Dramatic changes caused by a foreign-owned nickel mining company in an Indonesian town provide the setting for this ethnographic study. Robinson notes the changes that took place in Soroako, a village in Sulawesi. The book outlines the effects of this new development, principally in regard to the 1,000 indigenous Soroakans whose former agricultural land is now the site for the mining town. It presents an analysis of developing capitalist relations in the mining town, investigating changes not only in the sphere of production manifested in daily life as new forms of work, but also in culture and ideology. The book also investigates related changes in other areas of social life, in particular that of women's roles, marriage and the family, and the importance of ideologies of race and ethnicity in regulating relations between different groups in the mining town. Furthermore, Robinson shows that new ideological forms have arisen in the context of the evolving class structure.

The Indonesian term *adat* means 'custom' or 'tradition', and carries connotations of sedate order and harmony. Yet in recent years it has suddenly become associated with activism, protest and violence. This book investigates the revival of *adat* in Indonesian politics, identifying its origins, the historical factors that have conditioned it and the reasons behind its recent blossoming. It considers whether the *adat* revival is a constructive contribution to Indonesia's new political pluralism or a divisive, dangerous and reactionary force, and examines the implications for the development of democracy, human rights, civility and political stability. *The Revival of Tradition in Indonesian Politics* provides detailed coverage of the growing significance of *adat* in Indonesian politics. It is an important resource for anyone seeking to understand the contemporary Indonesian political landscape.

The entire world of Islam is today in profound ferment. From Morocco to China and from Turkestan to the Congo, the 250,000,000 followers of the Prophet Mohammed are stirring to new ideas, new impulses, new aspirations. The story of that strange and dramatic evolution the author has endeavored to tell in the following pages. Considering in turn its various aspects—religious, cultural, political, economic, social—the author has tried to portray their genesis and development, to analyze their character, and to appraise their potency. While making due allowance for local differentiations, the intimate correlation and underlying unity of the various movements have ever been kept in view. Although the book deals primarily with the Muslim world, it necessarily includes

the non-Muslim Hindu elements of India. The field covered is thus virtually the entire Near and Middle East. The Far East has not been directly considered, but parallel developments there have been noted and should always be kept in mind.

First Published in 2004. Michel Foucault: The Will to Truth is the first full-length study of Foucault in any language. It covers the whole of his work to date, including material unavailable in English, and provides invaluable information on recent French intellectual history. Foucault emerges as an essential thinker for our time: his 'political anatomy' implies a radical critique not only of established intellectual positions, and social institutions, but also most of the alternatives offered by the opposition.
