It takes more than raw talent and passion to make it in today's global apparel and accessories markets-excellent computer-aided design skills are a prerequisite. CAD for Fashion Design and Merchandising allows students to immediately begin creating digital fashion presentations using Adobe Illustrator® and Photoshop®. This book takes an integrated approach, allowing students to master the three-dimensional benefits of combining the two software programs. Colorful illustrations accompany easy, step-by-step tutorials that are geared toward students at the beginner and intermediate levels. Because the book uses fashion photography rather than hand-drawn illustrations as a basis for demonstrating the proportion of fashion croquis, instructors will be able to evaluate students' mastery of digital illustration regardless of their hand-drawing skills, and students will benefit from a seamless transition from creative thought to digital rendering. My Color Companion Scholastic Inc.

My Color Companion, the idea for this book comes from my own need, to always keep records of my colors, it is the first thing I do, when I get new pencils, markers or pens, as an artist I also test fineliners and pencils, I have handdrawn the 30 different templates inside this book (each template is repeated 4 times in the book), I recommend that you use a piece of cardstock between the pages when you test markers. The book is printed on the same paper as 90 % of most of the coloring books you will find on Amazon, which means it is a great place to test how your colors will work in the books, and create your own unique color palettes that are your style. Also check out the pocket edition with 15 different templates (also repeated 4 times, giving you a whole 60 single pages to work with your colors on).

IMPORTANT: watercolor and marker pages have black-backed pages to minimize bleed-through. The paper in this book (depending on where it was printed) is fairly tough, but obviously thinner than watercolor paper. Colors can look splotchy until completely dry. We recommend using a sheet of card stock or plastic to help protect the pages underneath from colors bleeding through as well as potential rub-through of pencil pigments while swatching. You can make PERSONAL COPIES of the charts you plan to use onto your favorite paper or card stock if the paper in this book feels too thin for your needs, or, if you just want to put those pages of the charts you are using into a ring binder for safe keeping. You can also deconstruct this book for ease of use, so feel free to take it apart, keep the pages you are using in one binder, and store the rest in case you need them later. Many office supply stores (and FedEx service centers) will remove the spine and even spiral-bind or punch holes in the book for you for a small fee. If you choose to do it yourself, I have a step-by-step tutorial using another book (Creative Companion Book Binding DIY) on my blog at [rubycharmcolors.com](#). Or keep it as is--the choice is yours! It is meant to be a book that grows along with you and your artistic needs! Happy color swatching!
