Deleuze and Foucault had a long, complicated and productive relationship, in which each was at various times a significant influence on the other. This collection combines 3 original essays by Deleuze and Foucault, in which they respond to each other's work, with 16 critical essays by key contemporary scholars working in the field. The result is a sustained discussion and analysis of the various dimensions of this fascinating relationship, which clarifies the implications of their philosophical encounter.

*Letters and Other Texts* Semiotext

This book provides a clear and concise introduction to the philosophy of Gilles Deleuze. It analyses his key theoretical concepts, such as difference and the body without organs, and covers all the different areas of his thought, including metaphysics, the history of philosophy, psychoanalysis, political theory, the philosophy of the social sciences and aesthetics. As the first book to offer a comprehensive analysis of Deleuze's writings, it reveals both the internal coherence of his philosophy and its development through a series of distinct phases. Reidar Due offers an entirely new interpretation of Deleuze's philosophy, centred around the notion of thought as a capacity to form relations. These relations are embodied in nature, in language and in the unconscious; in art, science and social practice. With this concept of

embodied thought, Deleuze challenges our most entrenched beliefs about the self and about signs whether linguistic or social. He develops an original theory of power and social systems and presents a method for understanding any signifying practice, from language and ritual to the unconscious, including cinema, literature and painting. Due analyses the different strands in this theoretical edifice and shows its implications for a wide range of human sciences, from history and psychology to political theory and cultural studies.

*Kant's Critical Philosophy* Edinburgh University Press

Since its publication in 1968, "Difference and Repetition", an exposition of the critique of identity, has come to be considered a contemporary classic in philosophy and one of Deleuze's most

important works. The text follows the development of two central concepts, those of pure difference and complex repetition. It shows how the two concepts are related, difference implying divergence and decentring, repetition being associated with displacement and disguising. The work moves deftly between Hegel, Kierkegaard, Freud, Althusser and Nietzsche to establish a fundamental critique of Western metaphysics, and has been a central text in initiating the shift in French thought - away from Hegel and Marx, towards Nietzsche and Freud.

### KEY CONCEPTS

Bloomsbury Publishing  
French philosophers Gilles Deleuze and Felix Guattari worked together extensively from the 1960s into the 1990s, and the resulting "intersections" of their different sensibilities and modes of knowing fueled powerful alternatives to Marxian and psychoanalytic orthodoxies. Yet readers approaching Deleuze and Guattari's works are often frustrated by the paucity or unfamiliarity of specific examples that might clarify their complex arguments. This timely volume "animates" key concepts and terminology by applying them to provocative readings of literary texts, films, and cultural phenomena--from *Apocalypse Now* to Cajun music and dance. Drawing extensively from primary and critical sources to elucidate Deleuze and Guattari's theoretical contributions, Stivale reinvigorates their "two-fold thought" for use as an analytical tool in the humanities and social sciences. The book also offers a clear introduction to the precollaborative phase of each thinker's work, an interview Stivale conducted with Guattari, and the first-time English translation of a 1967 essay by Deleuze. French philosopher Gilles Deleuze wrote two 'logic' books: *Francis Bacon: The Logic of Sensation* and *The Logic of Sense*. However, in neither of these books nor in any other works does Deleuze articulate in a formal way the features of the logic he employs. He certainly does not use classical logic. And the best options for the non-classical logic that he may be implementing are: fuzzy, intuitionist, and many-valued. These are applicable to his concepts of heterogeneous composition and becoming, affirmative synthetic disjunction, and powers of the false. In *The Logic of Gilles Deleuze: Basic Principles*,

Corry Shores examines the applicability of three non-classical logics to Deleuze's philosophy, by building from the philosophical and logical writings of Graham Priest, the world's leading proponent of dialetheism. Through so doing, Shores argues that Deleuze's logic is best understood as a dialetheic, paraconsistent, many-valued logic.

### **Gilles Deleuze's Time Machine** A&C Black

Throughout his career, Deleuze developed a series of original philosophies of time and applied them successfully to many different fields. Now James Williams presents Deleuze's philosophy of time as the central concept that connects his philosophy as a whole. Through this conceptual approach, the book covers all the main periods of Deleuze's philosophy: the early studies of Hume, Nietzsche, Kant, Bergson and Spinoza, the two great philosophical works, *Difference and Repetition* and *Logic of Sense*, the *Capitalism and Schizophrenia* works with Guattari, and the late influential studies of literature, film and painting. The result is an important reading of Deleuze and the first full interpretation of his philosophy of time.

### **NEGOTIATIONS, 1972-1990**

Ashgate Publishing, Ltd.

A wide-ranging collection of essays on the film-philosophy of Gilles Deleuze. *Deleuze and Film* explores how different films from around the world 'think' about topics like history, national identity, geopolitics, ethics, gender, genre, affect, religion, surveillance culture, digital aesthetics and the body. Mapping the global diversity of this cinematic thinking, this book greatly expands upon the range of films discussed in Deleuze's *Cinema* books.

### **What Is Philosophy?** Routledge

Drawing on a range of contributors, case studies and examples, this book examines how we can think about design through Deleuze, and how Deleuze's thought can be re-designed to produce new concepts. It taps into the emerging networks between philosophy as an act of inventing concepts and design as the process of inventing the world.

This book offers a readable and compelling introduction to the work of one of the twentieth century's most important and elusive thinkers. Other books have tried to explain Deleuze in general terms. Todd May organizes his book around a central question at the heart of Deleuze's philosophy: how might we live? The author then goes on to explain how Deleuze offers a view of the cosmos as a living

thing that provides ways of conducting our lives that we may not have dreamed of. Through this approach the full range of Deleuze's philosophy is covered. Offering a lucid account of a highly technical philosophy, Todd May's introduction will be widely read amongst those in philosophy, political science, cultural studies and French studies.

### **Gilles Deleuze** Guilford Press

Called by many France's foremost philosopher, Gilles Deleuze is one of the leading thinkers in the Western World. His acclaimed works and celebrated collaborations with Félix Guattari have established him as a seminal figure in the fields of literary criticism and philosophy. The long-awaited publication of *What Is Philosophy?* in English marks the culmination of Deleuze's career. Deleuze and Guattari differentiate between philosophy, science, and the arts, seeing as means of confronting chaos, and challenge the common view that philosophy is an extension of logic. The authors also discuss the similarities and distinctions between creative and philosophical writing. Fresh anecdotes from the history of philosophy illuminate the book, along with engaging discussions of composers, painters, writers, and architects. A milestone in Deleuze's collaboration with Guattari, *What Is Philosophy?* brings a new perspective to Deleuze's studies of cinema, painting, and music, while setting a brilliant capstone upon his work.

### **Introduction to the Philosophy of Gilles Deleuze** Gilles Deleuze Key Concepts

The concept of difference occupies a central place in the philosophy of Gilles Deleuze. In this work, David Bright explores how Deleuze's difference can be put to work in critical qualitative research. The book explores research and writing as a creative process of dynamically pursuing problems. Following Deleuze's advice not to think of problems in terms of solutions, the book offers important methodological insights into the ways the subjects, objects, and processes of research might be conceived and represented in writing, exploring the problem of thinking and writing about difference in complex ways without reducing thought to static representations of identity. Bright uses the example of foreign teachers and international schooling in Vietnam to show us how Deleuze's difference can be used in critical qualitative research, demonstrating the limits of traditional ways of thinking about difference in learning and teaching. *Exploring Deleuze's Philosophy of Difference* is a book that will

interest all those with an interest in the application of Deleuze's philosophy to critical qualitative research. ### EPZ THOUSAND PLATEAUS

Bloomsbury Publishing

It is the contention of the editors and contributors of this volume that the work carried out by Gilles Deleuze, where rigorously applied, has the potential to cut through much of the intellectual sedimentation that has settled in the fields of music studies. Deleuze is a vigorous critic of the Western intellectual tradition, calling for a 'philosophy of difference', and, despite its ambitions, he is convinced that Western philosophy fails to truly grasp (or think) difference as such. It is argued that longstanding methods of conceptualizing music are vulnerable to Deleuze's critique. But, as Deleuze himself stresses, more important than merely critiquing established paradigms is developing ways to overcome them, and by using Deleuze's own concepts this collection aims to explore that possibility.

Exploring Deleuze's Philosophy of Difference A&C Black

Gilles Deleuze is now regarded as one of the most radical philosophers of the twentieth century. His work is hugely influential across a range of subjects, from philosophy to literature, to art, architecture and cultural studies. Gilles Deleuze: Key Concepts provides a guide to Deleuzian thought for any reader coming to his writings for the first time. This new edition is fully revised and updated and includes three new chapters on the event, psychoanalysis and philosophy.

*Gilles Deleuze* A&C Black

The Non-Philosophy of Gilles Deleuze takes up Deleuze's most powerful argument on the task of contemporary philosophy in the West. Deleuze argues

that it is only through a creative engagement with the forms of non-philosophy--notably modern art, literature and cinema--that philosophy can hope to attain the conceptual resources to restore the broken links of perception, language and emotion. In short, this is the only future for philosophy if it is to repair its fragile relationship to immanence to the world as it is. A sequence of dazzling essays analyze Deleuze's investigations into the modern arts. Particular attention is paid to Deleuze's exploration of Leibniz in relation to modern painting and of Borges to an understanding of the relationship between philosophy, literature and language. By illustrating Deleuze's own approach to the arts, and to modern literature in particular, the book demonstrates the critical significance of Deleuze's call for a future philosophy defined as an "art of inventing concepts." *Cinema and Philosophy* Routledge

Gilles Deleuze published two radical books on film: *Cinema 1: The Movement-Image* and *Cinema 2: The Time-Image*. Engaging with a wide range of film styles, histories and theories, Deleuze's writings treat film as a new form of philosophy. This ciné-philosophy offers a startling new way of understanding the complexities of the moving image, its technical concerns and constraints as well as its psychological and political outcomes. *Deleuze and Cinema* presents a step-by-step guide to the key concepts behind Deleuze's revolutionary theory of the cinema. Exploring ideas through key directors and genres, Deleuze's method is illustrated with examples drawn from American, British, continental European, Russian and Asian cinema. *Deleuze and Cinema* provides the first introductory guide to Deleuze's radical methodology for screen analysis. It will be invaluable for students and teachers of Film, Media and Philosophy. *The Folds of Friendship* Edinburgh University Press

Film and philosophy have much in common, and books have been written on film and philosophy. But can films be, or do, philosophy? Can they "think"? *Film as Philosophy* is the first book to explore this fascinating question historically, thematically, and methodically. Bringing together leading scholars from universities across the globe, *Film as Philosophy* presents major new research that leads film studies and philosophy into a

productive dialogue. It provides a uniquely sweeping, historical overview of the confluence of film and philosophy for more than a century, considering films from Jean Renoir, Lars von Trier, Jørgen Leth, David Lynch, Michael Haneke, and others; the written works of filmmakers who also theorized on the medium, including Sergei Eisenstein and Jean Epstein; and others who have written on cinema, including Hugo Münsterberg, Béla Balázs, André Bazin, Henri Bergson, Gilles Deleuze, Stanley Cavell, Alain Badiou, Jacques Rancière, and many more. Representing a major step toward establishing a media philosophy that puts the status, role, and function of film into a new perspective, *Film as Philosophy* removes representational techniques from the center of inquiry, replacing these with the medium's ability to "think." Hence it accords film with "agency," and the dialogue between it and philosophy (and even neuroscience) is negotiated anew.
