This book is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge colleges as the basis for conditional offers. They are also used by Warwick University, and many other mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. Advanced Problems in Mathematics is recommended as preparation for any undergraduate mathematics course, even for students who do not plan to take the Sixth Term Examination Paper. The questions analysed in this book are all based on recent STEP questions selected to address the syllabus for Papers I and II, which is the A-level core (i.e. C1 to C4) with a few additions. Each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true

mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anybody interested in advanced mathematics.

My aim is to make it easier to quickly find biblical answers to theological questions that are of perennial importance. I presuppose the inspiration and infallibility of the Bible, and this book is for Christians who accept those notions. This volume provides Bible passages (usually one verse; sometimes a few

together) that are (in my opinion) the very best "answers" to a large number of one-sentence questions. The format might remind one of the popular TV game show "Jeopardy," where the contestants are given a piece of information and have to come up with a question that it is the "answer" to. While compiling it, I looked at Bible passages and devised questions that the passages "answered." The book contains 18 broad categories and 200 numbered subcategories. The marvelous treasures in the Bible await all of us: inspired revelation from the Mind of God.
