A NOVEL

North Carolina Bar Foundatio

This ground-breaking resource focuses on primary and secondary prevention, guiding pediatric care clinicians in incorporating mental health screening and surveillance into well child visits and provides evidence-based interventions to care for children and adolescents with mental health issues. Gain in-depth guidance on the care of special populations of children who may be at increased risk for mental health problems: those exposed to adverse childhood experiences; children in military families; lesbian, gay and bisexual youth; children with gender expression and identity issues; children affected by racism; adolescents who are pregnant or parenting, and much more. TOPICS INCLUDE Promoting healthy child development Children exposed to adverse childhood experiences Caring for families new to the United States Violence prevention Healthy sleep, weight, use of media, and active living Children in foster or kinship care or involved with child welfare Children of divorce Adopted children Children with chronic medical conditions And more...

A TOOL FOR IMPROVING QUESTIONNAIRE DESIGN

John Wiley & Sons

On a hot August night in 1944, a soldier's body was discovered hanging by a rope from a cable spanning an obstacle course at Seattle's Fort Lawton. The body was identified as Private Guglielmo Olivotto, one of the thousands of Italian prisoners of war captured and brought to America. The murder stunned the nation and the international community. Under pressure to respond quickly, the War Department convened a criminal trial at the fort, charging three African American soldiers with the lynching and first-degree murder of Private Olivotto. Forty other soldiers were charged with rioting, accused of storming the Italian barracks on the night of the murder. All forty-three soldiers were black. There was no evidence implicating any of these men. Leon Jaworski, later the lead prosecutor at the Watergate trial, was appointed to prosecute the case and seek the death penalty for three men who were most assuredly innocent. Through his access to previously classified documents and the information gained from extensive interviews, journalist Jack Hamann tells the whole story behind World War II's largest army court-martial—a story that raises important questions about how justice is carried out when a country is at war.

Willis's Elements of Quantity Surveying Routledge

How is history lived "in person"—in everyday, subjectively experienced events and practices? How does it shape the identities of individual people? The ten essays in this book explore these questions within a framework of conflict or "struggle,"

demonstrating how subjects' intimate self-making is related to their participation in what the authors call "contentious local practice."

THE CARE OF BOOKS

Wiley-Blackwell

Process Implementation Through 5S: Laying the Foundation for Lean explains how to implement standardized work and visual controls through Plan-Do-Check-Adjust (PDCA). The author uses PDCA to outline the book and explains how 5S (Sort, Straighten, Shine, Standardize, and Sustain) and Standardization are not only foundational parts of the PDCA for your Lean transformation, but are actually PDCA processes within themselves. The book provides a road map to implement new processes. In addition, it shows how this same implementation process can be used to shore up existing processes and improve upon them. Once you walk through this process with your team, you not only will have laid the foundation for Lean in your organization, but will have laid the foundation for PDCA and for building an army of problem solvers. This transformation is what ultimately will add value to your customer base and drive the business results you are looking for. These Lean tools are not an end to a means, but rather a means to an end. The purpose is not to implement these tools, check off the box, and then move on to the next area. Rather, they are tools designed to engage your team and help your team see problems, which you then can solve. This is the continuous improvement culture most organizations and Lean leaders seek.

PRIMARY CARE PRACTICE AND ADVOCACY

Columbia University Press

"This book comprehensively compares Georgia's new evidence code with the corresponding federal evidence rule and prior Georgia evidence law, providing detailed commentary for those new Georgia rules with federal correspondents. It takes the reader through statutory provisions in the new code from OCGA 24-1-1 through 24-10-1008. Carlson on Evidence is presented in a user friendly format, with new Georgia evidence statutes placed at the top of every page of analysis for easy access in the courtroom or office. Each rule section contains the number and text of the new Georgia evidence provisions, a summary of 2013 changes, comparison with the Federal Rules of Evidence, and federal and Georgia case law"--Publisher's website. *Passage* Macmillan International Higher Education Civil Procedure examines the fundamental principles and concepts of this area of law. Written by a lecturer with many years experience as a practising lawyer, this book aims to provide an accessible yet comprehensive text for Australian students. Civil Procedure analyses many relevant cases and legislation and systematically discusses and clarifies the complexities within this discipline. It also highlights the Court hierarchy and legislative frameworks for all Australian States and Territories. Part A introduces civil procedure and covers the chronological progress

of civil litigation from precursors to litigation right through to judgment and appeals. It includes explanations of case management, commencing proceedings, pleading, documentary processes, privilege, preparation of witness evidence and trial itself./div Part B covers special topics in civil procedure and concepts which arise throughout litigation. It explains interactions with the court, summary disposition, legal costs, settlement, alternative dispute resolution and specialist courts and tribunals. An excellent resource for law students, Civil Procedure provides visual summaries in the form of flow charts, and each chapter includes key concepts and end-of-chapter discussion questions, further reading and useful websites and links. It also introduces students to key examinable areas, legal style essays, problems and assessment.

Cost Studies of Buildings Grafton Books

Essays on great figures and important issues, advances and blind alleys—from trepanation to the discovery of grandmother cells—in the history of brain sciences. Neuroscientist Charles Gross has been interested in the history of his field since his days as an undergraduate. A Hole in the Head is the second collection of essays in which he illuminates the study of the brain with fascinating episodes from the past. This volume's tales range from the history of trepanation (drilling a hole in the skull) to neurosurgery as painted by Hieronymus Bosch to the discovery that bats navigate using echolocation. The emphasis is on blind alleys and errors as well as triumphs and discoveries, with ancient practices connected to recent developments and controversies. Gross first reaches back into the beginnings of neuroscience, then takes up the interaction of art and neuroscience, exploring, among other things, Rembrandt's "Anatomy Lesson" paintings, and finally, examines discoveries by scientists whose work was scorned in their own time but proven correct in later eras.

New Aspects of Quantity Surveying Practice Library of Alexandria Claims the rebellion of poor and working class children against school authority prepares them for working class jobs.

Interpretive and Critical Approaches Elsevier

Willis's Elements of Quantity Surveying has become a standard text in the teaching of building measurement - a core part of the degree curriculum for quantity surveyors. The book will be fully updated to follow the guidance given by RICS NRM 1 & 2. As in previous editions the focus remains a logical approach the detailed measurement of building elements and copious use of examples to guide the student. The text has been fully revised in line with the NRM guidance and includes many new and revised examples illustrating the use of NRM. The hallmarks of previous editions - clarity and practicality - are maintained, while ensuring the book is fully up to date, providing the student of quantity surveying with a first class introduction to the measurement of building elements.

PILE DESIGN AND CONSTRUCTION PRACTICE

Oxford University Press on Demand

No construction profession has faced as many changes as that of the quantity surveyor, nor has it had as many new opportunities. The new edition of this classic text on professional practice, first published 30 years ago, has been substantially revised and reorganised to reflect these developments, with new material on project management, legal developments, computer applications, the QS's role with a contractor's firm and new services for clients [A Hole in the Head](#) SAGE

This authoritative text provides a detailed insight into how construction companies manage their finances at both corporate and project level. It will guide students and practitioners through the complexities of the financial reporting of construction projects within the constraints of accepted accounting practice. The book is written for non-accountants and from a contractor's perspective and is equally relevant to subcontractors and main contractors. The authors examine the relationship between the external annual accounts and the internal cost-value reconciliation process. CVR is covered in depth and the authors consider issues such as interim payments, subcontract accounts, contractual claims, final accounts, cash flow management and the reporting of the physical and financial progress of contracts. A broad perspective of all the financial aspects of contracting is taken along with related legal issues and the authors explain how things operate in the 'real world'. They describe good practice in financial control while at the same time being honest about some of the more questionable practices that can - and do - happen. The approach taken is unique as the financial management of construction projects is considered from the perspective of the contractor's quantity surveyor. The book deals with the real issues that surveyors have to address when using their judgment to report turnover, profitability, cash flow, and work in progress on projects and the financial problems faced by subcontractors are frankly and pragmatically explored. The payment and notice requirements of the Construction Act are explained in detail and relevant provisions of JCT2011, NEC3, ICC, DOM/1 and other standard contracts and subcontracts are also covered. Financial Management in Construction Contracting addresses the wide variety of external factors that influence how construction companies operate, including government policy, banking covenants and the financial aspects of supply chain management. Cost reporting systems are described and real-life examples are used to illustrate cost reports, accrual systems and how computerised systems can be employed to provide the QS with information that can be audited. Examples drawn from practice demonstrate how work-in-progress (WIP) is reported in contracting. Cost value reconciliation reports are featured and the book demonstrates how adjustments are made for overmeasure, undermeasure, subcontract liabilities and WIP as well as explaining the processes that contractors use when analysing external valuations. This is the ideal core text for final year degree and post-graduate level modules on Quantity Surveying, Commercial Management, Construction Management and Project Management courses and will provide an invaluable source of reference for quantity surveyors and others who may be engaged in the financial management of construction projects. The book's companion website at <http://www.wiley.com/go/xxxx> www.wiley.com/go/rossfinancialmanagement/a offers invaluable resources for students and lecturers as well as for practising construction managers: end-of-chapter exercises + outline answers PowerPoint slides for each chapter ideas for discussion topics links to useful websites

THEORY AND PRACTICE OF THE CONTINGENT VALUATION METHOD IN THE US, EU, AND DEVELOPING COUNTRIES

CRC Press

Wills' Mineral Processing Technology provides practising engineers and students of mineral processing, metallurgy and mining with a review of all of the common ore-processing techniques utilized in modern processing installations. Now in its Seventh Edition, this renowned book is a standard reference for the mineral processing industry. Chapters deal with each of the major processing techniques, and coverage includes the latest technical developments in the processing of increasingly complex refractory ores, new equipment and process routes. This new edition has been prepared by the prestigious J K Minerals Research Centre of Australia, which contributes its world-class expertise and ensures that this will continue to be the book of choice for professionals and students in this field. This latest edition highlights the developments and the challenges facing the mineral processor, particularly with regard to the environmental problems posed in improving the efficiency of the existing processes and also in dealing with the waste created. The work is fully indexed and referenced. · The classic mineral processing text, revised and updated by a prestigious new team · Provides a clear exposition of the principles and practice of mineral processing, with examples taken from practice · Covers the latest technological developments and highlights the challenges facing the mineral processor · New sections on environmental problems, improving the efficiency of existing processes and dealing with waste.

[How Justice Became a Casualty of World War II](#) Cambridge : University Press

It is common to conduct cognitive testing to evaluate survey questionnaires, but analysis procedures have not been well described. Dr. Willis describes alternative models of coding, analysis, and reporting, to enable researchers to convert cognitive-interview data into meaningful, well-supported, and actionable findings and summary reports.

AN ESSAY ON THE DEVELOPMENT OF LIBRARIES AND THEIR FITTINGS, FROM THE EARLIEST TIMES TO THE END OF THE EIGHTEENTH CENTURY

SAGE Publications

This international handbook is essential for geotechnical engineers and engineering geologists responsible for designing and constructing piled foundations. It explains general principles and practice and details current types of pile, piling equipment and methods. It includes calculations of the resistance of piles to compressive loads, pile group

[A Guide to Diagnosis and Management](#) Wiley-Blackwell

More than that of any other construction professional, the role of the quantity surveyor is a rapidly changing one. Fewer quantity surveyors now work in the public sector and nationalised industries, and more are employed in building and civil engineering companies. New forms of procurement and construction arrangements, the impact of information technology, and growing client demand for the management of construction projects throughout their life cycle have meant that quantity surveyors have had to acquire new skills. Indeed, many working in the field no longer call themselves 'quantity surveyors' because of their changing role. This Eleventh Edition has been substantially revised and expanded to include new sections on: - the role of the quantity surveyor - whole life costing - value management - risk management - insolvency - facilities management This established text, first published over 50 years ago, remains essential reading for all quantity surveying students

and for those recently qualified.

A New Civil Procedure Wiley-Blackwell

'A delightful volume, with unique style and content. This new edition amply lives up to the authors' aim of demonstrating a mode of CBT practice that incorporates many exciting developments whilst retaining the reassuring strength of the original parsimonious model.' Ann Hackmann, Oxford Mindfulness Centre, University of Oxford 'One of the very best introductions to CBT, now enhanced with excellent coverage of new developments.' Professor Neil Frude, Consultant Clinical Psychologist 'My first choice recommendation for trainee therapists. This outstanding and easy-to-read introduction just got better.' Peter Simpson, Senior Lecturer in Mental Health, University of Glamorgan In their established guide to contemporary CBT theory and practice, the authors show how therapeutic change takes place across a network of cognitive, emotional and behavioural functioning. They explain the central concepts of CBT and illustrate - with numerous case examples - how these can effectively be put into practice at each stage of the therapeutic process. They also explain how the essence of cutting edge 'third wave' can be integrated into everyday clinical practice. With two new chapters on mindfulness and increasing access to CBT, a wider coverage of client issues, extra case studies and learning resources, and a discussion of recent developments, this book continues to be the ideal companion for those working - or training to work - in the psychological therapies and mental health. Frank Wills is an independent Cognitive Psychotherapist in Bristol and tutor at the University of Wales Newport. Diana Sanders, Counselling Psychologist and BABCP Accredited Cognitive Psychotherapist in Independent Practice, Oxford.

[Alternative Dispute Resolution in North Carolina](#) Wiley-Blackwell

This book provides a detailed guide to the principles and practice of construction contracts. It is written for both students and professionals working in all branches of surveying and construction. Based around the JCT 05 Standard Building Contracts, it has been fully revised and updated to reflect the latest versions of these contracts. The book sets out clearly what should be done at each stage of the construction contract process. Each step is illustrated with examples of good practice making clear the role and responsibilities of the surveyor and how responsibilities are best delivered. This fourth edition of Contract Practice for Surveyors builds on the book's reputation for clarity and simplicity to provide the most accessible and useful introductory guide to construction contracts available today.

Generic Edition John Wiley & Sons

This practical guide to cost studies of buildings has been updated and revised throughout for the 5th edition. New chapters have been added on the RICS New Rules of Measurement (NRM) for order of cost estimating and elemental cost planning, and on the procurement of construction projects.

WILLIS'S PRACTICE AND PROCEDURE FOR THE QUANTITY SURVEYOR

John Wiley & Sons

The questionnaire-based Contingent Valuation Method (CVM) asks people what would they be willing to pay for an environmental good or attribute, or willing to accept for its loss. These papers consider the real value of such surveys.

Advanced Quantity Surveying Routledge

Davidson Don Tengo Jabavu was a South African educator and politician, and a founder of the All African Convention (AAC), which sought to unite all non-European opposition to the segregationist measure of the South African government.
