interventions in difference contexts and countries, all aimed at enhancing equity in schools and higher education institutions.; The book argues that pedagogy can not be isolated from the overarching gender-education system. What can be done, it claims, is that teachers can be provided with a range of pedagogic strategies which can be used to make education, as it is experienced by students and reflected in their achievements, more just. Eddie Carbone is a longshoreman and a straightforward man, with a strong sense of decency and of honour. For Eddie, it's a privilege to take in his wife's cousins, straight

off the boat from Italy. But, as his niece begins to fall for one of them, it's clear that it's not just, as Eddie claims, that he's too strange, too sissy, too careless for her, but that something bigger, deeper is wrong, and wrong inside Eddie, in a way he can't face. Something which threatens the happiness of their whole family.

Knowledge has been a defining focus for the curriculum studies field. In the early part of the 21st

century convincing arguments were mounted that knowledge needed to be 'brought back in', both to the curriculum of schools and to the attention of curriculum researchers. This book is a result of these arguments, and what some regarded as a 'crisis' in curriculum study related to the growing emphasis on international comparisons between education systems. The book's most important contribution is to build on seminal work in the sociology and philosophy

of education in order to develop new foundations for curriculum study, using the importance of 'transactions' as the context for understanding knowledge in the curriculum. The contributors build on this importance to suggest a rapprochement in the field around the idea of curriculum knowledge as both constructed and real. This book was originally published as a special issue of The Curriculum Journal.
