Michael Polanyi's Postmodern Philosophy Bloomsbury Publishing

A comparative philosophical consideration of the extremes of humanism, or "Titanism," this book critiques trends in Eastern and Western philosophy and examines solutions to them. This work in comparative philosophy uses the concept of Titanism to critique certain trends in both Eastern and Western philosophy. Titanism is an extreme form of humanism in which human beings take on divine attributes and prerogatives. The author finds the most explicit forms of spiritual Titanism in the Jaina, Samkhya, and Yoga traditions, where yogis claim powers and knowledge that in the West are only attributed to God. These philosophies are also radically dualistic, and liberation involves a complete transcendence of the body, society, and nature. Five types of spiritual Titanism are identified; and, in addition to this typology, a heuristic based on Nietzsche's three metamorphoses of camel, lion, and child is offered. The book determines that answers to spiritual Titanism begin not only with the Hindu Goddess religion, but also are found in Buddhism, Confucianism, and Daoism, especially Zen Buddhism and Confucianism. "The act of cross-cultural comparison, particularly in religious studies, is an art that once flourished but is now routinely challenged from a whole host of technical and specialist fronts. Gier's text, essentially a comprehensive essay of normative comparative philosophy, is especially refreshing in such a world, as it effectively brings together an impressive range of scholarship (Western philosophy and theology, comparative mythology, Jaina, Hindu, Buddhist, Daoist, and Confucian Studies) to create a truly comparative text with a distinct, original, philosophically and religiously important thesis. Gier's category of 'Titanism,' which functions as an ethical critique of mystical religiosities from the standpoint of a constructive postmodern and humanistic standpoint, enables him to accomplish this synthetic and normative feat, and to do it in a way that does not collapse the very real differences between these traditions into a simplistic perennialism or universalism. This is one of the few books that I have read that actually makes sense of what a 'postmodern' perspective is and how it might function. This is no mean accomplishment." -- Jeffrey J. Kripal, author of *Kali's Child: The Mystical and the Erotic in the Life and Teachings of Ramakrishna*

Not a stage comedy, but an exploration of Greek writer Nikos Kazantzakis' (1883-1957) view of God, specifically of his attempt to develop a view superior to the traditional one. Finds that he chose Plato's approach over Aristotle and that though his theism is heterodox and controversial, it is a combination of views that grow out of solidly orthodox concerns and sources. Knowing and Value Greenwood Publishing Group

In presenting Peirce, James, Bergson, Whitehead, and Hartshorne as members of a common and distinctively postmodern trajectory, this book casts the thought of each of them in a new

light. It also suggests a new direction for the philosophical community as a whole, now that the various forms of modern philosophy, and even the deconstructive form of postmodern philosophy, are widely perceived to be dead-ends. This new option offers the possibility that philosophy may recover its role as critic and guide within the more general culture, a recovery that is desperately needed in these perilous times.
