### **Course 30** John Wiley & Sons

This best seller, now in its eighth edition, makes chemistry exciting by showing why important concepts are relevant to the lives and future careers of readers. The new design, digital images, photos, Career Focus features, and macro-to-micro art enhance the new edition while it retains the many features that have made this book so successful. The writing, as always, is exceptionally friendly. Each section contains sample problems that develop readers' critical-thinking skills. This edition also contains more conceptual problems than ever before and has been redesigned to accommodate new styles of learning and teaching with a wide variety of pedagogical tools. Health and Environmental Notes throughout the book highlight topics that are relevant to readers' lives and are ideal for classroom

discussion. Explore Your World activities in each chapter make chemistry exciting, relevant, and non-threatening. This book is ideally suited for the allied health student, or anyone interested in general, organic, or biological chemistry.

### **Graduate Education in the Chemical Sciences** John Wiley & Sons

This laboratory based text centres itself around decision-making activities, where students apply their chemistry knowledge to realistic situations. This fifth edition includes more photographs, new drawings and new design.

Chemistry in the Community Resources in Education Resources in Vocational Education Graduate Education in the Chemical Sciences Issues for the 21st Century: Report of a Workshop This revision retains the topical balance of the previous edition with half of the coverage devoted to organic chemistry and half to biochemistry. The underlying theme is the molecular basis of life and the text is completely up to date as evidenced by inclusion of discussions of lipoprotein complexes and the

transport of cholesterol in the blood. Strong pedagogical aids include boldface terms, margin comments, worked-out examples, in- chapter exercises, illustrations, chapter summary, review questions and more. The book is designed for undergraduates in chemistry and allied health programs.

Connections to Our Changing World Benjamin-Cummings Publishing Company

For one-semester courses in Basic Chemistry, Introduction to Chemistry, and Preparatory Chemistry, and the first term of Allied Health Chemistry. This text is carefully crafted to help students learn chemical skills and concepts more effectively. Corwin covers math and problem-solving early in the text; he builds student confidence and skills through innovative problem-solving pedagogy and technology formulated to meet student needs.

### **CURRENT INDEX TO JOURNALS IN EDUCATION**

PRUFROCK PRESS INC.

Graduate Education in the Chemical Sciences is a summary of the December 1999 workshop, "Graduate Education in the Chemical Sciences: Issues for the 21st Century,"This workshop discussed the various features of graduate education in chemical science and technology. Using case histories and their individual experiences, speakers examined the current status of graduate

education in the chemical sciences, identified problems and opportunities, and discussed possible strategies for improving the system. The discussion was oriented toward the goal of generating graduates who are well prepared to advance the chemical sciences in academia, government, and industry in the next 5 to 10 years.

Holt McDougal

The Fifth Edition retains the pedagogical strengths that made the previous editions so popular, and has been updated, reorganized, and streamlined. Changes include more accessible introductory chapters (with greater stress on the logic of the periodic table), earlier introduction of redox reactions, greater emphasis on the concept of energy, a new section on Lewis structures, earlier introduction of the ideal gas law, and a new development of thermodynamics. Each chapter ends with review questions and problems.

### **ISSUES FOR THE 21ST CENTURY: REPORT OF A WORKSHOP**

Copyright Office, Library of Congress

Based on the premise that knowledge of evolutionary theory is essential for understanding the natural world, this document was designed to assist science teachers and others as they consider the issues that influence the teaching of evolution. The position is taken that there is no conflict between data and sound theories based on science and religious beliefs based on the Bible.

Information and perspectives are presented under the topic headings of: (1) "The Genesis of Genesis"; (2) "Early Science Interprets Genesis"; (3) "New Data"; (4) "Creationism versus

Science"; and (5) "Two Kinds of Knowledge." References are listed and the National Science Teacher Association's position statement on the "Inclusion of Nonscience Tenets in Science Instruction" is included. (ML)

## GENERAL, ORGANIC, AND BIOLOGICAL CHEMISTRY

Prentice Hall

What do chocolate chip cookies, chemistry and logic have in common? They are the basis for a unit that lets students become actively engaged in discovering the arrangement of the periodic table. This learning activity takes the periodic table out of the static presentation usually associated with textbooks and chemistry courses and interjects an element of discovery. The two activities in this unit provide students with information that

they have to arrange in organized charts. In the process of creating the arrangements, students will be involved in problem solving and will gain an appreciation for the scientific process of exploration and verification. This dynamic unit meets national science standards in seven teaching and content areas. Bring the periodic table to life with this hands-on, minds-on unit. Book jacket.
