Examines the significance and history of a wide range of terms and phrases related to the analysis of literature.

Technical Abstract Bulletin Mometrix Media Llc

This book presents over 40 cases of bamboo development across 22 major bamboo-industry countries and explores the knowledge gained from their successes and failures. It synthesises experiences and exchanges with country experts from international training courses and consultations, study tours, and seminars. Each case includes observations and summaries of discussions related to the development of bamboo-based industries in a healthy, sustainable way, and the facilitation of strategic and balanced development of bamboo in different global regions. Industrial and

artisanal bamboo growing and processing is expanding worldwide and this book brings together key experiences to help inform future developments. This book provides an analysis of bamboo plant features, including strong renewability, fast-growing, and high biomass production. It also reviews important ecological functions of bamboos, such as water and soil conservation, carbon sink and storage, and adaptation to climate change, as well as addressing the diversified culture of bamboo and key issues affecting the sector. Highly illustrated and in full colour throughout, this book is an essential resource for all those interested in bamboo, from private sector investors to governmental and development agencies, academic researchers and students.

THE HISTORY OF BUKHARA

Taylor & Francis

· 3,050 A-Z entries, including over 400 new and revised definitions · 128 contributors from a variety of specialized

areas related to education · Three tables and graphs to illustrate specific aspects of mathematics and evaluation in education · An introduction on education terminology by editors John W. Collins and Nancy Patricia O'Brien, distinguished librarians in the study of education · Author attributions for each definition · An extensive, updated bibliography of sources that identify and explain terms used within education

"Tamerlane: The Earth Shaker" by Harold Lamb. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to

produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Second Edition Harvard University Press
This book focuses on developing and updating prospective and practicing chemistry teachers' pedagogical content knowledge. The 11 chapters of the book discuss the most essential theories from general and science education, and in the second part of each of the chapters apply the theory to examples from the chemistry classroom. Key sentences, tasks for self-assessment, and suggestions for further reading are also included. The book is focused on many different issues a teacher of chemistry is concerned with. The chapters provide contemporary discussions of the chemistry curriculum, objectives and assessment, motivation, learning difficulties, linguistic issues, practical work, student active pedagogies, ICT, informal learning, continuous professional development, and teaching chemistry in developing environments. This book, with contributions from many of the world's top experts in chemistry education, is a major publication offering something that has not previously been available. Within this single volume, chemistry teachers, teacher educators, and prospective teachers will find information and advice relating to key issues in teaching (such as the curriculum, assessment and so forth), but contextualised in terms of the specifics of teaching and learning of chemistry, and drawing upon the extensive research in the field. Moreover, the book is written in a scholarly style with extensive citations to the literature, thus providing an excellent starting point for teachers and research students undertaking scholarly studies in chemistry education; whilst, at the same time, offering insight and practical advice to support the planning of effective chemistry teaching. This book should be considered essential reading for those preparing for chemistry teaching, and will be an important addition to the libraries of all concerned with chemical education. Dr Keith S. Taber (University of Cambridge; Editor: Chemistry Education Research and Practice) The highly regarded collection of authors in this book fills a critical void by providing an essential resource for teachers of chemistry to enhance pedagogical content knowledge for teaching modern chemistry. Through clever orchestration of examples and theory, and with carefully framed guiding questions, the book equips teachers to act on the relevance of essential chemistry knowledge to navigate such challenges as context, motivation to learn, thinking,

activity, language, assessment, and maintaining professional expertise. If you are a secondary or post-secondary teacher of chemistry, this book will quickly become a favorite well-thumbed resource!

Professor Hannah Sevan (University of Massachusetts Boston)

Practical Guidelines for Educational Leaders SAGE

Key Concepts in Educational Assessment provides expert definitions and interpretations of common terms within the policy and practice of educational assessment. Concepts such as validity, assessment for learning, measurement, comparability and differentiation are discussed, and there is broad coverage of UK and international terminology. Drawing on the considerable expertise of the authors, the entries provide: - clear definitions - accounts of the key issues - authoritative and reliable information - suggestions for further reading Created to support students of education on undergraduate and postgraduate courses, and established education professionals including those who are members of the Chartered Institute of Educational Assessors (CIEA), this book is an accessible guide for anyone engaged in educational assessment. Tina Isaacs is Director of the MA in Educational Assessment at the Institute of Education, London. Catherine Zara was most recently Director of the MA in Educational Assessment and Director of the BA (Hons) in Post Compulsory Education and Training at the University of Warwick. Graham Herbert was most recently Director of the CIEA. Steve J. Coombs is Head of Department for Continuing Professional Development at Bath Spa University, which offers an MA in Educational Assessment. Charles Smith is senior lecturer in economics and education at Swansea Metropolitan University of Wales Trinity Saint David.

The Greenwood Dictionary of Education IAP

'It is scarcely possible to imagine a truly educated person who cannot read well. Yet it is not clear how or even if courses in literature actually work. How can teachers of English help students in their developmental journey toward becoming skillful readers and educated persons? This is the complex question that Chambers and Gregory address in Teaching and Learning English Literature. The authors consider practical matters such as course design and student assessment but do not shirk larger historical and theoretical issues. In a lucid and non-polemical fashion - and occasionally with welcome humor -

Chambers and Gregory describe the what, why, and how of "doing" literature, often demonstrating the techniques they advocate. Veteran teachers will find the book rejuvenating, a stimulus to examining purposes and methods; beginning teachers may well find it indispensable' - Professor William Monroe, University of Houston 'The transatlantic cooperation of Ellie Chambers and Marshall Gregory has produced an outstanding book that ought to be on the shelves of anyone involved in the teaching of English Literature, as well as anyone engaged in the scholarship of teaching and learning in general or in any discipline. As they say, "the teaching of English Literature plays a central role in human beings' search for meaning" although others in other disciplines may make this claim for theirs too. If so, they will still learn a great deal from this book; anyone looking for no more than a means of satisfying the demands of governments that look for simplistic quality measures and economic relevance, let them look elsewhere. This is a book for now and for all times' - Professor Lewis Elton, Visiting Professor, University of Manchester, Honorary Professor, University College London This is the third in the series Teaching and Learning the Humanities in Higher Education. The book is for beginning and experienced teachers of literature in higher education. The authors present a comprehensive overview of teaching English literature, from setting teaching goals and syllabus-planning through to a range of student assessment strategies and methods of course or teacher evaluation and improvement. Particular attention is paid to different teaching methods, from the traditional classroom to newer collaborative work, distance education and uses of electronic technologies. All this is set in the context of present-day circumstances and agendas to help academics and those in training become more informed and better teachers of their subject. The book includes: - how literature as a discipline is currently understood and constituted - what it means to study and learn the subject - what 'good teaching' is, with fewer resources for teaching, larger student numbers, an emphasis on 'user-pay' principles and vocationalism. This is an essential text for teachers of English Literature in universities and colleges worldwide. The Teaching & Learning in the Humanities series, edited by Ellie Chambers and Jan Parker, is for beginning and experienced lecturers. It deals with all aspects of teaching individual arts and humanities subjects in higher education.

Experienced teachers offer authoritative suggestions on how to become critically reflective about discipline-specific practices.

An Introduction Addison-Wesley
Humanistic Values from Academic Community Perspective is authored by a range of international experts with a diversity of backgrounds and perspectives and provides a collection of ideas, examples and solutions on Humanistic Values in Academia, implementation and problems that occur in this area of consideration. This volume is a result of numerous discussions within the academic members to incorporate humanistic values like dignity, integrity, care, human rights etc. into our conduct composed of all the academic levels, beginning with students through staff, faculty and administration. Authors and contributors of this book assume the importance and crucial role of values in managing contemporary organizations emphasizing the fact that the oldest organizations managed by core values are not the globally known and acknowledged business corporation but the institutions like churches, armies and the universities. Numerous institutions of higher education are proud of their core values and present them to their employees, students, and stakeholders. The book is divided into four parts: I Introduction, II Humanistic values from academic perspective, III Humanistic values from student / faculty perspective and part IV Humanistic values from educational administrative perspective. We sincerely hope that the chapters presented in this volume will open new horizons for the understanding of humanistic values in academia and simultaneously it will provide inspiration and encouragement for further research in this area of study.

A Practical Guide and Textbook for Student Teachers, Teacher Trainees and Teachers Pearson College Division

Boym provides a view of Russia that is historically informed, replete with unexpected detail, and stamped with authority. Alternating analysis with personal accounts of Russian life, she conveys the foreignness of Russia and examines its peculiar conceptions of private life and common good, of Culture and Trash, of sincerity and banality.

VALIDITY IN EDUCATIONAL AND PSYCHOLOGICAL ASSESSMENT

SAGE
This volume presents findings and insights from contemporary thinking and research on the application of Information Technology in Educational Management. It analyzes the ways in which ICT has been used, across a range of educational institutions, to support various aspects of educational management. It is the latest in a series of books produced by IFIP Working Group 3.7.

TRAVELS IN CENTRAL ASIA

Good Press
Abu Bakr Muhammad ibn al-Narshakhi of Bukhara wrote the history of his city and presented it to the Samanid ruler Nuh ibn Nasr in 943 C.E. (A.H. 332). This is the only book he is known to have written. Narshakhi's History of Bukhara is

unusual among histories of Middle Eastern cities because it provides a broad and perceptive overview of urban life of the time, as opposed to the standard biographies of religious leaders. Richard Frye's translation from the Persian presents an engaging, readable narrative that recreates the lively intellectual and commercial life of this vibrant ancient city. In the tenth century, Bukhara was a cultural center that rivaled Baghdad, and was known as "the dome of learning in the East." It was a dynamic metropolis, capital of the semi-independent dynasty that ruled most of present-day Iran and Central Asia. It was in Bukhara that the so-called Persian Renaissance began, with its far-reaching literary implications. Narshakhi portrays not only rulers, but also everyday life in cities and villages. This primary source affords insights into life in Eastern Iran and Central Asia during a period of change in the Islamic world. About Richard Frye: Richard N. Frye, Harvard University, is the author of *The Heritage of Central Asia*, *Ibn Fadlan's Journey to Russia*, and numerous other books. [From Mental Processing to Natural Language Processing](#) John Wiley & Sons
A complete and easy-to-use guide to English idioms. With its detailed analysis of over 4500 idioms, the Longman Dictionary of English Idioms provides the advanced learner with an indispensable reference tool.

Key Concepts in Educational

Assessment Pearson College Division
This is a compact introduction to some of the principal topics of mathematical logic. In the belief that beginners should be exposed to the most natural and easiest proofs, I have used free-swinging set-theoretic methods. The significance of a demand for constructive proofs can be evaluated only after a certain amount of experience with mathematical logic has been obtained. If we are to be expelled from "Cantor's paradise" (as nonconstructive set theory was called by Hilbert), at least we should know what we are missing. The major changes in this new edition are the following. (1) In Chapter 5, Effective Computability, Turing-computability is now the central notion, and diagrams (flow-charts) are used to construct Turing machines. There are also treatments of Markov algorithms, Herbrand-Gödel-computability, register machines, and random access machines. Recursion theory is gone into a little more deeply, including the s-m-n theorem, the recursion theorem, and Rice's Theorem. (2) The proofs of the Incompleteness Theorems are now based upon the Diagonalization Lemma. Löb's Theorem

and its connection with Godel's Second Theorem are also studied. (3) In Chapter 2, Quantification Theory, Henkin's proof of the completeness theorem has been postponed until the reader has gained more experience in proof techniques. The exposition of the proof itself has been improved by breaking it down into smaller pieces and using the notion of a scapegoat theory. There is also an entirely new section on semantic trees.

An Interactive Approach Markus Wiener

The second edition of the popular English Phonetics and Phonology textbook has been extensively updated and expanded to offer greater flexibility for teachers and increased support for non-native speakers studying the sound systems of English. An ideal introduction to the study of the sound systems of English, designed for those with no previous knowledge of the subject. Second edition now rigorously updated and expanded to reflect feedback from existing students and to increase support for non-native speakers of English. Benefits from a useful introduction to articulatory phonetics, along with coverage of the main aspects of the phonological structure of present-day English. Features a completely new chapter on the relationship between English spelling and pronunciation, extended coverage of intonation, and extensive revisions to sections on rhythm, word stress, intonation and varieties of

English worldwide. Will include invaluable chapter-by-chapter exercises, linked to sound files available on the accompanying website at <http://www.wiley.com/go/carrphonetics> (available upon publication)

The Semantics of Prepositions

Springer Science & Business Media
Lecturers, request your electronic inspection copy to review it for your course. Validity is the hallmark of quality for educational and psychological measurement. But what does quality mean in this context? And to what, exactly, does the concept of validity apply? These apparently innocuous questions parachute the unwary inquirer into a minefield of tricky ideas. This book guides you through this minefield, investigating how the concept of validity has evolved from the nineteenth century to the present day. Communicating complicated concepts straightforwardly, the authors answer questions like: What does 'validity' mean? What does it mean to 'validate'? How many different kinds of validity are there? When does validation begin and end? Is reliability a part of validity, or distinct from it? This book will be of interest to anyone with a professional or academic interest in evaluating the quality of educational or psychological assessments, measurements and diagnoses.
