The processes of democratization and regionalization in South America ran parallel to one another between 1985 and 1991. However, the nature of this relationship is by no means clear. This book explores the diplomatic history of the formation of Mercosur and analyzes the precise place of democracy in the process. At the methodological level, a combination of hitherto unexamined documents and extensive interview material makes for a novel oral history approach to diplomatic studies. At the theoretical level, a melding of cognitive approaches to foreign policy making and realist theory of international relations provides a nuanced but systematic explanation of events.

Solid State Drives (SSDs) are gaining momentum in enterprise and client applications, replacing Hard Disk Drives (HDDs) by offering higher performance and lower power. In the enterprise, developers of data center server and storage systems have seen CPU performance growing exponentially for the past two decades, while HDD performance has improved linearly for the same period. Additionally, multi-core CPU designs and virtualization have increased randomness of storage I/Os. These trends have shifted performance bottlenecks to enterprise storage systems. Business critical applications such as online transaction processing, financial data processing and database mining are increasingly limited by storage performance. In client applications, small mobile platforms are leaving little room for batteries while demanding long life out of them. Therefore, reducing both idle and active power consumption has become critical. Additionally, client storage systems are in need of significant performance improvement as well as supporting small robust form factors. Ultimately, client systems are optimizing for best performance/power ratio as well as performance/cost ratio. SSDs promise to address both enterprise and client storage requirements by drastically improving performance while at the same time reducing power. Inside Solid State Drives walks the reader through all the main topics related to SSDs: from NAND Flash to memory controller (hardware and software), from I/O interfaces (PCIe/SAS/SATA) to reliability, from error correction codes (BCH and LDPC) to encryption, from Flash signal processing to hybrid storage. We hope you enjoy this tour inside Solid State Drives.

America's #1 radio talk-show host and multi-million-copy #1 New York Times bestselling author presents the second book in a series for young readers with a history teacher who travels back in time to have adventures with exceptional Americans. Rush Revere rides again! Saddle up with Rush Limbaugh's really good pal for a new time-travel adventure. "Whoa there, young historians! Before we go rush, rush, rushing off anywhere, I'd like a moment. I'm Liberty, Rush Revere's loquacious equine companion—his trusty talking horse! Always at the ready to leap from the twenty-first century into America's past, that's me. When he says 'Let's go!' I'm so there. I'm jazzed, I'm psyched, I'm—" "Ah, excuse me, Liberty?" "Yeah, Rush?" "Usually you say 'oh no, not again!' and 'while we're in colonial Boston, can I try the baked beans?'" "Okay, fine—you do the talking. I'll just be over here, if you need me..." Well, he's sulking now, but I couldn't be your tour guide across time without Liberty! His name says it all: the freedom we celebrate every July Fourth with

fireworks and hot dogs (and maybe some of those baked beans). But how did America get free? How did thirteen newborn colonies tell the British king where he could stick his unfair taxes? Jump into the bustling streets of Boston in 1765, where talk of revolution is growing louder. I said LOUDER. You'll have to SHOUT to be heard over the angry cries of "Down with the king!" and "Repeal the Stamp Act!" that fill the air. You'll meet fierce supporters of liberty like Samuel Adams, Benjamin Franklin, and my idol, Paul Revere, as they fearlessly defy British rule. It's an exciting, dangerous, turbulent, thrilling time to be an American...and exceptional young patriots like you won't want to miss a minute. Let's ride!
