#1 NEW YORK TIMES BESTSELLER • From the author of *The Martian*, a lone astronaut must save the earth from disaster in this “propulsive” (Entertainment Weekly), cinematic thriller full of suspense, humor, and fascinating science—in development as a major motion picture starring Ryan Gosling. HUGO AWARD FINALIST • ONE OF THE YEAR’S BEST BOOKS: Bill Gates, *GatesNotes*, New York Public Library, Parade, Newsweek, Polygon, Shelf Awareness, She Reads, Kirkus Reviews, Library Journal • “An epic story of redemption, discovery and cool speculative sci-fi.”—USA Today “If you loved *The Martian*, you’ll go crazy for Weir’s latest.”—The Washington Post Ryland Grace is the sole survivor on a desperate, last-chance mission—and if he fails, humanity and the earth itself will perish. Except that right now, he doesn’t know that. He can’t even remember his own name, let alone the nature of his assignment or how to complete it. All he knows is that he’s been asleep for a very, very long time. And he’s just been awakened to find himself millions of miles from home, with nothing but two corpses for company. His crewmates dead, his memories fuzzily returning, Ryland realizes that an impossible task now confronts him. Hurtling through space on this tiny ship, it’s up to him to puzzle out an impossible scientific mystery—and conquer an extinction-level threat to our species. And with the clock ticking down and the nearest human being light-years away, he’s got to do it all alone. Or does he? An irresistible interstellar adventure as only Andy Weir could deliver, *Project Hail Mary* is a tale of discovery, speculation, and survival to rival *The Martian*—while taking us to places it never dreamed of going.

This volume provides the most up-to-date analysis of the ethnic cleansing of the Crimean Tatars, their exile in Central Asia and their struggle to return to the Crimean homeland. It also traces the formation of this diaspora nation from Mongol times to the collapse of the Soviet Union. A theme which emerges through the work is the gradual construction of the Crimea as a national homeland by its indigenous Tatar population. It ends with a discussion of the post-Soviet repatriation of the Crimean Tatars to their Russified homeland and the social, emotional and identity problems involved.

This open access book collects the major discussions in divorce research in Europe. It starts with an understanding of divorce trends. Why was divorce increasing so rapidly throughout the US and Europe and do we see signs of a turn? Do cohabitation breakups influence divorce trends or is there a renewed stability on the partner market? In terms of divorce risks, the book contains new insights on Eastern European countries. These post socialist countries have evolved dramatically since the fall of the Wall and at present they show the highest divorce figures in Europe. Also the influence of gender, and more specifically women's education as a risk in divorce is examined cross nationally. The book also provides explanations for the negative gradient in female education effects on divorce. It devotes three separate parts to new insights in the post-divorce effects of the life course event by among others looking at consequences for adults and children but also taking the larger family network into account. As such the book is of interest to demographers, sociologists, psychologists, family therapists, NGOs, and politicians. "This wide-ranging volume details important trends in divorce in Europe that hold implications for understanding family dissolution causes and consequences throughout the world. Highly recommended for researchers and students everywhere."

From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters? The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. **THE DISAPPEARING SPOON** masterfully fuses science with the classic lore of invention, investigation, and discovery—from the Big Bang through the end of time. *Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

"A useful, important book that reminds us, at the right time, how hard [European unity] has been, and how much care must be taken to avoid the terrible old temptations." --Los Angeles Times Dark Continent provides an alternative history of the twentieth century, one in which the triumph of democracy was anything but a forgone conclusion and fascism and communism provided rival political solutions that battled and sometimes triumphed in an effort to determine the course the continent would take. Mark Mazower strips away myths that have comforted us since World War II, revealing Europe as an entity constantly engaged in a bloody project of self-invention. Here is a history not of inevitable victories and forward marches, but of narrow squeaks and unexpected twists, where townships boast a bronze of Mussolini on horseback one moment, only to melt it down and recast it as a pair of noble partisans the next. Unflinching, intelligent, Dark Continent provides a
