Resources for Food and Agriculture is FAO's first flagship publication on the global status of land and water resources. It

is an 'advocacy' report, to be published every three to five years, and targeted at senior level decision makers in agriculture as well as in other sectors.

SOLAW is aimed at sensitizing its target audience on the status of land resources at global and regional levels and FAO's viewpoint on appropriate recommendations for policy formulation. SOLAW focuses on these key dimensions of analysis: (i) quantity, quality of land and water resources, (ii) the rate of use and sustainable management of these resources in the context of relevant socio-economic driving factors and concerns, including food security and poverty, and climate change. This is

the first time that a global, baseline status report on land and water resources has been made. It is based on several global spatial databases (e.g. land suitability for agriculture, land use and management, land and water degradation and depletion) for which FAO is the world-recognized data

source. Topical and emerging issues on land and water are dealt with in an integrated rather than sectoral manner. The implications of the status and trends are used to advocate remedial interventions which are tailored to major farming systems within different geographic regions.
