## **HOW TO INTERPRET THE HOUSE-TREE-PERSON TEST**

House Tree Person Test  
Interpretation Interpretation of the House-Tree-Person (HTP) Psychology Test. The House-Tree-Person (HTP) test in clinical psychology is part of the series of a group of projective tests which help in the assessment of personality traits. The HTP test is also administered to identify mental disorders like schizophrenia. Get to know how this test is interpreted. Interpretation of the House-Tree-Person (HTP) Psychology Test The house-tree-person test can be an effective way to evaluate

children, people with brain damage and people with a limited ability to communicate for personality disorders 2. A projective personality test, the house-tree-person test requires the test taker to draw a house, a tree and a person 3. The test is then used as a measure of self-perception, outlook and sometimes brain damage. How to Interpret the House-Tree-Person Test | Healthfully Test takers are asked to draw a house, a tree, and a person. The interpretation of these drawings is used to create a picture of the person's cognitive, emotional, and social functioning. Qualitative scoring, on the other hand, is a subjective analysis of a drawing meant to measure the test taker's personality. The House-Person-Tree Personality Test - Practical Psychology Guidelines for the Interpretations of House Tree Person Test Interpretation of the House • House should

hopefully be nurturing place with normal levels of detail and normal size. Too little and the client may reject family life; too big and they may be overwhelmed by it. Guidelines for the Interpretations of House Tree Person Test The House-Tree-Person Test (HTP) is a projective technique designed to determine the main personality traits of a person who performs it. It's often used during job interviews and different kinds of evaluations. Draw a house, a tree, and a person. Now get ready to discover what your drawing can tell about your personality. © This House-Tree-Person Test Will Determine Your Personality A projective personality test, the house-tree-person test requires the test taker to draw a house, a tree and a person. The test is then used as a measure of self-perception, outlook and sometimes brain damage.

Interpretations of the test are subjective, and based loosely on a set of basic principles. How to Interpret the House-Tree-Person Test The house-tree-person test can be an effective way to evaluate children, people with brain damage and people with a limited ability to communicate for personality disorders. A projective personality test, the house-tree-person test requires the test taker to draw a house, a tree and a person. How to interpret the house-tree-person test To take the test, participants are asked to draw a house (H), a tree (T), and a person (P) on a blank piece of paper. The test attempts to identify your most common and hidden inner conflicts. The analyzer can predict certain personality traits of the individual based on his or her drawings of these simple, everyday objects. House, Tree, Person (HTP): A Personality Test - Exploring ... The House-Tree-Person Test Carolyn R. Fallahi, Ph. D. Background HTP: Draw a house, tree, person, & opposite sex person. ... may provide clues to aid the differential interpretation. Branches represent the patient's felt resources for seeking satisfaction from the environment. The House-Tree-Person

Test The H-T-P (freehand drawing of House, Tree, and Person) is a technique designed to aid the clinician in obtaining information concerning the sensitivity, maturity, and integration of a subject's personality, and the interaction of that personality with its environment (both specific and general). The H-T-P is a two-phased approach to the personality. The first phase is non-verbal, creative ... [PDF] The H-T-P test. | Semantic Scholar The subject simply produces, and then discusses, three drawings—of a house, a tree, and a person. Because drawing can reduce tension, the H-T-P is often administered as the first in a battery of psychodiagnostic tests. (H-T-P) House-Tree-Person Projective Drawing Technique The house-tree-person test (HTP) is a projective personality test, a type of exam in which the test taker responds to or provides ambiguous, abstract, or unstructured stimuli (often in the form of pictures or drawings). H-T-P (House Tree Person) The house-tree-person test (HTP) is a projective personality test, a type of exam in which the test taker responds to or provides ambiguous, abstract, or unstructured stimuli (often in the form of pictures or drawings).
