The Routledge Handbook of Health Communication brings together the current body of scholarly work in health communication. With its expansive scope, it offers an introduction for those new to this area, summarizes work for those already learned in the area, and suggests avenues for future research on the relationships between communicative processes and health/health care delivery. This second edition of the Handbook has been organized to reflect the goals of health communication: understanding to make informed decisions and to promote formal and informal systems of care linked to health and well-being. It emphasizes work in such areas as barriers to disclosure in family conversations and medical interactions, access to popular media and advertising, and individual searches online for information and support to guide decisions and behaviors with health consequences. This edition also adds an overview of methods used in health communication and the unique challenges facing health communication researchers applying traditional methods to efforts to gain reliable and valid evidence about the role of communication for health. It introduces the promise of translational research being conducted by health communication researchers from multiple disciplines to form transdisciplinary theories and teams to increase the well-being of not only humans but the systems of care within their nations. Arguably the most comprehensive scholarly resource available for study in this area, the Routledge Handbook of Health Communication serves an invaluable role and reference for students, researchers, and scholars doing work in health communication.

THE HANDBOOK OF COMMUNICATION SKILLS

John Hunt Publishing

Designed as a handbook, this text provides media, speech (public speaking, interpersonal, small group, and organizational communication), and theatre educators with both the theoretical and practical ammunition to fight the assessment battles on their campuses. The philosophical implications of accountability are balanced with concrete, specific, and usable assessment strategies. Stressing student, faculty, course, program, department, and institutional assessment, this book's aim is to provide, in one place, information that will help diverse and complex communication programs face the growing challenges in assessment. The book is divided into

three sections: background and foundational information for assessment; broad assessment strategies that apply to a variety of media, "speech," and theatre courses and programs; and context-specific assessment strategies. While covering a host of topics, it: * provides an overview of assessment and suggests how it might impact communication education, * discusses the elements of program assessment and how linkage of mission statements with outcomes can lead to strong, innovative programs, * compares and contrasts regional association requirements and presents a specific how-to strategy for writing outcome statements, * discusses teaching evaluation and argues that we need to identify the "what" of teaching before we try to measure the "how," * looks at creative ways for formative and summative course evaluation that starts with the creation of an explicit syllabus, * discusses the use of capstone courses as a way of evaluating not only their major but also how students have integrated their "total" educational experience, * suggests the variety of ways that interpersonal communication can be assessed and calls for future research that stresses the "knowledge" component of learning, * reports on a strategy for developing small group communication assessment measures, and * provides media, speech, and theatre faculty and administrators with the background, understanding and tools to build stonger programs and develop better courses and educational experiences for their students.
