“Certain to
become a new
classic of
adventure
beyond time .
. . . An
unofficial
sequel to Sir
Arthur Conan
Doyle’s *The
Lost World*”
(Prehistoric

Pulp). Fifty years after Professor Challenger's discovery of the Lost World, America's last dinosaur circus has gone bankrupt, leaving a dozen avisaurs, centrosaurs, ankylosaurs, and one large raptor abandoned. Now a daring expedition plans to do the impossible: return the Jurassic giants to the wild. Two filmmakers, a circus trainer, a journalist,

and a young Peter Belzoni must find a way to take the dinosaurs across oceans, continents, rivers, jungles, up a mountain that has been isolated for seventy thousand years . . . Then, if they make it, all they will do is face the prehistoric wonders, dangers, and terrors of the Lost World. *& Eternity* Open Road Media Sci-Fi & Fantasy Hailed by readers and critics alike, *The Venging* has been

described as an "excellent collection" and its author praised as "one of the freshest writers to break into the science fiction field in many a year." This is the first published collection of short stories by one of the foremost voices in science fiction today. This significant volume contains many characters and situations that later evolved into their own novels. "Mandala" features

technologically perfect cities that eject their sinful human occupants, a premise that can be found at the root of Bear's later novel, *Strength of Stones*. In "Hardfought," Bear brilliantly handles the classic science fiction dilemma of human communication with aliens. Other stories include "The Wind From a Burning Woman" in which a woman holds the world hostage by controlling a

giant asteroid; "Scattershot," in which the inhabitants of many universes meet in an undefined limbo space; and the Nebula Award finalist "Petra," a story of a world where chaos rules, stone moves, and the mind controls reality.

INSIDE THE PHYSICS OF ETERNITY

First Edition Design Pub. Greg Bear's beloved SF classic, *Legacy*, now available for the first time

in trade paperback. *The Way* is a tunnel through space and time. The entrance is through the hollow asteroid *Thistledown* and the space station *Axis City* that sits at the asteroid's center. From there the *Flawships* ride the center of the *Way*, traveling to other worlds and times. Now the rulers of *Axis City* have discovered that a huge group of colonists has secretly

entered one of the interdicted worlds along the Way. In some ways Lamarkia is very Earth-like-but its biology is extraordinary. A single genetic entity can take many forms, and span a continent. There are only a few of these "ecos" on Lamarkia, and the effect of human interaction on them is unknown. Olmy Ap Sennon has been sent to secretly assess the extent of the damage. But

he will find far more than an intriguing alien biology-for on their new world the secret colonists have returned to the old ways of human history: war, famine, and ecological disaster. On this mission, Olmy will learn about the basics: love, responsibility, and even failure... *The Venging* Open Road Media In this near-future thriller, three FBI agents take on the Talos Corporation

and its plan to destroy the government and constitutional law by means of a treatment program code-named Mariposa.

Macmillan
 "A minor classic. A small book but with big characters . . . and great ideas" from the Hugo and Nebula Award-winning author of *Dinosaur Summer* (SF Reviews). The planet Hegira is the universe's melting pot. Hundreds of tribes in

dozens of cities intermingle in the vast uncharted territory. The only thing holding the people together are the massive Obelisks, the chronicles of all the truths and falsehoods each tribe has brought to Hegira. Young Bar-Woten is in search of knowledge and he knows the key to the truth about his homeland is contained in the writings of the Obelisks. With his fellow companions, Bar-Woten

must travel through Hegira's exotic cities to discover the lies within the words of thousands. Legacy Open Road Media The 21st century was on the brink of nuclear confrontation when the 300 kilometer-long stone flashed out of nothingness and into Earth's orbit. NASA, NATO, and the UN sent explorers to the asteroid's surface...and discovered marvels and mysteries to drive

researchers mad. For the Stone was from space--but perhaps not "our" space; it came from the future--but perhaps not "our" future; and within the hollowed asteroid was Thistledown. The remains of a vanished civilization. A "human"--English, Russian, and Chinese-speaking--civilization. Seven vast chambers containing forests, lakes, rivers, hanging cities... And museums

describing the Death; the catastrophic war that was about to occur; the horror and the long winter that would follow. But while scientists and politicians bickered about how to use the information to stop the Death, the Stone yielded a secret that made even Earth's survival pale into insignificance.

Eternity

Macmillan
From a New York Times–bestselling author: A

new kind of phone awakens the dead in this technological horror novel “reminiscent of Koontz at his best” (Booklist). Ever since his life was shattered by the kidnapping and murder of his young daughter, Peter Russell has become a ghost of a man. Once a successful director of adult films, he has been reduced to running questionable errands for an eccentric California

millionaire. But everything changes when a Los Angeles start-up offers him the opportunity to create promotional videos for their revolutionary new technology, Trans. The product offers exceptionally powerful, crystal-clear mobile communication that can operate anywhere and everywhere—and Peter sets out to put it into every palm. But as he uses the device himself, he

starts to see
his murdered
little girl . . .
Soon, there
are other
voices—disem-
bodied,
confused,
angry—emana-
ting from a
newly invaded
dimension.
Many are even
malevolent . .
. . and hungry .
. . and deadly.
As the death
toll of Trans-
users
skyrockets,
Peter’s life
begins a new
spiral
downward.
Now, he must
race to make
sense of the
horror Trans
has wrought
before the
gateway to
Hell bursts

wide open.
With Dead
Lines, author
of the Eon
series Greg
Bear

The hidden
brain is the
voice in our

ear when we
make the
most
important
decisions in
our lives—but
we’re never
aware of it.
The hidden
brain decides
whom we fall
in love with
and whom we
hate. It tells
us to vote for
the white
candidate and
convict the
dark-skinned
defendant, to
hire the thin
woman but
pay her less
than the man
doing the
same job. It
can direct us
to safety when
disaster
strikes and
move us to
extraordinary

acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive

impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed. **Dinosaur Summer** Pan Macmillan Bright Green Future chronicles a renaissance at the edge of a crisis. As climate

change shifts our planet towards an uncertain future, a movement of unlikely heroes are building a blueprint for a better world. It's a world where clean power grows wealth for local communities, resources regenerate themselves, city planning is driven by the people, and healthy soil is our greatest asset. These changemakers have opened a gateway for ordinary people to

begin
 imagining and
 building the
 bright future
 we deserve.

 to do it right.
 Read it."

SONGS OF EARTH AND POWER

Open Road
 Media
 The New York
 Times--bestsell
 ing author of
 Eon continues
 the interstellar
 saga of the
 Way. A
 devastating
 war has left
 Earth a
 nuclear
 wasteland.

Orbiting the planet is the asteroid-starship containing the civilization of Thistledown, humanity's future descendants. For decades, they have worked to heal their world and its survivors, but their resources are finite. They need to reopen the Way. An interdimensional gateway to a multiverse of realities, the Way was severed from Thistledown to stop an alien invasion and now exists as

its own universe. Reopening the gate would not only benefit Earth but would also help the asteroid's residents return home. But on the alternate world of Gaia, Rhita Vaskayza, daughter of mathematician Patricia Vasquez, has taken up her mother's cause to find her own Earth, one that was never touched by nuclear war. There is a gateway on Gaia that could lead Rhita

there—or unleash an even greater apocalypse across the multiverse . . . “Whether he’s tinkering with human genetic material or prying apart planets, Bear goes about the task with intelligence and a powerful imagination. Eternity offers many delights” (Locus). [Hull Zero](#) [Three Open Road Media](#) This saga of parallel universes from a Hugo and Nebula Award-winnin

g author “may be the best constructed hard SF epic yet” (The Washington Post). One of the world’s preeminent New York Times–bestselling authors of hard science fiction mesmerizes readers with a mind-expanding, three-volume masterwork about the creation of an alternate universe that breaks down all barriers of time and space, and its consequences for future and past generations.

Legacy: In the stunning prequel to *Eon* and *Eternity*, an agent of the masters of the Way—a man-made tunnel through countless dimensions—follows a renegade fanatic and his four thousand acolytes to a remarkable world of flora/fauna hybrids, where he is plunged into the terrible chaos of a raging civil war. *Eon*: As nuclear tensions rapidly reach a breaking point in a volatile

twenty-first century, a hollowed-out asteroid appears, mysteriously hovering above the Earth’s surface. The asteroid contains the remains of *Thistledown*, an abandoned city that was once home to survivors of a nuclear holocaust. Scientists must race to unravel its secrets before the human race is annihilated in the impending apocalypse. *Eternity*: A devastating war has left

Earth a nuclear wasteland. Orbiting the planet is an asteroid-starship containing the civilization of Thistledown, humanity's future descendants. For decades, they have worked to heal their world and its survivors, but their resources are finite. They need to reopen the Way, a gate that would not only benefit Earth but also help the asteroid's residents return home.

Greg Bear's classic Eon trilogy is an astonishing feat of the imagination that combines humanism, cutting-edge science, and brilliant extrapolation. This masterful science fiction saga has no equal in contemporary speculative fiction. The Forge of God Open Road Media "Pollan keeps you turning the pages . . . cleareyed and assured." —New York Times A #1 New York Times Bestseller,

New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in

magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with

the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about

these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory

journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do

our best to be fully present and find meaning in our lives.

What the New Science of Psychedelics Teaches Us About Consciousness, Dying, Addiction, Depression, and Transcendence

ReadHowYouWant.com
Isaac Asimov's renowned Foundation Trilogy pioneered many of the familiar themes of modern science fiction and shaped many of its

best writers. With the permission and blessing of the Asimov estate, the epic saga left unfinished by the Grand Master himself now continues with this second masterful volume. With Hari Seldon on trial for treason, the Galactic Empire's long-anticipated migration to Star's End is about to begin. But the mission's brilliant robot leader, R. Daneel Olivaw, has discovered a potential

enemy far deadlier--and closer--than he ever imagined. One of his own kind. A freak accident erases the basic commandments in humaniform robot Lodovik Trema's positronic brain. Now Lodovic's service to humankind is no longer bound by destiny, but by will. To ensure his loyalty, Daneel has Lodovic secretly reprogrammed. But can he be trusted?

Now, other robots are beginning to question their mission--and Daneel's strategy. And stirrings of rebellion, too, are infecting their human counterparts. Among them is a young woman with awesome psychic abilities, a reluctant leader with the power to join man and robot in a quest for common freedom.or mutual destruction. The Foundation Saga Continues

Read Gregory Benford's Foundation's Fear, the first novel in this bold new series and Secret Foundation, the concluding volume from David Brin. *Hardfought* Random House Nebula Award Finalist: A genetic engineering breakthrough may portend the destruction of humanity in this cyberpunk novel by the author of The Forge of God. This Hugo and Nebula Award finalist follows present-day

events in which the fears concerning the nuclear annihilation of the world subsided after the Cold War and the fear of chemical warfare spilled over into the empty void it left behind. An amazing breakthrough in genetic engineering made by Vergil Ulam is considered too dangerous for further research, but rather than destroy his work, he injects himself with his creation and walks out of

his lab, unaware of just how his actions will change the world. Author Greg Bear's treatment of the traditional tale of scientific hubris is both suspenseful and a compelling portrait of a new intelligence emerging amongst us, irrevocably changing our world.

CITY AT THE END OF TIME

Tor Books
A quarter century after humanity quarantines

the aliens known as Moties within the confines of their own solar system, the single wall between them and the galaxy beyond begins to crumble. Reprint.

How to Change Your Mind

Macmillan
Artificially intelligent cities rise up against humanity in this "excellent novel. It came on me as a surprise, and it knocked me out!" (Harlan Ellison). In a theocratic world far into the future,

cities control their own movements and organization. Constantly moving, growing and decaying, taking care of every need their inhabitants might think of, the cities have decided that humans are no longer a necessary part of their architecture, casting them out to wander in the wilderness and eke out a meager subsistence. To the exiled humans, the cities represent a

paradisiacal Eden, a reminder of all they cannot attain due to their sinful and unworthy natures. But things are beginning to change. People are no longer willing to allow the cities to keep them out, choosing instead to force an entry and plunder at will. The cities are starting to crumble and die because they have no purpose or reason to continue living without citizens. One woman, called mad by some

and wise by others, is the only human allowed to inhabit a city. From her lonely and precarious position at the heart of one of the greatest cities ever, she must decide the fate of the relationship between human society and the ancient strongholds of knowledge, while making one last desperate attempt to save the living cities.

DARWIN'S RADIO

Del Rey

In this prequel to EON, Greg Bear continues to explore the possibilities presented by the asteroid Thistledown, a remnant of a lost human civilization. The Way is a tunnel through space and time that leads to other worlds, some more like planet Earth than Earth itself. It is perhaps the most formidable discovery in Thistledown and with it come disputes as to the nature of the Way and how

it should be used. The Way can be reached only through Axis City, the only space station of Thistledown. The ruling body of Axis City, the Hexamon, has decreed that other worlds reached by The Way must be left untouched as an insurance against future needs of the human race. But then the Hexamon hear of a group of clandestine colonists who have settled on one of the new worlds. Olmy Ap

Sennon is an eager young career soldier who must go and investigate this illegal colony, and at the same time confront his own humanity. As he witnesses the hardship and beauty of the outlaw human colony, he learns what it means to struggle with war, ecological disaster, love, and death. Quasar: Cosmos In Collision Baen Publishing Enterprises A Nebula Award-winning novella by

the author of Moving Mars and the Eon trilogy. Humans have been engaged in a long war against an advanced alien race, the Senexi. But	the possibility for peace may finally exist, thanks to a young girl who learns of the enemy's larger role and humanity's opportunity to evolve, in this	award-winning story by the author of Darwin's Radio and many other highly acclaimed works of science fiction.
