#### OPEN BUILDING RESEARCH

Quintessenz Verlag

This book provides a substantial contribution to understanding the international legal framework for the protection and conservation of cultural heritage. It offers a range of perspectives from well-regarded contributors from different parts of the world on the impact of law in heritage conservation. Through a holistic approach, the authors bring the reader into dialogue around the intersection between the humanities and legal sciences, demonstrating the reciprocity of interaction in programs and projects to enhance cultural heritage in the world. This edited volume compiles a selection of interesting reflections on the role of cultural diplomacy to address intolerances that often govern international relations, causing damage to human and cultural heritage. The main purpose of this collection of essays is to analyse the different cultural paradigms that intervene in the management of heritage, and to advocate for improvements in international laws and conventions to enable better cultural policies of individual nations for the protection of human rights. The editors submit that it is only through open dialogue between the humanities and jurisprudence that the international community will be able to better protect and value sovereignty, and promote cultural heritage for the development of a better world. This collection is relevant to scholars working in areas relating to law, management and policies of cultural heritage conservation and protection.

*The Gap* Cambridge University Press

"Labics, based in Rome, is a leader among Italy's up-and-coming architecture firms and has gained great international acclaim for submissions to competitions and a number of realized projects. This first-ever monograph on Labic's fast growing, impressive body of work features some twenty of their designs, representing the entire range of the firm's achievements. The selection comprises housing and office buildings, museums and cultural centers, schools, public spaces, and subway

stations, located in Bosnia and Herzegovina, Finland, Iran, Italy, Saudi Arabia, Switzerland, and the UK. All are documented with atmospheric photographs and a wealth of plans and diagrams to illustrate concept and many details of each project. Structure, in a variety of notions of the term, is guiding Labics' approach. Consequently, the book is arranged in five chapters exploring geometric, bearing, circulation, public space, and urban and territorial structures in topical essays. This provides the frame for the featured projects, all of which exemplify the importance of the respective type of structure for Labics' work". (éditeur).

**Public Spaces, Social Relations and Well-being in East London** Open Building Research As a manufacturer of food and animal feed, seeds and chemical products, Monsanto is relentlessly developing and marketing new technologies. The monopoly it has arguably secured by dubious means bears no relation to its negligence with regard to potential risks. Particularly in light of the devastating consequences that are still causing suffering to people and the environment in many places, the company's self-portrayal as a forward-looking, omnipotent force for good seems cynical. The photographer Mathieu Asselin, who lives in France and Venezuela, has tried his hand at the daunting task of exploring the issues surrounding Monsanto. His investigative photographic study manages to capture the complexity of this topic, creating links between past, present and future and illuminating many different aspects from a variety of perspectives.

Writing very bad poetry requires talent. It helps to have a wooden ear for words, a penchant for sinking into a mire of sentimentality, and an enviable confidence that allows one to write despite absolutely appalling incompetence. The 131 poems collected in this first-of-its-kind anthology are so glaringly awful that they embody a kind of genius. From Fred Emerson Brooks' "The Stuttering Lover" to Matthew Green's "The Spleen" to Georgia Bailey Parrington's misguided "An Elegy to a Dissected Puppy", they mangle meter, run rampant over rhyme, and bludgeon us into insensibility with their grandiosity, anticlimax, and malapropism. Guaranteed to move even the most stoic reader to tears (of laughter), Very Bad Poetry is sure to become a favorite of the poetically inclined (and disinclined).

#### SISTRI - LA NUOVA TRACCIABILITÀ DEI RIFIUTI

Usborne Publishing Ltd

Bachelor Thesis from the year 2016 in the subject Communications - Public Relations, Advertising, Marketing, Social Media, grade: A (5,0), Stockholm University (Department of Computer and Systems Sciences), course: Bachelor thesis in computer and systems sciences (IB015F), 15 hec, language: English, abstract: Within the topic of Internet of Things (IoT) smart objects are a key concept. The concept of making everyday objects smart. Smart objects that can understand and react to their environment, creating a smart environment. However, with the fast technological development leading to more smart environments in the physical world, not much research has been done on how this will influence users from an Environmental Psychology perspective. Earlier research on smart technologies has shown that users who received real-time feedback on their behavior got their attitude influenced and also changed their behavior, creating an interest to further explore the possibilities and impact of this technology. Marketing researchers have done Environmental Psychology studies for a long time to examine how other environmental stimuli (light, music, scents and digital signage etc.) influence people's perception, emotions and behaviors using the Mehrabian-Russell model to build stimulating environments also known as atmospheric. This study aims to solve the lack of research on how the emerging smart environments will influence consumers. With the following research question: "How will a retail example of a smart environment influence consumers from an environmental psychology perspective?" The research strategy was a scenario-based case study, where the participants got to experience a retail scenario with a simulated smart environment. The data collection method were in-depth semi-structured interviews that was conducted on 10 participants, randomly selected. Thereafter a thematic analysis was conducted as a data analysis method. Data extracts were theory driven coded and categorized under the environmental psychology themes.

"Ferrante's four-volume novel cycle known in English as the Neapolitan quartet has become a global success, with over ten million readers in close to fifty countries. Her readers recount feeling "addicted" to the novels; they describe a pleasure in reading that is as rare as it is irresistible, a compulsion that leads them either to devour the books or to ration them so as to prolong the pleasure. De Rogatis here addresses that same transnational, diverse, transversal audience. Elena Ferrante's *Key Words* is conceived as a lighted path made of luminous key words that synthesize the multiform aspects of Ferrante's writing and guide us through the labyrinth of her global success."

*Handbook of Online Learning* Kettler Verlag

This Handbook grapples conceptually and practically with what the sharing economy - which includes entities ranging from large for-profit firms like Airbnb, Uber, Lyft, Taskrabbit, and Upwork to smaller, non-profit collaborative initiatives - means for law, and how law, in turn, is shaping critical aspects of the sharing economy. Featuring a diverse set of contributors from many academic disciplines and countries, the book compiles the most important, up-to-date research on the regulation of the sharing economy. The first part surveys the nature of the sharing economy, explores the central challenge of balancing innovation and regulatory concerns, and examines the institutions confronting these regulatory challenges, and the second part turns to a series of specific regulatory domains, including labor and employment law, consumer protection, tax, and civil rights. This groundbreaking work should be read by anyone interested in the dynamic relationship between law and the sharing economy.

*Very Bad Poetry* Berghahn Books

Lyrical, beautifully written tales of life in Africa Africa evokes a deep sense of mystery. It is a place that retains what most of the world has lost: space, roots, traditions, awesome beauty, true wilderness, rare animals, and extraordinary people. In this wonderful and haunting collection of stories, Kuki Gallmann writes of her life in Africa, where every day brings challenge and adventure. *African Nights* is a treasury of memories, in which fascinating people and places are brought to life. The healing powers Africa can have on those who embrace the land as a place of mystery, superstition, danger, and beauty.

*Tuff City* Quintessenz Verlag

Public spaces are a fundamental feature of where we live, representing sites of sociability and acting as a perceived measure of the quality of urban life. The rejuvenation of public spaces is also a key policy concern. This report draws on qualitative research in a multi-ethnic area of East London to consider the social value of spaces. As well as green spaces, the study looks at everyday spaces not usually highlighted in research or policy. It considers spaces along with place attachment, and explores the different types of social encounter spaces afford and analyses relationships between ethnicity and public space, and reflects upon the potential of spaces for fostering inter-ethnic understanding. It investigates links between different public spaces and well-being and discusses social and symbolic aspects of places and highlights a market which encapsulates many of the valued features of public space, shows how regeneration proposals raised 'public space consciousness' and addresses policy implications. By providing a significant contribution to current debates around links between public spaces, social relations and well-being, the findings have particular implications for 'Cleaner, Safer, Greener', 'Community Cohesion', 'Sustainable Communities' and 'Choosing Health' policies. The study will be of interest to policy makers, practitioners and academics in public space, regeneration, community cohesion and community involvement, as well as those with an interest in well being.

Building on the achievements of Goethe in his Theory of Colour, Rudolf Steiner shows how colour affects us in many areas of life, including our health, our sense of well-being, and our feelings. Distinguishing between 'image' and 'lustre' colours, he lays the foundation, based on his spiritual-scientific research, for a practical technique of working with colour that leads to a new direction in artistic creativity. His many penetrating remarks on some of the great painters of the past are supplemented by a deep concern to see a cultural, spiritual renewal emerge in the present time. 'If you realize', he states, 'that art always has a relation to the spirit, you will understand that both in creating and appreciating it, art is something through which one enters the spiritual world.' This volume is the most comprehensive compilation of Rudolf Steiner's insights into the nature of colour, painting and artistic creation. It is an invaluable source of reference and study not only for artists and therapists but for anyone interested in gaining an appreciation of art as a revelation of spiritual realities.

*RNA-seq Data Analysis* Taylor & Francis

Implant dentistry has become a standard option for the rehabilitation of fully and partially edentulous patients. With the ever-increasing number of dentists involved in implant dentistry, it is essential to ensure that their treatment methods follow the highest standard. The ITI Treatment Guide series, a compendium of evidence-based implant-therapy techniques in daily practice, is written by renowned clinicians and provides a comprehensive overview of various therapeutic options. Using an illustrated step-by-step approach, the ITI Treatment Guide shows practitioners how to manage different clinical situations, with the emphasis on sound diagnostics, evidence-based treatment concepts, and predictable treatment outcomes. The second volume of the ITI Treatment Guide is devoted to the restoration of partially dentate patients. Central to this volume of the ITI Treatment Guide are loading protocols available to the clinician and the patient and how they relate to various treatment indications, including both single and multiple missing teeth in the posterior and anterior regions of the mouth. Among potential topics for upcoming volumes are implant placement in extraction sockets, loading protocols in edentulous patients, implant therapy in the esthetic zone in extended edentulous spaces, and many more.

Basic Books

This text provides an understanding of the underlying medical and dental factors involved in the overall complex of peri-implantitis for successful management of the disease.

*Spatial Anthropology* Quintessenza

Several months have passed since the harrowing adventure and near fatal mission to once again save the Earth. Jim Lexington and Primus have been working hard to correct the devastation left behind by Legion and help things on earth return to normal. Now, they become entangled in a deviant and dangerous situation as a new adversary devises a plot to capture the SS Lexington. Jim and his wife, Sarah, along with One and Primus must handle this adversary while an even more sinister and deadly device, left behind by Legion, once again threatens the very existence of earth and the entire solar system. The danger is great and the consequences become even greater, once again leaving it to Jim, Primus and One to correct. But, this time everyone's survival is not only in great peril in many ways, it is a matter of Time as well!

*Elena Ferrante's Key Words* Gruppo 24 Ore

Brings the reader up-to-date on the developments in GBR over the past 20 years. The first four chapters focus on the basic science of GBR in implant dentistry. Helps the reader to understand the biologic and biomaterial background of this well-documented and well-established surgical

technique in implant dentistry—essential knowledge for the use of barrier membranes in patients. Focuses on the clinical applications of GBR. Presents specific indications and describes the criteria for patient selection, the step-by-step surgical procedure, and aspects of postoperative treatment. Reflects the immense progress of GBR in the past 10 to 15 years and the current clinical status of GBR in implant dentistry. Like its predecessor, is a must-have resource for all clinicians with interest and experience in implant dentistry. [editor].

**An Exact and Full Account of the siege of Barcelona by way of journal, from the 2d of April to the 11th of May, 1706. With previous remarks. By an officer who was in the place all the time** SAGE

Founded by Paolo Brescia and Tommaso Principi as a design network between Milan, London and Mumbai, OBR explores new modes of contemporary living, developing an architecture that responds sensitively to and stimulates interaction with its environment, while adapting to the changing needs of society. OBR's work strives to promote a sense of community while enhancing individual identities. In this book, the architects present their work as a communal endeavor. They engage influential people in transdisciplinary dialogues that extend beyond architecture itself, questioning its autonomy and offering new perspectives on its potential and relevance. The monograph showcases a selection of twenty-four international projects by OBR that address key social issues through the medium of architecture.
