The International Maritime Dangerous Goods (IMDG) Code was developed as a uniform international code for the transport of dangerous goods by sea covering such matters as packing, container traffic and stowage, with particular reference to the segregation of incompatible substances. The IMDG Code, as amended by Amendment 37-14, is mandatory from 1 January 2016 but may be applied by Administrations in whole or in part on a voluntary basis from 1 January 2015. The Code has undergone many changes over the years, in both format and content, in order to keep up with the rapid expansion of the shipping industry. Amendment 37-14 includes revisions to various sections of the Code and to transport requirements for specific substances. It was adopted by IMO's Maritime

Safety Committee (MSC) at its ninety-third session in May 2014. The code lays down basic principles: detailed recommendations for individual substances, materials and articles, and a number of recommendations for good operational practice, including advice on terminology, packing, labelling, stowage, segregation and handling, and emergency response action

The International Maritime Dangerous Goods Code relates to the safe carriage of dangerous goods by sea, but does not include all details of procedures for packing of dangerous goods or actions to take in the event of an emergency or accident involving personnel who handle goods at sea. These aspects are covered by the publications that are associated with the IMDG Code, which are included in this Supplement. Within a continuing process of revision of publications that are relevant to the IMDG Code, the EmS Guide: Emergency Response Procedures for Ships Carrying Dangerous Goods has been further amended at the 81st session of MSC in May 2006 and the details have been described in MSC.1/Circ.1025/Add/1. The International Code for the Safe Carriage of Packaged Irradiated Nuclear Fuel, Plutonium and High-Level Radioactive Wastes on Board Ships has been amended. This Supplement also includes texts of the Medical First Aid Guide, descriptions of the reporting procedures for incidents involving dangerous goods, harmful substances and/or marine pollutants, the IMO/ILO/UNECE Guidelines for Packing of Cargo Transport Units, the Recommendations on the Safe Use of Pesticides in Ships and other appropriate Assembly resolutions, resolutions and Circulars of the Maritime Safety Committee and Circulars of the Facilitation Committee and of the Sub-Committee on Dangerous Goods, Solid Cargoes and Containers.

International Maritime Dangerous Goods Code lays out the regulatory framework for all aspects of handling dangerous goods and marine pollutants in sea transport. Amendment 35-10 includes revisions to various sections of the Code and to transport requirements for specific substances. It was adopted by the International Maritime Organization's Maritime Safety Committee at its 87th session in May 2010. The Code as amended by Amendment 35-10 is mandatory as from 1 January 2012 but may be applied by Administrations in whole or in part on a voluntary basis from 1 January 2011. The provisions of the Code should be of interest to maritime administrations, shipping companies, manufacturers, packers, shippers, feeder services such as road and rail, and port authorities ---Publisher's description.

Since it was first published in 1964, Elements of Shipping has become established as a market leader. Now this new edition has been entirely updated and revised to take in the many changes

that have occurred in the shipping industry in recent years and the increased emphasis placed on professionalism, qualified personnel and the need for the latest available technology. With new chapters on seaports and electronic data interchange, it explains in a lucid, professional manner the basic elements of shipping embracing operating, e-commerce/computerization (shipboard/trade), commercial, legal, economic, technical, managerial, logistics and financial considerations. It also reflects recent major trends including the impact of globalization, current good practice and future trends. All twenty-two chapters have been updated and over half of the content is new. Filling a gap for the discerning reader who wishes to have a complete understanding of all the elements of the global shipping scene together with the interface with seaports, international trade and logistics, it remains essential reading for shipping executives along with students and academics with an interest in the shipping industry.

Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.
