Get the accurate, practical information you need to succeed in the classroom, the clinical setting, and on the NCLEX-RN® examination. Written by the foremost experts in maternity and pediatric nursing, the user-friendly

Maternal Child Nursing Care, 6th Edition provides both instructors and students with just the right amount of maternity and pediatric content. This new edition includes updated case studies within Nursing Care Plans, as well as a new chapter on pediatric cancer. Focus on the family throughout emphasizes the influence of the entire family in health and illness. Focus on the family

throughout emphasizes the influence of the entire family in health and illness. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Critical thinking case studies offer you opportunities to test and develop your analytical skills and

apply knowledge in various settings. Nursing Care Plans include rationales for interventions and provide you with an overview and specific guidelines for delivering effective nursing care. Nursing Alerts highlight critical information that you need to know when treating patients. Guidelines boxes outline nursing procedures in an easy-to-follow format. Emergency boxes in the

maternity unit guide you through step-by-step emergency procedures. Home Care boxes detail important information that you need to deliver care to patients and families in the home setting. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress.

Community Focus boxes emphasize community issues, provide resources and guidance, and illustrate nursing care in a variety of settings. Patient Teaching boxes in the maternity unit highlight important information nurses need to communicate to patients and families. Cultural Competence boxes equip you with the knowledge you need to deliver culturally

competent care.\ Family-Centered Care boxes draw attention to the needs or concerns of families that you should consider to provide family-centered care. Medication Guides serve as an important reference of drugs and their interactions.

Lippincott Williams & Wilkins
America's nurses, an estimated 2

million strong, are often at the frontlines in confronting environmental health hazards. Yet most nurses have not received adequate training to manage these hazards. Nursing, Health, and the Environment explores the effects that environmental hazards (including those in the workplace) have on the health of patients and communities and proposes specific strategies for

preparing nurses to address them. The committee documents the magnitude of environmental hazards and discusses the importance of the relationship between nursing, health, and the environment from three broad perspectives Practice--The authors address environmental health issues in the nursing process, potential controversies over nurses

taking a more activist stance on environmental health issues, and more. Education--The volume presents the status of environmental health content in nursing curricula and credentialing, and specific strategies for incorporating more environmental health into nursing preparation. Research--The book includes a survey of the available knowledge base and options for expanding nursing

research as it relates to environmental health hazards.

for new antepartum and postpartum nurses and their preceptors during the orientation period. Presented in the convenient, easy-to-use Fast Facts format, the book provides up-to-date information regarding care for both low- and high-risk antepartum and postpartum patients. It encompasses evidence-based practice guidelines and clinical recommendati

ons for routine antepartum assessment and nursing care, care of women with pre-existing conditions prior to pregnancy or complications of pregnancy, routine postpartum assessment and care, postpartum complications, and care of special populations. Each chapter features a helpful orientation guide to acquaint the new orientee with essential information on procedures and policies,

equipment, medications, and evidence-based protocols. Chapters are organized systematically to include assessment and management guidelines, health promotion and teaching recommendations, routine laboratory and ultrasound tests, and holistic evidence-based nursing care practices. A separate section addresses special populations and outlines care

components specific to these women and their families. They include culturally diverse families, women on each end of the age spectrum, women with fetuses or newborns diagnosed with adverse outcomes, women who have a history of being victimized, and those with deployed partners. While targeted to hospital-based nurses and new nurses in hospital

orientation and their preceptors, it is also a helpful resource for nurses who practice in a great variety of related settings, as well as nurse midwifery students. Appendices include a skills checklist, a list of commonly used medications, abbreviations, and lab values. Key Features: Covers all aspects of safe, evidence-based, holistic care for birthing mothers,

newborns and their families. Written for nurses in orientation and their preceptors as well as nurses working with mothers and newborns in any practice setting. Provides key information demonstrating the impact of newborn status on assessing, planning, and implementing care. Includes an orientation guide to acquaint new orientees with essential information on procedures, policies, equipment,

medications, and evidence-based protocols
Addresses specific care components needed for special populations
The Critical Components of Nursing Care Pearson
OB Peds Women's Health Notes
provides quick access to key clinical information for the nurse or nursing student caring for obstetric, gynecological, and pediatric clients. You'll find comprehensive coverage of women's

health as well as child health topics from birth through adolescence. <p>Critical Care Obstetrics, 4th Edition, an official publication of the Association of Women’s Health, Obstetric & Neonatal Nurses (AWHONN). This comprehensiv e analysis of critical care obstetrics concepts offers summary of research findings and top-notch clinical expertise. This is the expert guidance you need to navigate complex patient</p>	<p>conditions and promote safe, effective perinatal care. <u>OB/GYN Nurse Practitioner F</u> A Davis Company Designed to be used by the student together with the sixth edition of Maternal and child health nursing by Adele Pillitteri. Telephone Triage for Obstetrics and Gynecology F A Davis Company Here’s the essential clinical information you need to care for obstetric,</p>	<p>gynecological, newborn, and pediatric patients in any setting. The 3rd Edition of this popular pocket guide has been thoroughly revised and updated to reflect nursing practice today. <u>OB/GYN Peds Notes</u> Elsevier Health Sciences The delivery of high quality and equitable care for both mothers and newborns is complex and requires efforts across many sectors. The United States spends</p>
--	---	---

more on childbirth than any other country in the world, yet outcomes are worse than other high-resource countries, and even worse for Black and Native American women. There are a variety of factors that influence childbirth, including social determinants such as income, educational levels, access to care, financing, transportation, structural racism and geographic

variability in birth settings. It is important to reevaluate the United States' approach to maternal and newborn care through the lens of these factors across multiple disciplines. Birth Settings in America: Outcomes, Quality, Access, and Choice reviews and evaluates maternal and newborn care in the United States, the epidemiology of social and clinical risks in pregnancy and childbirth, birth settings

research, and access to and choice of birth settings.
