Research can be a challenging but rewarding activity. All degree-level students studying sport, and all effective professionals working in the sport sector need to have a sound understanding of research methods and how to critically interpret research findings. This broad-ranging, in-depth and practical textbook introduces research methods for students on sport-related degree courses, outlining the knowledge and practical skills needed to undertake meaningful research and to become a knowledgeable consumer of the research of others. The book explores every element of the research process, from the fundamental 'what, why and who?' questions, through research plans, literature review, qualitative and quantitative methods of data collection and data analysis, to the communication of research results. It offers a critical appraisal of alternative methods, including mixed methods, as well as clear guidance on how to use each particular method. Every chapter contains test questions and practical exercises, detailed case studies, a clear chapter summary and extensive guides to further sport-related study resources, to enable students to check their understanding and develop, extend and apply their practical skills. Step-by-step introductions to the use of the key statistical packages Excel, SPSS and NVivo in sport research are included. On-line support materials include some 400 PowerPoint slides and copies of data-sets used in the book. With deeper and broader coverage than any other sport-related research methods textbook, and a clear focus on 'how to do it', Research Methods for Sport Studies and Sport Management is an essential companion for any sport-related degree course.

Put yourself in the customer's shoes, with dozens of bids, proposals or tender responses to assess. It's a daunting and difficult job. Despite the hours you have spent writing your proposal, it's just one among many. What does it take to be successful in this hyper-competitive environment? What will make your proposal rise to the top of the pile? In this concise and easy to read book, proposal writing expert Robyn Haydon explains why most proposals end up on the reject pile - and how to make sure yours is a winner. Whether you write proposals for a living - or just need help to finish a proposal today - you will find practical advice here on proposal structure, readability, writing techniques, selling your capability, making a compelling offer, and avoiding elimination traps. Ideal for entrepreneurs, professional service providers and small business owners, as well as sales and marketing specialist, grant writers and proposal professionals who work in commercial and not for profit environments. "A quick way to learn a great deal about proposal writing...excellent value...highly recommended." - Australian Marketing Institute "What's your strike rate when it comes to successful submissions? If it's less than 100%, you could learn something from The Shredder Test. The chapter summaries are excellent...a concise, useful read." - The Age Newspaper "Straightforward and easy to read, this book is applicable worldwide for companies bidding in open business-to-business environments." - Association of Proposal Management Professionals (USA) "Strategies, tactics, how-to's and tips that any business can use." - Herald Sun Newspaper

The past few years have seen the emergence of a number of powerful new technologies specifically designed to help facility managers do their jobs. Unfortunately, a number of political, technical, and procedural impediments have resulted in the

majority of computer-aided facility management (CAFM) systems ending up as "shelfware" sitting on the shelves of well-intentioned users. Written by two leading international experts in the field of applying information technology to facility management, this book provides facility managers with the detailed, hands-on guidance required for successfully supporting CAFM systems. Technical and procedural topics focused on within the book include strategic technology planning, cost/benefit analysis, CAFM system functionality, implementation planning, and technology trends. In Part I of Facility Management Technology, the authors draw on their experiences as information system consultants to identify major issues and successful strategies associated with planning, implementing, and managing facility management technology. Issues addressed deal not only with CAFM itself, but also with the processes and procedures required for minimizing the risks of technology and successfully implementing systems in the shortest possible time frame. Part 2 is devoted entirely to real-life case histories from a number of North American and Japanese corporations and government organizations, including SONY, Aetna, Siemens, the Bank of Boston, Long-Term Credit Bank of Japan, Pioneer Hi-Bred, Florida Hospital, and the City of Toronto. Selected for their relevance to specific aspects of CAFM, each study describes how a particular organization dealt with one or more crucial problems associated with the successful deployment of CAFM technology—addressing both day-to-day operations and, importantly, the larger organizational context. Facility Management Technology is the only truly comprehensive text on the subject. With the wealth of practical advice from Teicholz and Ikeda and its case-study orientation, this book will be an important resource for facility and real estate managers, IS professionals, facility management and design consultants, and students. The only totally practical, case-study based guide to using automation in facility management. FACILITY MANAGEMENT TECHNOLOGY Lessons from the U.S. and Japan From performing strategic facility technology planning to a cost/benefit analysis, from selecting and managing CAFM systems for your organization to integrating CAFM systems with other types of corporate computing systems, this book offers detailed, hands-on guidance to virtually every aspect of facility management technology. Written by two leading international experts in the field, it analyzes and contrasts how facility management technology is now being used in North America and Japan and describes successful strategies companies have evolved for incorporating CAFM into their day-to-day operations. "I strongly believe that the clear analysis of facility management technologies and the unique lessons to be learned from each case study in the book will help facility managers establish their own total systems concept." —Yoshiro Koyama Facility Manager SONY "The authors have provided a contemporary, accurate, and insightful view of the application of CAFM into the American and Japanese corporate environment. The 'icing on the cake' is the generic and real world

case studies that provide much needed realism to CAFM. Readers should come away enthused by their increased understanding and feeling secure that others have blazed the trail ahead of them." —John A. Paccione, AIA Director of Design Florida Hospital "The authors' insights into past, present, and future facility management trends, as well as the clear and practical examples shown in this book, will surely contribute to the development of facility management and CAFM in both the U.S. and Japan." —Dr. Shigeyuki Yamaguchi Department of Architecture and Design Kyoto Institute of Technology

In the past, an organization's technical methodologies were expected to fulfill project management process needs. However, they sometimes fell short of applying what is known today as "professional project management" concepts and practices. Written by one of the nation's most highly regarded project management mentors, *The Complete Project Management Methodology and Toolkit* delineates a "business-relevant" methodology that can be introduced across different industries and business environments. The book describes the ProjectPRISMTM Project Management Methodology, an innovative, matrix-based approach to conducting project management that introduces relevant concepts, practices, and tools in an effective project management solution. Aligned with common business practices, Gerard Hill's method demonstrates how to develop project plans, keep on schedule, manage budgets, maintain areas of responsibility, and evaluate a project's progress from concept to completion. The text also offers insight for customizing the methodology to meet the unique needs of individual organizations. Project management has emerged as a professional discipline and is coming into the mainstream just when it appears to be most needed in the business environment. Demonstrating that project management, in many ways, is business management, the author provides an exceptional foundation for creating a fine-tuned project management practice and a relevant business solution for every organization.

New technology and aging buildings are making library facility management more complex and difficult than ever before. Many librarians have inherited buildings that not only need to be retrofitted for today's technology, but also require repair and replacement of basic systems. The handbook was written by a Director and a professional facilities manager to provide the practical advice, techniques, and solutions library managers need to ensure that their facilities can function for their intended purposes. Chapters cover planning and evaluating, security and safety, lighting, climate control, parking, access, costs and finances, preventive maintenance and repairs, record-keeping, contracts, bidding, specifications, and much more. An extensive glossary of terms provides the language needed to communicate with facilities staff and contractors.

Facilities management has been one of the fastest growing professional disciplines for some years, both in terms of volume and diversity of commercial activity. However, a widely accepted and implemented body of knowledge is still lacking. This book contributes to that knowledge building by taking models and ideas from a wide range of sources and linking them to extensive case study material drawn from practising facilities managers. The text is divided into three parts: · Current practice is illustrated, with a second chapter looking at enhancing services · Key facilities management issues are considered: user needs evaluation, outsourcing and computer-based information systems · Extensive advice is provided on managing people through change and on decision making The Second Edition features new material on user needs, briefing and procurement strategy, together with new public sector case studies. 'This high quality book provides a comprehensive approach to the range of issues [and] the combination of case studies with theoretical perspectives and research has a strong practical emphasis' *Chartered Surveyor Monthly* 'A thorough and very well researched book...as a student text it is first class' *Construction Manager* *The Complete Project Management Methodology and Toolkit* Durbin Professionals Press

*Managing Sport Facilities, Fourth Edition With Web Study Guide*, merges the historical and theoretical foundations of the sport facility industry with real-world challenges and insights to create an engaging, modern guide for effective sport facility management. This updated edition provides a comprehensive knowledge base for the wide-ranging duties of sport facility managers and prepares students to enter the field ready to confront the responsibilities they will face on the job. Joining field expert Gil Fried for this fourth edition is Matthew Kastel, a practicing stadium manager with over 25 years of experience. Together, the authors blend extensive research and insights from the professional industry with everyday occurrences at sport facilities. With an increased focus on in-depth, real-world examples of issues facing facility managers today, this edition takes a detailed look at different types of facilities, including stadiums, arenas, fitness centers, parks, and multiuse facilities, and it addresses the various challenges that each presents. Contributions from industry professionals provide an inside look at their facility's unique issues and concerns, from systems and operations to maintenance and green practices. To emphasize practical applications of the content, a new web study guide includes seven Day in the Life videos that follow the daily routine of a facility executive and offer students an inside look at real-life facility management. Additional tools further enhance learning and are accompanied by activities and assignments that guide students in applying the concepts: Video clips of interviews with industry professionals provide multifaceted career insights and advice. Gil's Sportsplex, an in-depth sport facility case study, covers strategic planning, construction, financial analysis, and more. Sample blueprints highlight the construction and anatomy of a sport facility. A list of Internet resources for each chapter encourages further learning. Also new to this edition is a chapter on midevent management, which covers strategies for managers to use during events as issues arrive so they are prepared for all phases of a facility event. Throughout the book, examples capture the essence of being a facility manager. Opening chapter scenarios introduce industry executives and show how the material applies to daily activities. *Facility Focus* sidebars provide facts about facilities and strategies for facility success, while *Behind the Scenes* sections present unique concerns and strategies to make facility managers more successful professionals. Students will develop practical knowledge, which will prepare them to make decisions in all areas of facility management, including building design and construction, operations, marketing, legal issues, finance, and event management. *Managing Sport Facilities, Fourth Edition*, teaches the foundational and application skills necessary for facility managers to respond effectively to new challenges. It is an essential resource for guiding students to success in a sport facility management career. Note: The web study guide is included with all new print books and some ebooks. For ebook formats that don't provide access, the web study guide is available separately.
