Regional growth in the European Union hinges to a large extent on smart specialization, a new and exciting theme in economic innovation studies. Advances in the Theory and Practice of Smart Specialization illuminates problems that have stifled the implementation of smart specialization policies, such as unique regional constraints and the inter-dependent demands of economic growth and commercial development. Forward-looking and pragmatic, it provides guidance for developing smart specialization strategies both to those involved in European affairs and others grappling with regional innovation and economic development worldwide. Emphasizes specific contexts for smart

specialization, its international approach and institutional preconditions Examines comparable initiatives worldwide Explains how to implement smart specialization policies given different development levels of regions and countries

MULTIDISCIPLINARY PERSPECTIVES ON CROSS-BORDER TRADE AND BUSINESS

Butterworth-Heinemann
This book provides the basic knowledge of Japanese contributions in political economy and the ongoing research agenda, such as the pursuit of theoretical consistency in Marxian economics by Uno School; the concept of 'civil society' as a criterion of existing socio-economic structure; a mathematical reconstruction of Marxian theory; and an analysis of environmental pollution. The new generation of Japanese political economists in collaboration with their overseas counterparts has

produced new insights into political economy and into the newly emerging structure of the world economy. The book provides useful insights into international capitalism and how past patterns of uneven development are now changing; the role of international finance in affecting both national and international growth and employment patterns; an analysis of recent growth patterns in Asia; and the specific issue emerging within the Asian region and the implications for economics, social change and geopolitics.

Trade Theory, Analytical Models and Development Petrogav International

The definitive guide to environmental control systems, updated with emerging technology and trends The Interactive Resource Center is an online learning environment where instructors and students can access the tools they need to make efficient use of their time, while

reinforcing and assessing their understanding of key concepts for successful understanding of the course. An access card with redemption code for the online Interactive Resource Center is included with all new, print copies or can be purchased separately. (**If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code ISBN: 978111899616-4). The online Interactive Resource Center contains resources tied to the book, such as: Interactive Animations Interactive Self-tests Interactive Flashcards Case Studies Respondus Testbank (instructors only) Instructor's Manual (over 200 pages) including additional resources (Instructors only) Roadmap to the 12th Edition (Instructors only) Student Guide to the Textbook Mechanical and Electrical Equipment for Buildings, Twelfth Edition is the industry standard reference that comprehensively covers all aspects of building systems. With over 2,200 drawings and photographs, the book discusses basic theory,

preliminary building design guidelines, and detailed design procedure for buildings of all sizes. The updated twelfth edition includes over 300 new illustrations, plus information on the latest design trends, codes, and technologies, while the companion website offers new interactive features including animations, additional case studies, quizzes, and more. Environmental control systems are the components of a building that keep occupants comfortable and help make the building work. Mechanical and Electrical Equipment for Buildings covers both active controls, like air conditioners and heaters, as well as passive controls like daylighting and natural ventilation. Because these systems comprise the entire energy use and costs of a building's life, the book stresses the importance of sustainability considerations during the design process, by both architects and builders. Authored by two leading green design educators, MEEB provides the most current information on low-energy architecture, including topics like: Context, comfort, and environmental resources

Indoor air quality and thermal control
 Illumination, acoustics, and electricity
 Fire protection, signal systems, and transportation
 Occupant comfort and building usability are the most critical factors in the success of a building design, and with environmental concerns mounting, it's becoming more and more important to approach projects from a sustainable perspective from the very beginning. As the definitive guide to environmental control systems for over 75 years, Mechanical and Electrical Equipment for Buildings is a complete resource for students and professionals alike.

CRC Press

In this timely exploration of sustainable actions, Christian Berg unpacks the complexity in understanding the barriers we face in moving towards a sustainable future, providing solution perspectives for every level, from individuals to governments and supra-national organizations offering a lucid vision of a long-term and achievable goal for sustainability. While the 2030 Agenda has already set ambitious

targets for humanity, it offers little guidance for concrete actions. Although much is already being done, progress seems slow and some actions aiming at sustainability may be counterproductive. Different disciplines, societal actors, governmental departments and NGOs attribute the slow progress to a number of different causes, from the corruption of politicians to the wrong incentive structures. Sustainable Action surveys all the fields involved in sustainability to provide action principles which speak to actors of different kinds, not just those professionally mandated with such changes. It offers a road map to all those who might not constantly think about systems change but who are concerned and want to contribute to a sustainable future in a meaningful way. This book will be of great interest to students and scholars of sustainability issues, as well as those looking for a framework for how to change their systems at work to impact the quadruple bottom line: environment, economy, society, and future generations.

Optimal Design and Retrofit of Energy Efficient Buildings, Communities, and Urban Centers
Springer
The International Conference on Phytochemistry, Textile, & Renewable Energy Technologies for Sustainable Development (ICPTRE 2020) was hosted by the World bank funded Africa Centre of Excellence in Phytochemicals, Textile and Renewable Energy (ACEII-PTRE) based at Moi University in conjunction with Donghua University, China and the Sino-Africa International Symposium on Textiles and Apparel (SAISTA). The theme of the conference was Advancing Science, Technology and Innovation for Industrial Growth. The research relationships between universities and industry have enabled the two entities to flourish and, in the past, have been credited for accelerated sustainable development and uplifting of millions out poverty. ICPTRE 2020 therefore provided a platform for academic researchers drawn from across the world to meet key industry professionals and actively share knowledge while advancing the role of

research in industrial development, particularly, in the developing nations. The conference also provided exhibitors with an opportunity to interact with professionals and showcase their business, products, technologies and equipment. During the course of the conference, industrial exhibitions, research papers and presentations in the fields of phytochemistry, textiles, renewable energy, industry, science, technology, innovations and much more were presented.

 This book constitutes the refereed proceedings of the 26th Australasian Database Conference, ADC 2015, held in Melbourne, VIC, Australia, in June 2015. The 24 full papers presented together with 5 demo papers were carefully reviewed and selected from 43 submissions. The Australasian Database Conference is an annual international forum for sharing the latest research advancements and novel applications of database systems, data driven applications and data analytics between researchers and practitioners from around the globe, particularly Australia and New Zealand. The mission of ADC is to share novel research solutions to problems of today's information society that fulfill the needs of heterogeneous applications and environments and to identify new issues and directions for future research. ADC seeks papers from academia and industry presenting research on all practical and theoretical aspects of advanced database theory and applications, as well as case studies and implementation

experiences.

BUSINESS, ORGANIZED LABOUR AND CLIMATE POLICY

Springer
 Global Marketing provides students with a truly international treatment of the key principles that every marketing manager should grasp. International markets present different challenges that require a marketer to think strategically, and apply tools and techniques creatively in order to respond decisively in a fiercely competitive environment. Alon et al. provide students with everything they need to rise to the challenge: Coverage of small and medium enterprises, as well as multinational corporations, where much of the growth in international trade and global marketing has occurred. A shift toward greater consideration of services marketing as more companies move away from manufacturing. A focus on emerging markets to equip students with the skills necessary to take advantage of the opportunities that these rapidly growing regions present. Chapters on social media, innovation,

and technology teach students how to incorporate these new tools into their marketing strategy. New material on sustainability, ethics, and corporate social responsibility; key values for any modern business. Short cases and examples throughout the text show students how these principles and techniques are applied in the real world. Longer cases provide instructors and students with rich content for deeper analysis and discussion. Covering key topics not found in competing books, Global Marketing will equip students with the knowledge and confidence they need to become leading marketing managers. A companion website features an instructor's manual with test questions, as well as additional exercises and examples for in-class use.

Cambridge Scholars Publishing
 This impartial study analyses the role of employer's organisations and trade unions in climate change policy and its impacts on the labour market. The policies of government to manage greenhouse gas emissions

will require business to change its product and service delivery arrangements, which in turn means labour requirements will also change. The book also considers whether labour market issues should be explicit in the theoretical framework of ecological modernisation as it guides the policy development process.

Cross-border business transactions have become increasingly important due to new norms of conducting business. Cross-border business has

led to the emergence of multiple business opportunities and challenges to various stakeholders. Such global reality cannot simply be ignored; thus, business entities that operate across national borders need to fully employ global business strategies to compete and survive in the dynamic global environment. Multidisciplinary Perspectives on Cross-Border Trade and Business captures a multifaceted outlook on international business phenomena, particularly when cross-border businesses are severely affected by global crises such as the COVID-19 pandemic. This book discusses the perspectives of stakeholders from both developed and developing countries as they handled international crises including the COVID-19 pandemic. Covering topics such as knowledge acquisition, internationalization, and small and medium enterprises, this book is an essential resource for business executives, practitioners, policymakers, graduate and post-graduate students of government or business

administration, professors, researchers, and academicians.

The dominant capital structure studies across the globe have been concentrated in developed countries and specifically for listed companies and few on unlisted companies or mixed companies. This thesis aims to examine the extent to which company liquidity, profitability, tangibility, and company size influence the leverage of Tanzanian companies as suggested by pecking order and trade-off theory. The study findings show a negative relationship between company liquidity and company leverage as measured by debt ratio and debt-to-equity ratio. These findings show the validity of the pecking order theory in Tanzania. The postulates of the trade-off theory as far as liquidity is concerned are not valid. The study findings also reveal a positive relationship between profitability and leverage, suggesting that majority of Tanzanian companies used more debts as the means of financing their business operations despite their profitability. The study also found that the

tangibility of listed companies was higher than that of the unlisted companies and that there was a negative relationship between tangibility and leverage, which is valid to pecking order but contrary to trade-off theory. As far as company size is concerned, study findings suggest that pecking order theory (POT) and trade-off theory (TOT) relevance cannot be fully supported in Tanzanian companies as the findings have revealed a negative relationship between company size and leverage. Findings reveal a negative relationship between company size and leverage. Pecking order theory (POT) and trade-off theory (TOT) relevance cannot be fully supported in Tanzanian companies, and size of listed companies was higher than that of the unlisted companies. This suggests that the size of majority of Tanzanian unlisted companies is still small as compared to the listed companies. 200 technical questions and answers for job interview Offshore Oil & Gas Platforms Petrogav International Neurophysiological and psychological modifications induced by

meditation practice have been consistently addressed by neuroscience. Training meditation practice induced plasticity (Barinaga, 2003; Knight, 2004), and as a consequence several benefit for mental and physical health (Davidson & McEwen, 2012), and cognitive performance. One goal of meditation is to achieve the light of consciousness observing with equanimity (the right distance) clouds of the mind wandering. This Frontiers Research Topic brings together studies from groups of authors whose research focus on neuropsychological systems involved in meditation demonstrating how meditation activates and can modify brain areas, cognitive mechanisms and well-being.

The job interview is probably the most important step you will take in your job search journey. Because it's always important to be prepared to respond effectively to the

questions that employers typically ask at a job interview Petrogav International has prepared this eBooks that will help you to get a job in oil and gas industry. Since these questions are so common, hiring managers will expect you to be able to answer them smoothly and without hesitation. This eBook contains 200 questions and answers for job interview and as a BONUS web addresses to 200 video movies for a better understanding of the technological process. This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry.

STATE AND STATEHOOD IN THE GLOBAL SOUTH

Routledge
A two-tier approach to learning makes this the most flexible book available: core theory within chapters is complemented by technical notes at the end of relevant chapters, allowing students to take their learning further. A fully up-to-date and comprehensive treatment of International Trade, this

book provides a solid foundation of international trade flows and theories, as well as the latest information on empirical developments and new theoretical insights. Fundamental changes in perspectives are covered, including the role of the firm in international trade flows and organization, in terms of heterogeneity, multinational activity, and global supply chain activities. The theory is illustrated throughout with empirical evidence and an abundance of relevant case studies. The body of the text represents the first tier of analysis: it provides extensive written and graphical explanations of the structure of international trade. As a second tier of analysis, technical notes at the end of relevant chapters seek to support students who wish to take their learning further. This book is accompanied by an Online Resource Centre that features: For students: * Additional review questions* Empirical questions based on data provided in Excel files* Simulation questions allowing students to experiment with models For lecturers: * Model answers to questions*

Animated Powerpoint slides* Further questions for use in seminars/ exams

CRC Press
Kim Leonie Kellermann analyzes the impact of sectoral minimum wages in Germany on the willingness of youths to undergo apprenticeship training. Using data from the German Socio-economic Panel, the author shows that higher wage floors set small, positive incentives for vocational training in the respective sectors. In case employers have to pay higher wages, they preferably hire qualified workers so that the worse job prospects of the low-skilled outweigh the potential pay increase. In order to preserve these training opportunities, it can make sense for

policy-makers to exempt apprentices from minimum wages since subminimum apprenticeship rewards are more appealing to firms.
Proceedings of the 2014 International Conference on Future Communication, Information and Computer Science (FCICS 2014), May 22-23, 2014, Beijing, China. IOS Press
The International Conference on Informatics and Management Science (IMS) 2012 will be held on November 16-19, 2012, in Chongqing, China, which is organized by Chongqing Normal University, Chongqing University, Shanghai Jiao Tong University, Nanyang Technological University,

University of Michigan, Chongqing University of Arts and Sciences, and sponsored by National Natural Science Foundation of China (NSFC). The objective of IMS 2012 is to facilitate an exchange of information on best practices for the latest research advances in a range of areas. Informatics and Management Science contains over 600 contributions to suggest and inspire solutions and methods drawing from multiple disciplines including: · Computer Science · Communications and Electrical Engineering · Management Science · Service Science · Business Intelligence
