social media planning
model provides

marketing goals shape
the development of

strategies. Special
attention is given to
the most effective
techniques for

the creation of
personas that
represent the critical
online market
segments for a
company. Students
discover how to put
these well-defined
personas to work in
selecting the optimal
social media platforms
for reaching an

organization's marketing goals. Students are taught rules of engagement and social media ethics for behaving properly as marketers on the social web. With these guidelines in mind, the most productive marketing tactics for each type of major social media platform are examined in depth. These platform-specific tactics, along with all the proceeding material in the book, are brought together in the final chapter to create a comprehensive social media marketing plan, with detailed explanations and illustrations from a real world plan. Extensive consideration is given to monitoring, evaluating, and tuning the implementation of social media marketing

initiatives. In addition, students are introduced to the most useful quantitative and qualitative social media measurements, along with various ways to estimate an organization's return on investment in social media marketing activities. This book considers local autonomy, measured as a multidimensional concept, from a cross-

country comparative perspective, and examines how variations can be explained and what their consequences are. It fills a gap in the literature by providing a comprehensive study of the different components of local autonomy across a large number of countries, over time. It offers a theoretically saturated concept to measure local autonomy and applies it to 39 countries, including all 28 EU member states together with Albania, Georgia, Iceland, Liechtenstein, Macedonia, Moldova, Norway, Serbia, Switzerland Turkey and Ukraine, over a period of 25 years (1990-2014).

Capital Investment and Financial Decisions

Berghahn Books
First published in 1973, this title examines the development patterns of small businesses. It considers why people found firms; the factors that contribute to entrepreneurial success; problems of management succession and inheritance; the strengths and weaknesses of family firms; the reasons why small firms are taken over; and the social, economic and managerial context of their growth, decline, and revival. Based on a survey of sixty-four firms, each employing fewer than five hundred people, in engineering, hosiery, and knitwear, and on the records of 370 similar organisations, a striking gap in performance and

management attitudes emerges as between dynamic, mostly founder-run firms and stagnant, mostly inherited ones. Where many books are either minutely specialised or highly abstract and over-generalised, Jonathan Boswell's work is practical and diagnostic, probing the inner recesses of the small firm sector. With particular relevance to the difficulties faced by entrepreneurs in today's economic environment, this title advances selective measures to deal with old firms and inheritance, and a wide range of policies to encourage new entrepreneurship.

The reputation of

corporate reporting has been in crisis. Trust in the process of financial accounting and auditing has been undermined by a series of high profile scandals involving major corporations, including Enron, Parmalat, Ahold, and Worldcom. In response, regulators and practitioners world-wide have put forward a series of initiatives to repair the damage and restore faith in corporate governance. In this important book, the European Auditing Research Network analyzes how that response has developed in Europe, with particular emphasis on the field of auditing. Leading international academics review how regulation has been revised in specific

European countries to help restore confidence in the contribution of auditing to corporate governance. Various themes are explored, including the growing trend of internationalization in regulation, ethics and auditing, professional liability, and professional education. Auditing, Trust and Governance is an invaluable volume for students, researchers and professionals working in the fields of auditing, accountancy and corporate governance, and provides a useful basis for further research on the effects of the increased regulation. Teaching and the Case Method delves into the special role of teacher and students in the case method learning process. Schools that want to use the case method more effectively can use this book to teach groups of faculty how to apply case method techniques. For the first time, too, a book about case method teaching attempts to show how the method can be applied in a liberal arts setting. A liberal arts module in the book presents an innovative program for instructors who want to experiment with discussion teaching in traditional arts and

science areas. The book focuses on a wide range of knotty problems faced by most instructors, experienced or new, creating an opportunity for them to learn from each other. It's main purpose is to provide a rich opportunity for both professional school and liberal arts instructors to develop their own discussion leadership skills, and to further the process of learning for both themselves and their students. Teaching and the Case Method

In Central and Eastern European countries, inequalities for Roma families living in marginalized communities start early and are striking. Some of these inequalities reflect hard-wired family circumstances such as being born in poverty. Others reflect lack of opportunities such as limited access to those basic goods and services that are necessary not only for realizing one's potential in life, but also for living with dignity. Gaps between Roma and non-Roma widen over the lifecycle in a way that reinforces and perpetuates disadvantage and translates into significantly unequal outcomes, despite the fact that Roma report

having similar aspirations to those of their non-Roma neighbors. Promoting equal opportunities for disadvantaged Roma is not only an imperative for societies that want to call themselves fair, but it is also a smart economic choice, especially in those countries where populations are aging rapidly. Investing early, with a particular emphasis on supporting healthy and cognitive development for disadvantaged Roma children, is likely to go a long way in promoting fair chances. However, leveling the playing field in childhood is likely not enough: disadvantaged Roma continue being exposed to unequal opportunities at key nodes in their lives,

such as when pursuing education or when looking for a job. Therefore, it is as important that a broader set of policies address some of the circumstances in which a large share of Roma children grow up, including access to employment and decent living conditions for their families. Implementing interventions that help overcome these interrelated barriers will require strong ownership at the national level, coordinated policies across different ministries and government levels, and an integrated delivery system that is grounded in approaches that are customized to local conditions and implemented in a

participatory manner. Good practices in Europe and elsewhere show that inclusion of the most disadvantaged - including many Roma - is possible and the current programming cycle for European Funds represents a unique opportunity to fund such interventions.

In all major regions of the world, the economic recession is deep-seated, resulting in mass unemployment, the collapse of state social

programs and the impoverishment of millions of people. The meltdown of financial markets was the result of institutionalized fraud and financial manipulation. The economic crisis is accompanied by a worldwide process of militarization, a "war without borders" led by the U.S. and its NATO allies. This book takes the reader through the corridors of the Federal Reserve, into the plush corporate boardrooms on Wall Street where far-reaching financial transactions are routinely undertaken. Each of the authors in this timely collection digs beneath the gilded surface to reveal a complex web of deceit and media distortion which serves to conceal the workings of the global economic

system and its devastating impacts on people's lives.

The Rise and Decline of Small Firms (Routledge Revivals) Council of Europe

This paper reviews the World Bank's experience with community participation (CP) in a sample of its projects selected from three different sectors; urban housing, population, health and nutrition (PHN), and irrigation. The sample was chosen on a judgmental basis and consisted of forty projects which were

known to have the potential for the use of CP or incorporated it in their strategies, and ten successful projects from the same sectors which did not make use of CP. The focus of the paper is on the approaches to participation employed by the first set of projects and the lessons to be learned from their experience. An analysis of the second set of projects sheds light on the reasons why community participation was neglected by them.
