Compact Utility Tractors,

or CUTs, are cute little cutters! As farming became more refined so did the needs of tractors. The answer was a smaller, more maneuverable and fuel-efficient tractor with a variety of implements and attachments. With this focus on special needs, attachments became available such as plows, disc harrows, mower decks, cultivators, spreaders, snowblowers, and more. They have become a necessary utility for farmers, orchards, small construction jobs, and

landscaping/maintenance for estates, parks and golf courses. At the forefront of this evolution was the Farmall Cub and John Deere Model L. Then came the Japanese invasion; a new kind of tractor by companies such as Yanmar and Kubota. These four-wheel drive machines were rugged and tough and used a variety of hydraulically powered attachments. American companies like John Deere, International Harvester, and Massey Ferguson built their own their own four-wheel

versions. Today's compact tractors, such as the Kubota BX series, Massey Ferguson's GC series, and the John Deere 3000, offer an even larger selection of implements for special purposes.

The story revolves around Takemoto Takeru who lives with his aunt and uncle and their young daughter Mari. Takeru was abandoned by his parents when he was very young and has emotional scars, which he keeps buried within himself. His friend Ryou, who lives alone with his younger sister Kimi has a similar

situation in his past and is Takeru's close friend. In school, the two occupy opposite ends of the "popularity scale", with Ryou being popular amongst the girls, where Takeru, well, isn't so popular. Two girls who follow Ryou around are Amika and Sakurako, making up the story's main group of five characters.

McGraw-Hill Professional Application for Employment I refer to the recent death of the Technical Manager at your company and hereby apply for the replacement of the deceased manager.

Each time I apply for a job, I get a reply that there is no vacancy but in this case I have caught you red-handed and you have no excuse because I even attended the funeral to be sure that he was truly dead and buried before applying. Attached to my letter is a copy of my CV and his death certificate. *Crap CVs* is a hilarious compilation of the worst job applications imaginable, including overly-honest cover letters, embarrassing typos, mortifying personal revelations, awkward

interview questions, misplaced self-confidence, self-aggrandizing gibberish, blatant truth-twisting and, of course, outright lies.

There is renewed interest among art photographers in a number of historic printing techniques because of the remarkable effects they produce. The reader will discover how to create beautifully tinted mono- and polychromatic gum

and oil images using the author's version of this 19th century technique. Step-by-step illustrated instructions with directions for further experimentation provide a perfect source for learning this new, yet old, printing technique. Gumoil printing involves contact-printing a positive transparency onto gum-coated paper. Oil paint is then applied and rubbed into nongummed areas of the print. With bleach etching, mono- and polychromatic variations are possible. A chapter on

digital printing combines the new and the historic, making this technique even more accessible for the art photographer. Crap CVs Demos Medical Publishing
