Today's super high-performance bikes are the most potent vehicles ever sold to the public and they demand advanced riding skills. This is the perfect book for riders who want to take their street riding skills to a higher level. Total Control explains the ins and outs of high-performance street riding. Lee Parks, one of the most accomplished riders, racers, authors and instructors in the world, helps riders master the awe-inspiring performance potential of modern motorcycles. This book gives riders everything they need to develop the techniques and survival skills necessary to become a proficient, accomplished, and safer street rider. High quality photos, detailed instructions, and

professional diagrams highlight the intricacies and proper techniques of street riding. Readers will come away with a better understanding of everything from braking and cornering to proper throttle control, resulting in a more exciting yet safer ride. Most social science studies on automobility have focused on the production, usage, identity construction and aesthetic improvements of personal means of transportation. What happens if we shift the focus to the labour, knowledge and social relations that go into the unavoidable moments of maintenance and repair? Taking motorcycling in Romania as an ethnographic entry point, this book documents how bikers handle the inevitable moments of malfunction and breakdown. Using both mobile and sedentary research methods, the book describes the joys and troubles experienced by amateur mechanics, professional mechanics and untechnical men and women when fixing bikes.
