Harmony

Janet Lansbury’s advice on respectful parenting is quoted and shared by

millions of readers worldwide. Inspired by the pioneering parenting philosophy of her friend and mentor, Magda Gerber, Janet's influential voice encourages parents and child care professionals to perceive babies as unique, capable human beings with natural abilities to learn without being taught; to develop motor and cognitive skills; communicate; face age appropriate struggles; initiate and direct independent play for extended periods; and much more. Once we are able to view our children in this light, even the most common daily parenting experiences become stimulating opportunities to learn, discover, and to connect with our child. "Elevating Child Care" is a collection of 30 popular and widely read articles from Janet's website that focus on some of the most common infant/toddler issues: eating, sleeping, diaper changes, communication, separation, focus and attention span, creativity, boundaries, and more. Eschewing the quick-fix 'tips and tricks' of popular parenting culture, Janet's insightful philosophy lays the foundation for a closer, more fulfilling parent/child relationship, and children who grow up to be authentic, confident, successful adults.

[Practices for Raising Conscious, Confident, Caring Kids](#) Golden Guides from St. Martin's Press

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being

and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed

at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

A REVOLUTION IN PARENTING

Professional Parenting

In this easy-to-read, science-based book, parents, caregivers, and adults of all kinds discover how discipline affects children's development, why intervention should reinforce connection not separation, and why the disciplinary strategies that may have been used on us as children are not the ones that children really need. As a practicing child and family psychologist and advisor to the British Columbia ministry of children and families, Dr. Vanessa has seen it all, and she has navigated hundreds of tough situations with families. Drawing on scientific research and a wealth of clinical experience, she shows you how to put out the fire without dampening your child's spirits; how to correct their behavior while emphasizing connection; and how to discipline without damage. *How to Raise Empowered, Resilient, and Conscious Children* Hodder Faith Winner of Child Magazine's Best Parenting Boo of 1991. "An honest look at how children can drive the most loving parent to periodic madness, along with practical suggestions for how to cope."—Adele Faber.

Anger Control Parenting: How to Effectively Discipline Your Children with Confidence and Self-Control by Vivian S.

Lamphear, Ph.D. and Sherry Marlar is a unique parenting book that teaches anger control in addition to behavior management skills for effectively disciplining children without losing your temper.

The Discipline of Teamwork Simon and Schuster

Discipline is not a four-letter word. As a respected child psychologist and mom with more than 20 years' experience, Dr. Ruth Peters knows that kids can be manipulative--and she offers parents a positive, no-nonsense approach to bringing about family harmony. Kids know exactly what to do when their parents relinquish authority--take advantage! Don't Be Afraid to Discipline focuses on several ineffective parenting styles that kids thrive on, such as the emotionally needy parents or the happiness-seeking parent. Dr. Peters also helps parents identify which tactics their children like to use best, whether it's provoking parental guilt or pitting Mom against Dad. Don't Be Afraid to Discipline helps parents avoid these common pitfalls by establishing clear, consistent, fair rules for both themselves and their kids. There are no surprises and no complaints, because the kids know exactly what will happen if they misbehave. The book features behavior management charts tailored for elementary middle and high schoolers, information on attention deficit disorder, specific advice on the special disciplinary problems of single parents and stepfamilies, and a frank discussion about children who are seriously troubled. Don't Be Afraid to Discipline is a welcome approach to child misbehavior for weary parents in need of simple, direct answers.

Discipline Without Damage Vintage

There are children who act out in school because of problems at home; there are children who act out at home because of behavior they learn at school. The question that parents and educators must keep in mind when disciplining these children is not simply how to alter misbehavior, but in helping children express their autonomy in a more controlled, manageable way. The pivotal approach of this book lies in helping children develop this sense of self-control. This book takes the unique perspective of integrating management and discipline, giving readers the tools to think about and handle self-discipline and misbehavior in children. Instead of directing the focus on how to handle misbehavior, readers are shown the tactics for avoiding discipline problems, using numerous discipline scenarios and applications. Pertinent case studies and incidents help readers think through the problem and apply the appropriate ideas and actions. There is timely coverage of important research findings on motivations, establishing authority, managing the physical environment and many other significant topics. There are also in-depth discussions on group dynamics, motivations and discipline, dealing with persistent misbehavior, and handling serious misbehavior problems. Educators, administrators, school counselors, and parents.
