OMB No. 6236957804840 edited by

BATES FINN

Ivy Books

This timely third volume of the EDUCAUSE Leadership Strategies series explores the difficult terrain of managing and protecting the storage, flow, and use of electronic data on college and university campuses.

CIO Routledge

Describes the features and functions of Apache Hive, the data infrastructure for Hadoop.

[A Problem Solving Approach](#) McGraw-Hill Education

This book addresses many of the issues facing new and seasoned communication and media administrators. Though there are business-oriented management and leadership books, there is no handbook--to the editor's knowledge--that emphasizes academic administration. This book fills an important gap in the literature by providing--in one place--interesting, important, and useful information that will help administrators by anticipating problems and suggesting strategies for the variety of challenges they face. This scholarly, anecdotal, useful, and very readable volume is conceived as an action handbook that contains philosophical, theoretical, and practical information. It is divided into three sections: background material, programmatic challenges facing administrators, and specific challenges facing administrators. It contains information that both the seasoned administrator and those faculty who are thinking about moving into administration will find useful. Although aimed at the communication and media disciplines, administrators in other fields will also find it valuable. In addition, deans and vice presidents outside the discipline who are responsible for communication and media programs will view the book a "must" read.

Resources in Education U of Minnesota Press

Deanships in the world are often OTJ (On the job training) positions. Prior to this series, there was very little about this specific position and how to be innovative and successful on the job. This book is the second in the series of Management for Deans and includes advanced techniques employed

by deans around the world to manage their boards, planning, donors, and careers. If you've been a dean or are considering this position, the series Management for Deans and Advanced Management for Deans will introduce you to the position and offer you many ideas from experienced deans around the world that can accelerate your success and help you avoid the pitfalls of OTJ.

Discovery Peterson's

This book teaches the reader how to write programs using Java. It does so with a unique approach that combines fundamentals first with objects early. The book transitions smoothly through a carefully selected set of procedural programming fundamentals to object-oriented fundamentals. During this early transition and beyond, the book emphasizes problem solving. For example, Chapter 2 is devoted to algorithm development, Chapter 8 is devoted to program design, and problem-solving sections appear throughout the book. Problem-solving skills are fostered with the help of an interactive, iterative presentation style: Here's the problem. How can we solve it? How can we improve the solution? Some key features include: -A conversational, easy-to-follow writing style. -Many executable code examples that clearly and efficiently illustrate key concepts. -Extensive use of UML class diagrams to specify problem organization. -Simple GUI programming early, in an optional standalone graphics track. -Well-identified alternatives for altering the book's sequence to fit individual needs. -Well-developed projects in six different academic disciplines, with a handy summary. -Detailed customizable PowerPointTM lecture slides, with icon-keyed hidden notes. Student Resources: Links to compiler software - for Sun's Java2 SDK toolkit, Helios's TextPad, Eclipse, NetBeans, and Bluej. TextPad tutorial. Eclipse tutorials. Textbook errata. All textbook example programs and associated resource files. Instructor Resources: Customizable PowerPoint lecture slides with hidden notes. Hidden notes provide comments that supplement the displayed text in the lecture slides. For example, if the displayed text asks a question the hidden notes provide the answer. Exercise solutions. Project solutions. Supplemental Chapters to Accommodate an Objects-Late Approach are available. Click this link to reach the supplemental chapters. ""The authors have done a superb job of organizing the various chapters to allow the

students to enjoy programming in Java from day one. I am deeply impressed with the entire textbook. I would have my students keep this text and use it throughout their academic career as an excellent Java programming source book." - Benjamin B. Nystuen, University of Colorado at Colorado Springs" ""The authors have done a great job in describing the technical aspects of programming. The authors have an immensely readable writing style. I have an extremely favorable impression of Dean and Dean's proposed text." - Shyamal Mitra, University of Texas at Austin" ""The overall impression of the book was that it was "friendly" to read. I think this is a great strength, simply because students reading it, and especially students who are prone to reading to understand, will appreciate this approach rather than the regular hardcore programming mentality." - Andree Jacobson, University of New Mexico"

The History and Future of Arts and Sciences Education McGraw-Hill Education

Get a solid foundation in maternity and pediatric nursing! Written in a clear, concise, friendly style, Introduction to Maternity and Pediatric Nursing, 8th Edition is the complete guide to caring for maternity and pediatric patients. This best-selling text is organized by developmental stages, discussions of pediatric disorders by body system from simple-to-complex and health-to-illness, and includes a focus on family health. This edition also contains newly updated NCLEX® style review questions, new case studies, new content on zika virus, QSEN and safety, and expanded phases of pregnancy. Evidence-based maternal-child content prepares you for the LVN/LPN to achieve higher levels of learning, a goal expressed by the IOM Committee on the Future of Nursing. Over 42 detailed, updated nursing skills introduce you to skills unique to maternity and pediatric care. Over 25 nursing care plans feature seven different formats/themes/styles, including unfolding case studies. The beginning concepts of critical thinking introduces you to this idea as a basis for clinical nursing care. Updated content on the influence of microbiomes on non-invasive pregnancy and newborn nursing care addresses its impact on the adult health of the newborn. Step-by-step application of the nursing process covers the hospital, home, community and use in improving global health. Expanded cultural practices as they relate to pregnancy, delivery and pediatric care in the community. Coverage of the use of expanding new technologies and

computerized medication administration reinforce the nursing process and strengthen problem-solving skills as applied to maternity nursing. NEW! Discussion of new health threats include in-depth coverage of the Zika virus and Influenza NEW! Updated guidelines for hypertension and immunizations for infants and children. NEW! Updated QSEN goals and nursing responsibilities reflect the most recent changes. NEW! Expanded phases of pregnancy includes preconceptional, prenatal, intrapartum, postpartum and interconceptual care and nursing responsibilities. NEW! Updated nursing responsibilities related to global health reflect the "Baby Friendly Hospital" WHO initiative and interprofessional nursing communication related to nursing "hand-off care" and shift change reports. NEW! Updated NCLEX® exam-style review questions have been revised with alternate item formats at the end of each chapter. NEW! Expanded nursing and safety tips throughout include evidence-based online resources which provide pertinent information applicable in the clinical setting that reinforces what you have just learned while building on previously learned information. NEW! Expanded coverage of bioterrorism better reflects trauma related to pregnancy and pediatric care.

"This book is of computer programming. This edition includes new chapters, reorganized chapter sections, new programming constructs, new program examples, and all new exercises and lots of problem-solving practice"--

Network, Influence and Conflict Elsevier Health Sciences

Introduction to Programming with Java: A Problem Solving Approach teaches the reader how to write programs using Java. It does so with a unique approach that combines fundamentals first with objects early. The book transitions smoothly through a carefully selected set of procedural programming fundamentals to object-oriented fundamentals. During this early transition and beyond, the book emphasizes problem solving. For example, Chapter 2 is devoted to algorithm development, Chapter 8 is devoted to program design, and problem-solving sections appear throughout the book. The third edition introduces several new Java language features, most of the end-of-chapter GUI sections and the final GUI chapters use JavaFX, and almost all end-of-chapter exercises are new.

The best-selling international review of the year's most innovative works in visual communication. *Creating music with Chuck* "O'Reilly Media, Inc."

The Resource Handbook for Academic Deans, Third Edition This thoroughly revised volume is written by and for academic administrators. Each chapter explores a particular challenge or issue that has been identified by the American Conference of Academic Deans (ACAD) members as most relevant in their role as academic leaders, then provides practical step-by-step guidance that can help deans navigate even the toughest of situations. "There is no map for thriving as a dean, but this handbook offers an essential guidebook and compass for the journey. Both informed and inspired, it is above all humane in presenting the purpose, practice, and privilege of a dean's good work." —William J. Craft, president, Concordia College "Academic deans, both new and seasoned, will benefit enormously from this collection of ruminations by experienced and successful academic leaders on the issues that are most prominent and often most vexing for those who enter the arena of academic leadership. For newcomers to the deanery, this handbook will be an eye-opener; and for veteran deans, a helpful reminder of both first principles and best practices." —Richard Ekman, president, The Council of Independent Colleges "ACAD meetings and electronic communications are marked by collaboration and by sharing means for encouraging faculty and student success. The handbook exemplifies that spirit of collaboration as members articulate their candid and helpful recommendations for enhancing work with faculty and students." —Scott E. Evenbeck, president, Stella and Charles Guttman Community College "ACAD has created an extraordinary resource for the entire postsecondary community. For new and seasoned deans alike, the ACAD handbook offers a wealth of generous, wise, and practical guidance. Presenting lessons learned both from lived experiences and from organizational scholarship, the handbook will help deans succeed in their myriad essential roles." —Carol Geary Schneider, president,

Association of American Colleges and Universities American Conference of Academic Deans (ACAD) is a nonprofit individual membership organization dedicated to the professional development of academic leaders. ACAD's mission is to assist these leaders as they advance in careers dedicated to the ideals of liberal education.

Peterson's Graduate Programs in Business, Education, Information Studies, Law & Social Work 2014 contains comprehensive profiles of more than 11,000 graduate programs in disciplines such as, accounting & finance, business administration & management, education, human resources, international business, law, library & information studies, marketing, social work, transportation management, and more. Up-to-date info, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable data on degree offerings, professional accreditation, jointly offered degrees, part-time & evening/weekend programs, postbaccalaureate distance degrees, faculty, students, requirements, expenses, financial support, faculty research, and unit head and application contact information. There are helpful links to in-depth descriptions about a specific graduate program or department, faculty members and their research, and more. Also find valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

Graduate Programs in Business, Education, Information Studies, Law & Social Work 2014 (Grad 6) John Wiley & Sons

In more recent times, the essence of the gatekeeper's role has moved to the 'boundary spanner' - a systems thinker who understands the specific needs and interests of the organization and whose greatest asset is their ability to move across and through the formal and informal features of the modern organization. There are many types of boundaries associated with an organization, for example, horizontal, (function and expertise), vertical (status, hierarchy), geographic, demographic, and stakeholder. Boundaries are "the defining characteristic of organizations and, boundary roles are the link between the environment and the organization" (Aldrich & Herker, 1977) with functions crucial to the effectiveness and success of the organization. Despite being a critical success factor for an organization, beginning in the 1970s, the term - 'boundary spanning' has had an intermittent research history: there has been no systematic body of research that has evolved over time. This book aims to invigorate, excite, and expand the literature on boundary spanning in a diverse range of disciplines such as sociology, organizational psychology, management, medicine, defence, health, social work, and community services. The book serves as the first collection of reviews on boundary spanning in organizations.

THE ART DIRECTORS ANNUAL 90

Routledge

The Ornish Diet has been named the "#1 best diet for heart disease" by U.S. News & World Report for seven consecutive years! Dr. Dean Ornish is the first clinician to offer documented proof that heart disease can be halted, or even reversed, simply by changing your lifestyle. Based on his internationally acclaimed scientific study, which has now been ongoing for years, Dr. Ornish's program has yielded amazing results. Participants reduced or discontinued medications; they learned how to lower high blood pressure; their chest pain diminished or disappeared; they felt more energetic, happy, and calm; they lost weight while eating more; and blockages in coronary arteries were actually reduced. In his breakthrough book, Dr. Ornish presents this and other dramatic evidence and guides you, step-by-step, through the extraordinary Opening Your Heart program, which is winning landmark approval from America's health insurers. The program takes you beyond the purely physical side of health care to include the psychological, emotional and spiritual aspects so vital to healing. This book represents the best modern medicine has to offer. It can inspire you to open your heart to a longer, better, happier life.

Introduction to Programming with Java Routledge

Introduction to Programming with Java: A Problem Solving Approach teaches the reader how to write programs using Java. It does so with a unique approach that combines fundamentals first with objects early. The book transitions smoothly through a carefully selected set of procedural programming fundamentals to object-oriented fundamentals. During this early transition and beyond, the book emphasizes problem solving. For example, Chapter 2 is devoted to algorithm development, Chapter 8 is devoted to program design, and problem-solving sections appear throughout the book. The second edition adds new language features and end-of-chapter GUI

sections that include animation. New chapters include an introduction to the Java Collections Framework and an in-depth treatment of recursion. Two new supplementary chapters on the book's companion website describe the JavaFX GUI platform. Before diving into object-oriented programming (OOP) in Chapter 6, the second edition includes a "mini-chapter" that describes how to write multiple-method programs in a non-OOP environment. Those who want to continue this theme can follow an optional "late objects" approach by reading two chapters on the book's website before returning to OOP in Chapter 6. Some key features include: •A conversational, easy-to-follow writing style. •Simple GUI programming early, in an optional standalone graphics track. •Well-identified alternatives for altering the book's sequence to fit individual needs. •Well-developed projects in six different academic disciplines, with a handy summary. •Detailed customizable PowerPoint™ lecture slides, with icon-keyed hidden notes. I have used the Dean and Dean book in my Introduction to Java Programming class for the past year. This is an excellent text and I am very happy with it. It is the only text that I have ever used that always gets positive comments from students on my class evaluations even though there is no question asked about the text. The chapters are well thought out and the coverage is complete. The progression from topic-to-topic is masterful, and the writing is exceptionally clear and at the perfect level for an introductory Java class. – Ralph Duffy, South Seattle Community College

FACULTY PUBLICATIONS AND PRESENTATIONS ... BY MEMBERS OF THE FACULTY, UNITED STATES AIR FORCE ACADEMY

The Art Directors Club

Learn leadership skills from experienced deans! The first resource written specifically for novice and aspiring deans and directors of nursing education, this engaging guide shares practical advice, wisdom, and insight from experienced academic leaders. These insights will help nurses who are new to academic leadership positions. Within its pages, experienced deans share their wisdom on how a new dean or director can succeed in a leadership position. With an emphasis on acquiring critical knowledge and essential skills, this book describes the parameters of the nursing dean or director role, practical strategies for resolving day-to-day issues, everything from student success to budget and fiscal health, and how to practice self-care while constantly tackling the challenges of these roles. Seventeen academic nursing leaders from across the United States deliver fundamental guidance to help readers determine how to navigate the multifaceted opportunities and challenges of deaning and directing. Key Features: Written in an accessible, engaging style for novice and aspiring academic nursing leaders Everyday strategies for dealing with routine issues Addresses the need for self-care and how to manage the stress and complexities of the leadership role Abundant real-world case studies and best practices Online resources for further study *Hearings Before the Task Force on Science Policy of the Committee on Science and Technology, House of Representatives, Ninety-ninth Congress, First Session, October 2, 3, 4, 22, 23, 24, 1985* McGraw-Hill Medical Publishing

Administrators in medical, nursing and health science programs are witnessing a substantial increase in the number of students with disabilities entering their programs. Concurrently, the benefits of diversity in healthcare are becoming increasingly apparent and important. A commitment to disability inclusion for qualified students should be a high-level goal of nursing, medical, and other health science programs. To support this goal, leaders in these areas must develop robust programs and an understanding of the needs of qualified students with disabilities in the health sciences and accompanying best practices for inclusion. This book of case studies is the perfect companion to Meeks' and Neal-Boylan's recently-published book *Disability as Diversity*. It contains ten cases related to medicine and nursing but with significant relevance to other health professions. Each case is preceded by an introduction with instructions on how to use it. The cases are followed by discussion questions and perspectives from the student, faculty and disability resource professional viewpoints. The cases are then deconstructed with reference to the book *Disability as Diversity*, relevant citations from the literature and case law. Developed by some of the most notable researchers and clinicians in the field this case book serves as truly invaluable resource for deans, program directors, faculty and student affairs personnel. Offices can use these cases as a platform for critical discussion and training about disability processes, policies and decision-making regarding accommodations and inclusion.

Past, Present and Future DIANE Publishing

Provides a detailed overview of the best business schools across North America, including information on each school's academic program, competitiveness, financial aid, admissions

requirements, and social scenes.

DURHAM, NEW HAMPSHIRE**

IAP

For those who have devoted their lives to teaching, learning, and innovation in the arts and sciences, it likely comes as no surprise that there has been a revaluing and devaluing of the work of students and faculty in the arts and sciences fields. In response Mary Anne Fitzpatrick and Elizabeth A. Say offer From the Desk of the Dean, an anthology of original essays by arts and

sciences deans and former deans addressing the increasing demands for vocational education at the expense of the liberal arts and sciences. This informative collection examines the challenges in higher education and offers a compelling case for the value of the liberal arts and sciences. To honor the fiftieth anniversary of the founding of the Council of Colleges of Arts and Sciences (CCAS), the largest association of arts and sciences deans in the country, editors Fitzpatrick and Say, both past presidents of CCAS, have assembled nine essays as well as three section introductions to create From the Desk of the Dean. Their goal is to prompt open discussions about American higher education and the perceived value of degrees in the basic arts and science fields. Many agree that to the public an accounting degree is of greater value than an art history degree

and a civil engineering degree has more value than a degree in physics. The contributors to the volume include deans with experience working at public and private universities, large research universities, comprehensive teaching institutions, as well as scholarly and advocacy groups. Their essays, informed by their experiences as leaders who support excellence in teaching, research, and creative activity in the basic fields of human knowledge, examine the many criticisms of higher education and of the faculty and programs in arts and sciences. Sally Mason, president emerita of the University of Iowa, provides a foreword.
