This book contains over fifty passages of Latin from 200 BC to AD 900, each with translation and linguistic commentary. It is not

intended as an elementary reader (though suitable for university courses), but as an illustrative history of Latin covering more than a millennium, with almost every century represented.

Conventional histories cite constructions out of context, whereas this work gives a sense of the period, genre, stylistic aims and idiosyncrasies of specific passages. 'Informal' texts, particularly if they portray talk, reflect linguistic variety and change better than texts adhering to classicising norms. Some of the texts are recent discoveries or little known. Writing tablets are well represented, as are literary and technical texts down to the early medieval period, when striking changes appear. The commentaries identify innovations, discontinuities and phenomena of long duration. Readers will learn much about the diversity and development of Latin.

A comprehensive and practical handbook on the teaching of classical subjects within the UK school system. Changing Classics in Schools ultimately looks towards making classics accessible to

a new generation of students. The first part of the book looks at classics in primary schools, and its relationship with the curriculum and the Primary National Strategy. Drawing on evidence from a storytelling project with primary schools in east London, it shows how an oral retelling of Homer's Iliad can both provide a stimulating introduction to the classical world and make a significant contribution to literacy teaching. In the second half of the book, the author examines the role of ICT in promoting effective teaching and learning and in extending access to Latin. Tracing the history of the Cambridge Online Latin Project, he looks at the creation of electronic resources and setting up Latin in schools with no Latin specialist teacher as part of a DfES-funded pilot.

The first mention of Christian Latin hymns by a known author occurs in the writings of St. Jerome who states that Hilary, Bishop of Poitiers (c. 310-366), a noted author of commentaries and theological works, wrote a Liber Hymnorum. This collection has never been recovered in its entirety. Hilary's priority as a hymn writer is attested by Isidore of Seville (d. 636) who says: Hilary,

however, Bishop of Poitiers in Gaul, a man of unusual eloquence, was the first prominent hymn writer. More important than his prior claim is the motive which actuated him, the defense of the Trinitarian doctrine, to which he was aroused by his controversy with the Arians. A period of four years as an exile in Phrygia for which his theological opponents were responsible, made him familiar with the use of hymns in the oriental church to promote the Arian heresy. Hilary wrested a sword, so to speak, from his adversaries and carried to the west the hymn, now a weapon of the orthodox. His authentic extant hymns, three in number, must have been a part of the Liber Hymnorum. Ante saecula qui manens, "O Thou who dost exist before time," is a hymn of seventy verses in honor of the Trinity; Fefellit saevam verbum factum te, caro, "The Incarnate Word hath deceived thee (Death)" is an Easter hymn; and Adae carnis gloriosae, "In the person of the Heavenly Adam" is a hymn on the theme of the temptation of Jesus. They are ponderous in style and expression and perhaps too lengthy for congregational use since they were destined to be superseded. In addition to these the hymn Hymnum dicat turba fratrum, "Let your hymn be sung, ye faithful," has been most persistently associated with Hilary's name. The earliest text occurs in a seventh century manuscript. It is a metrical version of the life of Jesus in seventy-four lines, written in the same meter as that of Adae carnis gloriosae.

While ample studies exist on ditransitives in various languages, notably from a typological perspective, more work needs to be done on identifying the main processes and factors that trigger and constrain the changes they undergo over time. The goal of

this volume is to help fill this gap by bringing together data and information on individual languages that have thus far been left out of the discussion and by expanding our knowledge of already studied linguistic traditions so as to achieve a broader diachronic description. Since one of the distinctive features of ditransitives is their synchronic variability in terms of structural alternation and alignment split, diachronic research can throw up new insights into developmental dynamics that are eminently complementary; namely, on the one hand, the emergence, development and loss of construction alternation and, on the other, the acquisition of new functions over time. The analyses offered in the book yield different and interconnected answers to the general question of how ditransitives change by drawing on different functional principles that play a role in the diachronic reorganization of this dynamic domain and by providing a number of original theoretical suggestions.

During the 17th and 18th century musicians' mobilities and migrations are essential for the European music history and the cultural exchange of music. Adopting viewpoints that reflect different methodological approaches and diversified research cultures, the book presents studies on central scopes, strategies and artistic outcomes of mobile and migratory musicians as well as on the transfer of music. By looking at elite and non-elite musicians and their everyday mobilities to major and minor centers of music production and practice, new biographical patterns and new stylistic paradigms in the European East, West and South emerge.

"This book provides the first detailed overview of research on rulership in theory and practice, with a particular emphasis on the monarchies of Bohemia, Hungary and Poland in the High and Late Middle Ages. The contributions examine the legitimation of rule of the first local dynasties, the ritual practice of power, the ruling strategies and practices of power in the established monarchies, and the manifold influences on the rulership in East Central Europe from outside the region (such as from Byzantium, and the Holy Roman Empire). The collection shows that these ideas and practices enabled the new polities to become legitimate members of Latin Christendom"--

This volume, first published in 1974, offers a selection of modern perspectives on Seneca, covering his prose treatises, his letters and his tragedies. For centuries literary and philosophical circles had to take Seneca seriously, even if they could not always respect him, and although his reputation has fluctuated, there has been a revival of interest in his achievements. Accordingly, a large part of Seneca is devoted to this later influence at the deliberate expense of not covering all of Seneca's less familiar works. The Moral Essays, the tragedies and the letters to Lucilius are examined by the contributors, who also discuss Seneca's philosophical influence and the Senecan heritage in English and neo-Latin literature. Each essay contains insightful and sometimes controversial material, which is of value to the specialist as well as to students of Latin, English or French literature.

"The Dialectical Questions offers an English translation of the *Erotemata Dialectices*, the final and fullest textbook on the art of argumentation written by the reformer and educational innovator Philip Melanchthon (1497-1560). Representing an era when rhetoric and dialectic were seen as interdependent, companion arts, Melanchthon's textbook was widely used in Protestant Latin schools and universities during the Reformation. The translation tracks revisions to the text across its lifetime editions (1547-1560) and traces its classical sources. The introduction

chronicles the personal and political upheavals that Melanchthon experienced during its composition, and provides an overview of its rich and complex content. It then focuses on the unique feature that sets this work apart from other early modern dialectics: its many sample arguments drawn from medicine and natural philosophy"--
