Most people wind up under credit card debts because they are unable to comprehend the idea behind credit cards. They give in to impulses and slack on their payments, getting hit with late payment charges and heavy interest. The debt keeps piling until it becomes crushing, and the debtors find themselves unable to repay. Soon, people are looking for more credit cards or personal loans to pay the debts on their existing credit cards and keep the cycle going, but this cycle is more like a downward

spiral, which gets them under heavy debt. Credit card debts are not uncommon in our society, though, and anyone who is lagging behind on payments should not feel ashamed to ask for legitimate help. The problem is (was) that very little impartial and genuine advice is available for people who are either already under debt or using the credit cards wrongly. All products rely on glitzy advertising to stir impulses, and credit card comes in handy when it's time to pay. There's no card that comes with a "use prudently" warning printed on its front side. Credit card users realize their problems only when they have ended up under debt. But *The Smart & Easy Guide To Debt Relief: The Ultimate Guide Book To Credit Cards, Debt Consolidation, Debt Settlements, Debt Counseling, Debt Management & Other Options To Pay Off Credit Cards & Become Debt Free* is here to help you get out from under it. Ever wonder how banks make so much money? (Hint: It's NOT risky, it's fast, and YOU can copy them... No matter how broke or new you are.) You might be thinking that the only way to invest in real estate is by buying a property, then selling it or renting it out. But what if you don't have the time or inclination to do labor-intensive renovations and regular maintenance? You've most likely read the books or listened to the gurus discussing how millions were made by flipping houses or wholesaling. However, these methods normally entail extensive work, in-depth research, or a whole lot of money (be it yours or someone else's). Owning property in itself involves plenty of challenges and out-of-pocket

expenses. But what if there was a way to reap the income-generating benefits of real estate without experiencing the pitfalls? Enter mortgage note investing - an investment strategy so risk-free that even banks do it. This type of investment is secured by real estate - assets that are likely to appreciate - thus giving you a good exit strategy if the borrower defaults. It's a less popular but highly lucrative real estate investment... if you know how to do it right. Fortunately, even if it's the first time you've heard of note investing, you can get right up to speed with this complete beginner's guide that will lay out all you need to know. In *Invest Like a Bank*, here is just a fraction of what you will discover: How you can make money while helping distressed homeowners avoid losing their home An ideal starting point to note investing that doesn't involve a lot of money and can give you immediate feedback on your due diligence The one type of collateral you should never accept, no matter how profitable the investment seems How to figure out the right type of mortgage notes to invest in that will fit your budget, lifestyle, and preference Step-by-step calculations you can easily follow to check whether you're getting your money's worth The 3 main criteria you should consider when choosing a city to invest in to avoid future headaches How to capitalize on your LinkedIn connections to gain access to great deals and widen your investor network How to protect your money from scammers by ensuring you have this professional on your team Rewarding alternatives to foreclosure that will save the borrower's credit and save you precious time and money How to considerably grow your notes portfolio quickly without using any of your own money Bonus Downloadable note investing checklist to help you quickly assess a note's investment potential And much more. Regardless of your investing experience, investing in mortgage notes is a great way to get your feet wet in the real estate market. It's easier to start with note investing to gain knowledge and experience, then expand to other types of real estate investing in the future. With the knowledge you'll gain from this guide, you'll have more than enough to get you started. Pretty soon, you'll be growing from one note to ten to fifty and even more, with thousands of dollars in income effortlessly rolling in.
