This classic book has been providing help for candidates of the MRCGP exam for over 20 years. Now fully updated for UK trained doctors wishing to obtain a Certificate of Completion of Training in General Practice, this new edition covers all three required components of the integrated assessment programme. It provides sample questions for the Applied Knowledge Test (AKT), practice cases for Clinical Skill Assessment (CSA) and a guide to Workplace Based Assessment (WPBA). The chapters follow the 16 sections of the RCGP curriculum and include summaries

of the current evidence base with clinical guidelines, examination tips, revision tactics, and advice on where to get support - but not just at the crucial time of exams - it includes invaluable information for GPs starting their first year in practice and helps provide the "life skills" needed to be a GP, including topics relevant for the rest of a GP's career and their "continuing professional development" - appraisal, revalidation, managing change, teamwork, burnout, and other areas of self care.

General Practice Cases at a Glance John Wiley & Sons

This book helps readers pull together the knowledge and communication skills required for success in the consultation components of the MRCGP exam, namely the Clinical Skills Assessment (CSA) and the Clinical Observation Tool (COT). Rather than learning by rote, this book promotes a methodical, step-wise approach which will enable you to easily identify the type of case presenting, and to work out exactly what you need to demonstrate for a successful consultation. The book features a number of cases to test and enhance your skills, in three formats: • 13 teaching

cases- these are very detailed cases which provide you with a great deal of support and advice, including: suggested approaches to the consultation, model answers, background knowledge required, and the theoretical underpinnings of the consultation. • 20 long cases- these build on the knowledge gained in the teaching cases and feature detailed analysis to help you develop an ordered, step-wise approach to data gathering, clinical management and interpersonal skills. • 15 shorter practice cases- these help refine the skills you have learnt in working through the earlier cases. These cases come with marking schemes and can be used either alone or in small groups. Once you have worked through the book and refined this methodical approach, you will be able to approach any consultation confident in the knowledge that you possess the tools to succeed. Note that this edition does not contain a DVD. The 13 video cases in the previous edition have been replaced by teaching cases.

General Practice Cases at a Glance is a workbook of clinical scenarios, ideal for those working in general practice, on their GP rotations, or looking to improve their history-taking, diagnostic and management planning skills. Written by practising teaching GPs, it provides an accessible overview of the richness and complexity of general practice. With 50 engaging consultations, covering all age ranges and a broad spread of clinical areas, each symptom-based chapter begins with the clinical presentation of a patient, before going on to uncover the full history and examination. As you work through each true-to-life case, there are red flag symptoms, useful charts and tables, and further resources to deepen your knowledge. General Practice Cases at a Glance: Is suitable for clinical students, Foundation doctors, and those preparing for the MRCGP's CSA Includes 50 case scenarios from across the medical spectrum, from mental health and paediatrics to musculoskeletal and ENT medicine Is comprehensively illustrated Features current clinical guidelines, and charts and tables to accompany each case Is the companion volume to General Practice at a Glance, ISBN 978-0-470-65551-1, (Awarded First Prize in the Primary health care category at the 2013 BMA Medical Book Awards) but is also a stand-alone resource

Oxford Cases in Medicine and Surgery, second edition, teaches students a hypothesis-driven, logical step-by-step approach to diagnosis when faced with each of 29 common patient presentations. This approach mirrors that used by successful clinicians on the wards, challenging students with questions at each stage of a case (history-taking, examination, investigation, management). In tackling these questions, students understand how to critically analyse information and learn to integrate their existing knowledge to a real-life scenario from start to finish. Each chapter focuses on a common presenting symptom (e.g. chest pain). By starting with a symptom, mirroring real life settings, students learn to draw on their knowledge of different physiological systems - for example, cardiology, respiratory, gastroenterology - at the same time. All the major presenting symptoms in general medicine and surgery (mapped to UK medical school curricula) are covered, together with a broad range of pathologies. This book is an essential resource for all medicine students, and provides a modern, well-rounded introduction to life on the wards. Ideal for those starting out in clinical medicine and an ideal refresher for those revising for OSCEs and finals.

An Aid to the MRCP PACES Radcliffe Publishing

This is the most comprehensive resource for candidates sitting the challenging final Clinical Skills Assessment exam, offering a complete curriculum guide as well as 110 role plays that can be removed and practised in pairs. The guidance is seamlessly aligned to the RCGP syllabus, fully up-to-date and referenced with the latest guidelines, with detailed 'model' answers to each case. Offering a new, straightforward consultation model highly suited to the requirements of the exam, the book provides: a realistic amount of information for both 'doctor' and 'patient' to closely replicate the exam the answers! Each case includes a fully worked up 'Model Consultation' summaries of guidelines and tips from the authors' recent experience of the CSA exam for all 110 cases an easy way to mark each colleague's role play attempts, with tick

boxes on the Model Consultation and a universally applicable marking scheme card a colour-coded curriculum for ease of reference the only CSA casebook and revision guide providing information and answers across the curriculum. The Complete CSA Casebook is an excellent resource to prepare for a number of international examinations, including: Clinical Skills Assessment (CSA) for the RCGP (Royal College of General Practitioners). Simulated Surgery, Learning Needs Assessment, for the International GP Recruitment (IGPR) Scheme, GP Returner Scheme and GP Induction Scheme. Objective Structured Clinical Examination (OSCE) for the RACGP (Royal Australian College of General Practitioners) Fellowship. GPEP1 Clinical Examination for the RNZCGP (Royal New Zealand college of General Practitioners). The Certification Examination in Family Medicine simulated office orals (SOOs) for The College of Family Physicians of Canada." The Family Medicine Certification Examination for the ABFM (American Board of Family Medicine). and will remain an invaluable resource for best general practice after qualification.

MRCGP CSA CASES. John Wiley & Sons Practical General Practice is a highly practical manual, specifically designed for use during the consultation process. Containing over 1000 conditions, the unique underlying structure of the book allows the GP to see immediately what treatment is recommended and why. All recommendations are highly specific - giving a firm guide to the GP during the consultation process rather than a list of possibilities that the GP might wish to consider. Bullet points for action which give the GP an immediate summary of the issues that must be covered in the consultation. Bullet points of the key evidence which justifies those recommendations. All chapters thoroughly revised, to reflect changes in the evidence, and in major guidelines, since the last edition. NNT values provided when available

The Naked Consultation CSA book: MRCGP
 CSA Symptom Solver Clinical frameworks
 for the MRCGP CSA exam

CSA Book Description This CSA book has
 been written to include over 120 common
 symptoms that patients can present with
 and may come up in your RCGP CSA
 exams. For each symptom a
 comprehensive consultation framework
 has been included to guide you through
 the best approach in dealing with the
 complaint. This CSA Book This CSA book
 guides the GP registrar to ask relevant
 questions within the consultations such as
 eliciting relevant past medical history,
 social history etc. The CSA framework then
 guides you to which examinations would
 be relevant and what investigations should
 be requested in your CSA exam. The final
 part of the chapter then advises about
 possible differential diagnoses and
 evidence based ways of management
 these. We have also written in this CSA
 book clear explanation briefs that you can
 use to explain the pertinent diagnoses to
 the patient in a jargon free manner. This
 CSA book has been specifically written to
 save you hours of time researching before
 your examinations and hopefully will
 become your core companion to ease you
 through the CSA exams and into your
 future as a fully fledged General
 Practitioner.

*Don't Wait Until Something Goes Wrong to
 Think About Your Consultation Skills*
 Designed specifically for busy health
 professionals working in primary care, *The
 Naked Consultation: A Practical Guide to
 Primary Care Consultation Skills* covers all
 aspects of the primary care consultation in
 a clear, concise, and highly readable
 manner. The book begins by breaking the
 primary care consultation into its
 components, making it easier to focus on
 particular areas and practise skills such as
 encouraging patients to explain what's
 wrong, summarising and reflecting, and
 giving information to patients. The book
 then describes how to effectively use
 educational tools—such as videoing,
 random case analysis, problem case
 debriefing, and feedback—to improve
 consultations. It also explains in detail how
 to demonstrate proficient consultation
 skills in the Membership of the Royal
 College of General Practitioners (MRCGP)
 exam and the importance of these skills in
 appraisal/revalidation. Certified for
 continuing professional development
 (CPD®) by The CPD Certification Service,
 this fully updated and revised Second
 Edition incorporates new thinking and
 consultation models, including the 6 S
 model and the new doctor, patient, illness
 model. It also provides detailed analysis of
 the latest Royal College of General
 Practitioners (RCGP) assessment tools,
 such as the clinical skills assessment exam
 (CSA) and the consultation observation
 tool (COT). Complete with illuminating
 case studies, photocopyable forms, and a
 jargon-busting appendix, *The Naked
 Consultation: A Practical Guide to Primary
 Care Consultation Skills, Second Edition*
 offers valuable insight into the key phases
 of the primary care consultation, the best
 features of common consultation models,
 and the real-world application of popular
 consultation techniques.

Ethics in General Practice John Wiley &

The refrigerator. This white box that sits in
 the kitchen may seem mundane
 nowadays, but it is one of the wonders of
 20th century science – life-saver, food-
 preserver and social liberator, while the
 science of refrigeration is crucial, not just
 in transporting food around the globe but

in a host of branches on the scientific tree.
 Refrigerators, refrigeration and its
 discovery and applications provides the
 remarkable and eye-opening backdrop to
Chilled, the story of how science managed
 to rewrite the rules of food, and how the
 technology whirring behind every
 refrigerator is at play, unseen, in a
 surprisingly broad sweep of modern life.
 Part historical narrative, part scientific
 mystery-lifter, *Chilled* looks at the ice-pits
 of Persia (Iranians still call their fridge the
 'ice-pit'), reports on a tug of war between
 16 horses and the atmosphere, bears
 witness to ice harvests on the Regents
 Canal, and shows how bleeding sailors
 demonstrated to ship's doctors that heat is
 indestructible, featuring a cast of
 characters such as the Ice King of Boston,
 Galileo, Francis Bacon, and the ostracised
 son of a notorious 18th-century French
 traitor. As people learned more about
 what cold actually was, scientists invented
 machines for making it, with these first
 used in earnest to chill Australian lager.
 The principles behind those white boxes in
 the kitchen remain the same today, but
 refrigeration is not all about food – for
 example, a refrigerator is needed to make
 soap, penicillin or orange squash; without
 it, IVF would be impossible. Refrigeration
 technology has also been crucial in some
 of the most important scientific
 breakthroughs of the last 100 years, from
 the discovery of superconductors to the
 search for the Higgs boson. And the fridge
 will still be pulling the strings behind the
 scenes as teleporters and intelligent
 computer brains turn our science-fiction
 vision of the future into fact.

'...a unique book, written by a unique GP.
 There is no-one better placed to pull
 together decades of learning and
 experience on how to achieve the greatest
 success in the general practice
 consultation. The relaxed pace of writing,
 the accessible examples, the clear
 narrative and the engaging anecdotes
 make this a resource that it is accessible
 and useful to all who seek to improve their
 clinical consulting skills.' Helen Stokes-
 Lampard, former Chair of the Royal

College of General Practitioners This brand-new book aims to help GPs establish ways of thinking, talking and behaving in the consultation that are most likely to lead to good outcomes. It describes a simple three-part approach to the consultation's essential task, which is to convert a patient's problem into a plan acceptable to both patient and doctor. It combines reader-friendly explanations, helpful illustrations and examples from everyday practice. Key features: Written by a respected GP, teacher, and author of the highly-regarded trilogy *The Inner Consultation*, *The Inner Apprentice* and *The Inner Physician* Gives GPs a framework for consulting that is easy to remember, comprehensive, adaptable, robust, exam-friendly and quickly becomes second nature Identifies and addresses key areas of anxiety for GP trainees and MRCGP candidates, including 'How do I complete in 10 minutes?', 'How do I deal with difficult patients?' and 'What do I do when it all goes pear-shaped and I don't know what to do?' Gives advice and practical suggestions for how to make the difficult transition from theory to practice, from reading about the consultation to actually doing it better in real life Consulting in a Nutshell will help GPs at every career stage - from medical student to CSA candidate to experienced practitioner - to analyse, develop and grow their personal consulting style. Coming at a time of profound change in primary care, it aims to ensure that seeing patients and having good consultations becomes and remains a source of satisfaction and fulfilment. The author: Roger Neighbour is a retired GP, former Convenor of the Panel of MRCGP Examiners, and past President, Royal College of General Practitioners, UK. CRC Press

As three young, dynamic GPs working in London we realised that there was a dearth of well written up-to-date MCQ revision guides with satisfactory explanations. Since we all achieved distinctions in the MRCGP exam we believed we could incorporate our revision notes on hot topics to develop a high-quality contemporary MCQ resource...This comprehensive revision aid covers the entire nMRCGP syllabus over four exam papers. It's the most up-to-date guide available for the new exam and, alongside its online resources, provides a wide-ranging tool for candidates. It's easy to read and comprehend, and exam topics are grouped in the index to make for easy reference and further study.

CSA Scenarios for the MRCGP, Fourth Edition John Wiley & Sons

The Clinical Skills Assessment (CSA) of the new Membership of the Royal College of General Practice (nMRCGP) examinations can be a daunting test: candidates face assessment on an unknown situation by a 'patient' and assessor, however, help is at hand. This book has been written by a CSA examiner in concert with GP training programme members to help candidates approach the exam feeling prepared, calm and in control. It includes advice on preparation, consultation skills, how the assessment is marked, and 12 practice CSA cases, along with advice on how candidates can create cases with which to practise and assess each other. Clear, practical, and based on sound knowledge and proven techniques, this book will be essential reading for nMRCGP CSA candidates. 'Rhona is a passionate and compassionate educator with a strong sense of natural justice, and also a long-standing MRCGP examiner. She has developed an approach to understanding and preparing for the Clinical Skills

Assessment (CSA) that is already tried, tested and proven. An approach that will enhance the candidate's ability as a GP at the same time as preparing them for the CSA.' - Simon Gregory in his Foreword

NOTES FOR THE MRCGP

Cambridge University Press
Clinical OSCEs (Objective Structured Clinical Examinations) in specialty subjects are hard to prepare for, and this is the first book to address this need. This book covers the key medical specialties and the key topics of Patient Discharge and Communications Skills. End-of-OSCE station case summaries provide examples of what students are expected to present under exam conditions.

Clinical frameworks for the MRCGP CSA exam Royal College of General Practitioners

Closely aligned to the GP curriculum and reflecting the latest format for the RCGP Membership exams, this book offers revision for the Clinical Skills Assessment (CSA) exam, which forms part of the compulsory MRCGP. Contains four practice exam 'circuits' - one of which is completely new. Each practice exam 'circuit' reflects the curriculum domains that candidates will encounter in the real CSA exam. Mirroring the CSA exam, each 'circuit' includes 13 commonly-encountered clinical consultation cases, plus a 'bonus case', offering additional preparation. Each case includes case notes, brainstorm areas, candidate and role-player instructions, and tips on what to look out for in the exam. Features unique input from Dr Peter Havelock, international consultation expert and creator of the GP Consultation model, upon which the GP curriculum is based. With editorial contribution from a successful CSA candidate, grounding the book in reality.
