*Rethinking Reference for Academic
Libraries* American Library Association
Rethinking Reference for Academic
Libraries: Innovative Developments and
Future Trends, containing five sections
and fourteen chapters, reviews the
current state of reference services in

academic libraries with an emphasis on
innovative developments and future
trends. The main theme that runs
through the book is the urgent need for
inventive, imaginative, and responsive
reference and research services.

Planning for the Future American
Library Association

Search skills of today bear little
resemblance to searches through print
publications. Reference service has

become much more complex than in the past, and is in a constant state of flux. Learning the skill sets of a worthy reference librarian can be challenging, unending, rewarding, and-- yes, fun.

From Text to Art to Culture ABC-CLIO

Examines the issues of reference context and discoverability in school, public, and academic libraries, as well as within the reference publishing community.

Reference and Information Services

Rowman & Littlefield

"Fully a third of all library supervisors are "managing in the middle: " reporting to top-level managers while managing teams of peers or paraprofessional staff in some capacity. This practical handbook is here to assist middle managers navigate their way through the challenges of multitasking and

continual gear-shifting. The broad range of contributors from academic and public libraries in this volume help librarians face personal and professional challenges by Linking theoretical ideas about mid-level management to real-world situations Presenting ways to sharpen crucial skills such as communication, productivity, delegation, and performance management Offering specific advice on everything from supervision to surviving layoffs Being a middle manager can be a difficult job, but the range of perspectives in this book offer strategies and tips to make it easier."

The Basic Business Library Rowman & Littlefield

This reference work documents every aspect of the American public library

experience through topical entries, statistics, biographies, and profiles.

REFERENCE REBORN

ABC-CLIO

Presents a collection of papers updated from original presentations at the Current and Future Trends conference in Aurora, Colorado, capturing the latest innovations in reference work and exploring possible future trends.

New Methods and New Services for a New Age American Library Association Reference collections and services have changed considerably in the last three decades. We have moved from all services coming from the reference desk to a more fluid environment where users can be served in person, by phone, email, virtual reference/chat, instant

messaging, texting, skyping, etc.

Collections have changed too- from print collections, microfilm, microfiche and microcards to e-resources and e-books plus e-research collections in institutional archives. Although we see many libraries still providing traditional services, others have begun to move away from this model and try to develop and offer services and collections which will better serve their user population. With technology changing so fast, users expect to communicate with the library in whatever way they choose. They also want to obtain information with little effort on their part. Managing Reference Today: New Models and Practices • highlights newly developed service models that libraries are developing as well as the way they are handling

changing reference collections. • describes new ways of providing reference services and new ideas of how to select and manage reference collections. • Identifies the best practices for meeting the needs of current and future library users in academic, special, and public library settings.

THE ROUTLEDGE RESEARCH COMPANION TO ANGLO-ITALIAN RENAISSANCE LITERATURE AND CULTURE

Brepols Pub

Broadly representative of important perspectives and aspects within the profession as well as featuring important voices beyond the professional realm, Library 2020 presents thought-provoking

and illuminating visions from many points of view. It is both required reading for library leaders and trustees as well as an ideal supplemental text for LIS classes looking at the future of the profession.

Past, Present and Future University of Missouri Press

An in-depth understanding of the complexities, dynamics, and emerging trends in community college libraries today. • Provides insights from two librarians experienced in working in community college libraries who are networked across the country with seasoned community college librarian colleagues • Includes chapter summaries and real-world stories make the content useful and relevant as well as easy to use • Covers issues of paramount

importance, including assessment, advocacy, and information literacy variations • Appropriate for existing community college librarians, directors, and paraprofessionals as a professional development resource as well as an orientation tool for new librarians moving into a community college assignment

Meeting the Needs of Student Users in Academic Libraries Purdue University Press

The all-in-one “Reference reference” you’ve been waiting for, this invaluable book offers a concise introduction to reference sources and services for a variety of readers, from library staff members who are asked to work in the reference department to managers and others who wish to familiarize

themselves with this important area of librarianship. Written in an accessible style and designed for everyday use, it presents an overview of the basic tools and techniques of reference work, including “Reference Services,” a section addressing such important topics as telephone reference, the reference interview, and electronic reference “Reference Sources,” chapters which focus on types of reference tools, including encyclopedias, dictionaries, directories, handbooks, and almanacs Appendixes with key documents prepared by the Reference and User Services Association (RUSA) and an annotated bibliography An excellent training tool for both new and experienced staff, *Fundamentals of Reference* will quickly become your

fundamental reference!

BREATHING NEW LIFE INTO PUBLIC SERVICES LIBRARIANSHIP

Ams PressInc

Social web technologies present an often confusing array of options for answering user reference questions. Applying 20 years' experience as a reference librarian working through the development of virtual reference and the integration of new tools and technologies into the industry, Thomsett-Scott lays out how libraries are using vendor services such as LibraryH3lp, LibAnswers, and Text a Librarian, as well as free tools like Twitter and Google Voice for their reference needs. Practitioners offer details on virtual reference services such as Twitter

Search, instant messaging services such as Google Voice and Chat, and collaborative services such as My Info Quest.

Reinventing Reference Neal Schuman
Pub

This text reviews the evolution of the field of visualization, providing innovative examples from various disciplines, highlighting the important role that visualization plays in extracting and organizing the concepts found in complex data. Features: presents a thorough introduction to the discipline of knowledge visualization, its current state of affairs and possible future developments; examines how tables have been used for information visualization in historical textual documents; discusses the application of

visualization techniques for knowledge transfer in business relationships, and for the linguistic exploration and analysis of sensory descriptions; investigates the use of visualization to understand orchestral music scores, the optical theory behind Renaissance art, and to assist in the reconstruction of an historic church; describes immersive 360 degree stereographic visualization, knowledge-embedded embodied interaction, and a novel methodology for the analysis of architectural forms.

Reference Renaissance Elsevier

Thoroughly updated, this is the essential guide to one of the most fundamental fields in the library profession. It links you—and through you, your patrons—to the significant changes that have occurred in reference and information

sciences with emphasis on the growth of digital content. • Provides a comprehensive text edited by two highly regarded experts in reference and academic librarianship, Linda C. Smith and Melissa A. Wong, with chapters written by some of the best minds in the library science field • Includes newly updated information that reflects today's realities in reference service with an indication of how reference service may be provided to meet changing patron needs in the future • Encompasses the effective use of print sources, free online sources, and fee-based sources • Features individual chapters that can be used for in-service staff training or in student course packs

NEW MODELS AND BEST PRACTICES

Baker Academic

The seventh edition of this frequently adopted textbook features new or expanded sections on social justice research, data analysis software, scholarly identity research, social networking, data science, and data visualization, among other topics. It continues to include discipline experts' voices. The revised seventh edition of this popular text provides instruction and guidance for professionals and students in library and information science who want to conduct research and publish findings, as well as for practicing professionals who want a broad overview of the current literature. Providing a broad introduction to research design,

the authors include principles, data collection techniques, and analyses of quantitative and qualitative methods, as well as advantages and limitations of each method and updated bibliographies. Chapters cover the scientific method, sampling, validity, reliability, and ethical concerns along with quantitative and qualitative methods. LIS students and professionals will consult this text not only for instruction on conducting research but also for guidance in critically reading and evaluating research publications, proposals, and reports. As in the previous edition, discipline experts provide advice, tips, and strategies for completing research projects, dissertations, and theses; writing grants; overcoming writer's block; collaborating

with colleagues; and working with outside consultants. Journal and book editors discuss how to publish and identify best practices and understudied topics, as well as what they look for in submissions. Features new or expanded sections on social justice research; virtual collaboration, data collection, and dissemination; scholarly communication; computer-assisted qualitative and quantitative data analysis; scholarly identity research and guidelines; data science; and visualization of quantitative and qualitative data Provides a broad and comprehensive overview and update, especially of research published over the past five years Highlights school, public, and academic research findings Relies on the coauthors' expertise in research design, securing

grant funding, and using the latest technology and data analysis software
Teaching Reference Today Rowman & Littlefield

An essential resource for LIS master's and doctoral students, new LIS faculty, and academic librarians, this book provides expert guidance and practical examples based on current research about quantitative and qualitative research methods and design.

Conducting research and successfully publishing the findings is a goal of many professionals and students in library and information science (LIS). Using the best methodology maximizes the likelihood of a successful outcome. This outstanding book broadly covers the principles, data collection techniques, and analyses of quantitative and qualitative methods as

well as the advantages and limitations of each method to research design. It addresses these research methods and design by discussing the scientific method, sampling techniques, validity, reliability, and ethical concerns along with additional topics such as experimental research design, ethnographic methods, and usability testing. The book presents comprehensive information in a logical, easy-to-follow format, covering topics such as research strategies for library and information science doctoral students; planning for research; defining the problem, forming a theory, and testing the theory; the scientific method of inquiry and data collection techniques; survey research methods and questionnaires; analyzing

quantitative data; interview-based research; writing research proposals; and even time management skills. LIS students and professionals can consult the text for instruction on conducting research using this array of tools as well as for guidance in critically reading and evaluating research publications, proposals, and reports. The explanations and current research examples supplied by discipline experts offer advice and strategies for completing research projects, dissertations, and theses as well as for writing grants, overcoming writer's block, collaborating with colleagues, and working with outside consultants. The answer to nearly any question posed by novice researchers is provided in this book. Now in its sixth edition, the book provides new and

updated content that is even more comprehensive than before and contains added sections featuring the voices of prominent LIS scholars, researchers, and editors "Voices of the Experts" text boxes provide researchers' advice on specific methods and identify what was most important or most valuable about using a particular method and software for analysis—e.g., NVivo, SurveyMonkey, and log capture Written by coauthors with extensive expertise in research design, securing grant funding, and using the latest technology and data analysis software

REFERENCE & USER SERVICES QUARTERLY

ABC-CLIO

Because of its centrallocation in the Old

World, the Adriatic Sea has long been explored and studied. Modern methods of investigation, however, have accelerated the pace of study during the last decade. These are the ADCP currentmeter, satellite imagery, drifter technology, and, last but not least, the computer with its arsenal of tools for data analysis and model simulations. As a result of this renaissance, the Adriatic Sea and its sub-basins are currently the object of intensified scrutiny by a number of scientific teams, in Europe and beyond. Questions concerning the mesoscale variability that dominates regional motions, the seasonal circulation of the sea, and its long-term climatic role in the broader Mediterranean, have become topics of lively discussions. The time was ripe

then when an international workshop dedicated to the physical oceanography of the Adriatic Sea was convened in Trieste on 21-25 September 1998. Its objectives were to assess the current knowledge of the oceanography of the Adriatic Sea, to review the newly acquired observations, to create synergy between model simulations and observations, and to identify directions for future Adriatic oceanography. This book, however, is not the mere proceedings of the workshop. It was written as a monograph synthesizing the current knowledge of the physical oceanography of the Adriatic Sea, with the hope that it will serve as a reference to anyone interested in the Adriatic. The book also identifies topics in need of additional inquiry and proposes research

directions for the next decade.

Linguistics and New Testament Greek ABC-CLIO

Repositioning Reference reimagines reference services in libraries and information organizations and the role of reference librarians, taking into account rapid developments in technology and information-specific services in non-library sectors.
