Many of us grimace when faced with grammar exercises. But in order to communicate with others, pass tests, and get your point across in writing, using words and punctuation effectively is a necessary skill. It's a fact that in our life today, good communication skills-including writing-are essential. The good news is that grammar and writing skills can be developed with practice.

Ear, Nose and Throat (ENT) surgery has traditionally been a difficult and specialised topic in undergraduate medicine and for junior doctors. Many textbooks are too detailed for undergraduate use, or lack self assessment questions to help those wishing to underpin their learning. This concise and easy-to-read self-assessment guide aims to clarify the topic, and find and fill gaps in understanding. The multiple choice questions (MCQs) contained cover all levels of knowledge and the learning objectives of most of the UK medical school curricula, aiding preparation for end of unit, module and final exams for ENT. This book will be a valuable companion for clinics and teaching sessions and an indispensable revision primer for graduate entry medical curricula. 'An excellent means of preparation for medical undergraduate examinations as gaps in core knowledge are quickly revealed. Further, this text is a good guide for students to identify those subject areas requiring more focused study, especially when time is short.' - From the Foreword by Samir Soma

### GRAMMAR OF THE SHOT

Elsevier Health Sciences

"The newly-revised and updated fifth edition of Grammar of the Shot teaches readers theoretical principles behind successful visual communication in motion media through discussions of shot composition, depth cues, lens choices, lighting, screen direction, camera movement, and shooting for editing. Many general practices are outlined that will help readers create rich, multi-layered visuals. Designed as an easy-to-use reference, this book presents each topic succinctly with clear photographs and diagrams illustrating key concepts, practical exercises, and quiz questions, and is a staple of any filmmaker's library. This fifth edition includes an updated companion website, thorough chapter content reviews, exercises, quizzes, and a new section, Principles in Practice (PIPs). These PIPs present unique scenarios that a video maker may encounter in their own work and offer creative solutions and advice on how one might decide to handle them. Together with its companion volume, Grammar of the Edit, the core concepts discussed in these books offer concise and practical resources for both experienced and aspiring filmmakers"--

Provide quality nursing care for adults with medical-surgical and psychiatric disorders! Building upon the fundamentals of nursing, Medical-Surgical Nursing, 8th Edition helps you master the role and responsibilities of the LPN/LVN in medical-surgical care. The text addresses the special problems of older adult patients, then covers each major disorder by body system, presenting patient problems, goals, outcome criteria, and nursing interventions. As LPN/LVNs do not formulate NANDA diagnoses, the book is organized by patient problems rather than NANDA nursing diagnoses. Written by noted educators Adrienne Dill Linton and Mary Ann Matteson, this text helps you build the clinical judgment skills you need to succeed on the Next-Generation NCLEX-PN® examination and in nursing practice.

In the 19th century, education became accessible to much wider circles of society in a great number and variety of schools and the teaching of grammar came to be obligatory from 1870/72 with the advent of general education. Whereas these general trends of the 19th century are well-known to scholars working in different disciplines of social history, and the history of education in particular, it is still true that major sections of the evidence are largely uncollected. This is especially so for school books: there is virtually a gap between the 18th century and the present grammatical tradition. This bibliography lists some 1930 works on English grammar published in the 19th century, mainly in Britain and the US, half of which are accompanied by short descriptions of their physical make-up, content and affiliation.

CO-PUBLISHED BY ROUTLEDGE AND THE NATIONAL COUNCIL OF TEACHERS OF ENGLISH Grammar to Get Things Done offers a fresh lens on grammar and grammar instruction, designed for middle and secondary pre-service and in-service English teachers. It shows how form, function, and use can help teachers move away from decontextualized grammar instruction (such as worksheets and exercises emphasizing rule-following and

memorizing conventional definitions) and begin considering grammar in applied contexts of everyday use. Modules (organized by units) succinctly explain common grammatical concepts. These modules help English teachers gain confidence in their own understanding while positioning grammar instruction as an opportunity to discuss, analyze, and produce language for real purposes in the world. An important feature of the text is attention to both the history of and current attitudes about grammar through a sociocultural lens, with ideas for teachers to bring discussions of language-as-power into their own classrooms. A weekly review of politics, literature, theology, and art.  
**An easy grammar of history. A grammar of history; ancient and modern: with questions for exercise ... A new and enlarged edition**

This grammar is intended for students who have already received

instruction in the rudiments. Still, every such textbook must begin at the beginning. Part One, therefore, which occupies pp. 1-24, gives a succinct treatment of the Parts of Speech in the Sentence and of their substitutes, the Phrase and the Clause, concluding with a Summary of Definitions. Thus it clears the way for what follows, and may be utilized as a review, if the student needs to refresh his memory. Part Two deals specifically and fully with Inflections and Syntax (pp. 25-182). It includes also a chapter on the use of subordinate clauses as nouns, adjectives, and adverbs (pp. 157-162), as well as a chapter in which such clauses are logically classified in accordance with their particular offices in the expression of thought (pp. 163-182). Part Three (pp. 183-226) develops the subject of Analysis in its natural order, first explaining how sentences are put together, and then illustrating the process by which they may be resolved into their constituent parts. Modifiers and Complements are classified, and the so-called

Independent Elements are discussed. There is added a special chapter on Combinations of Clauses, in which the grammatical and logical relations of coordination and subordination are set forth, and their functions in the effective use of language are considered. This portion of the book, it is hoped, will be especially useful to students of English composition. The Appendix furnishes lists of verbs, tables of conjugation, rules for capitals and marks of punctuation, a summary of important rules of syntax, and a brief history of the English language. The Exercises (pp. 227-290) are collected at the end of the text, so as not to break continuity.
