Global Perspectives on Literary

Tourism and Film-Induced Tourism

Routledge

Recent decades have seen migration history and issues increasingly featured in museums. *Museums and Migration* explores the ways in which museum spaces - local, regional, national - have engaged with the history of migration, including internal migration, emigration and immigration. It presents the latest innovative research from academics and museum practitioners and offers a comparative perspective on a global scale bringing to light geo- and socio-political specificities. It includes an extensive range of international contributions from Europe, Asia, South America as well as settler societies such as Canada and Australia. *Museums and Migration* charts and enlarges the developing body of research which concentrates on the analysis of the representation of migration in relation to the changing character of museums within society, examining their civic role and their function as key public arenas within civil society. It also aims to inform debates focusing on the way museums interact with processes of political and societal changes, and examining their agency and relationship to identity construction, community involvement, policy positions and discourses, but also ethics and moralities.

Academic Pipeline Programs

Archaeopress Publishing Ltd

Archaeology and Archaeological Information in the Digital Society shows how the digitization of archaeological information, tools and workflows, and their interplay with both old and new non-digital practices throughout the archaeological information process, affect the outcomes of archaeological work, and in the end, our general understanding of the human past.

Whereas most of the literature related to archaeological information work has been based on practical and theoretical considerations within specific areas of archaeology, this innovative volume combines and integrates intra- and extra-disciplinary perspectives to archaeological work, looking at archaeology from both the inside and outside. With fields studies from museums and society, and pioneering new academic research, *Archaeology and Archaeological Information in the Digital Society* will interest archaeologists across the board.

Theory and Practice from Southern Africa

Routledge

Our Blue Planet provides a comprehensive introduction to the field of maritime and underwater archaeology. Situating the field within the broader study of history and archaeology, this book advocates that an understanding of how our ancestors interacted with rivers, lakes, and oceans is integral to comprehending the human past. *Our Blue Planet* covers the full breadth of maritime and underwater archaeology, including formerly terrestrial sites drowned by rising sea levels, coastal sites, and a wide variety of wreck sites ranging across the globe and spanning from antiquity to World War II. Beginning with a definition of the field and several chapters dedicated to the methods of finding, recording, and interpreting submerged sites, *Our Blue Planet* provides an entry point for all readers, whether or not they are familiar with maritime and underwater archaeology or archaeology in general. The book then shifts to a thematic approach with chapters exploring human interactions with the watery world, both along the coasts and by ship. These chapters discuss the relationships

between culture, technology, and environment that allowed humans through time to spread across the globe. Because ships were the primary means for humans to interact with large bodies of water, they are the focus of several chapters on the development of shipbuilding technology, the lives of sailors, and the uses of ships in exploration, expansion, and warfare. The book ends with chapters on how and why the non-renewable submerged archaeological record should be managed, so that both current and future generations can learn from the achievements and failures of past societies, as well as on how anyone can become involved in maritime and underwater archaeology. Throughout, the reader benefits from the personal reflections of a number of leading figures in the field.

BRITISH QUALIFICATIONS 2020

Cambridge Scholars Publishing
This proceedings volume contains selected papers presented at the 2014 International Conference on Information Engineering and Education Science (ICIEES 2014), held June 12-13 in Hong Kong, China. The objective of ICIEES 2014 was to provide a platform for researchers, engineers, academics as well as industry professionals from all over the world to

Visual Culture, Heritage and Identity: Using Rock Art to Reconnect Past and Present

Routledge

At the end of the 20th century, the traditional forms of tourism transformed; they expanded by the introduction of new postmodern tourist forms, bringing innovative offers to the marketplace. Two of these new fast-growing forms are literary tourism and film-induced

tourism, both of which fall under the umbrella of cultural tourism. Both niches of cultural tourism share the need to create products and experiences that meet the tourists' expectations. *Global Perspectives on Literary Tourism and Film-Induced Tourism* discusses literary tourism and film-induced tourism and documents the advances in research on the intersections of literature, film, and the act of traveling. Covering a wide range of topics from film tourism destinations to digital literary tourism, this book is ideal for travel agents, tourism agencies, tour operators, government officials, postgraduate students, researchers, academicians, cultural development councils and associations, and policymakers.

Erasure and Global Tourism in Luang Prabang Springer

The basic problem is to what extent we can know past and mainly invisible landscapes, and how we can use this still hidden knowledge for actual sustainable management of landscape's cultural and historical values. It has also been acknowledged that heritage management is increasingly about 'the management of future change rather than simply protection'. This presents us with a paradox: to preserve our historic environment, we have to collaborate with those who wish to transform it and, in order to apply our expert knowledge, we have to make it suitable for policy and society. The answer presented by the Protection and Development of the Dutch Archaeological-Historical Landscape programme (pdl/bbo) is an integrative landscape approach which applies inter- and transdisciplinarity, establishing links between archaeological-historical heritage and planning, and between research and policy.

Proceedings of the International Conference on Information Engineering and Education Science (ICIEES 2014), Tianjin, China, 12-13 June, 2014 Routledge

For a long time, resource conservationists have viewed environmental conservation as synonymous with wilderness and wildlife resources only, oblivious to the contributions made by cultural and heritage resources. However, cultural heritage resources in many parts of the developing world are gradually becoming key in social (e.g. communities' identities and museums), economic (heritage tourism and eco-tourism), educational (curriculum development), civic (intergenerational awareness), and international resources management (e.g. UNESCO). In universities, African cultural heritage resources are facing a challenge of being brought into various academic discourses and syllabi in a rather reactive and/or haphazard approach, resulting in failure to fully address and research these resources' conservation needs to ensure that their use in multiple platforms and by various stakeholders is sustainable. This book seeks to place African cultural heritage studies and conservation practices within an international and modern world discourse of conservation by presenting its varied themes and topics that are important for the development of the wider field of cultural heritage studies and management.

Collaborative Programmes at the Mutare Museum Springer

There is an ever growing importance of events in modern society and until now existing literature on events has been dominated by the economic perspective. Social and Cultural Aspects of Events

addresses the social and cultural side of events and explores the role they have in fostering change and community development. It examines the transformatory function of events in the context of development studies - as phenomena that can promote and facilitate human development, including social, societal and individual change. This book provides vital and timely exploration and encourages the study of more diverse themes within event management.

Diversifying Pathways from the Bachelor's to the Professoriate Council of Europe

The book provides a comprehensive overview of American cultural resource management and historic preservation. It is designed for introductory and advanced courses in archaeology, history, and architecture. It explores the structure, historic background, laws, and governmental and professional players in American heritage management systems.

Information Engineering and Education Science BRILL

University collections have unquestionably played a central role in the production of knowledge. They are valuable resources for studying the construction of traditions and identities, proving particularly interesting for understanding how universities have shaped societies. Furthermore, they have also been mobilised as cultural mediators to legitimise academic institutions and bring the results of their activities into the public sphere. As such, academic collections undoubtedly enable reflection on the complex relationships between heritage, knowledge, scholars, and the public. Given their importance, the development of successful strategies in terms of

public engagement has recently become a major concern for those working with these academic collections. However, the complexity of university heritage encompasses a diversity of issues that are connected with more than just the public sphere. This volume discusses some of the problems, challenges, and opportunities of academic heritage, beyond the mere concern for engaging with the public.

The Cultural Landscape & Heritage

Paradox Rowman Altamira

Choosing the right museum training course may be one of the most important decisions a person makes in their career. Whether you are already working in a museum or are just beginning training you will need the most comprehensive and up-to-date information. The International Directory of Museum Training provides a list of museum training programmes worldwide with detailed information about each course. Every entry contains information about subjects offered, numbers of students, scholarship opportunities, and contact names and addresses.

International Directory of Museum Training is co-published with ICTOP, the training committee of ICOM. It is the successor to the widely recognised Museum Studies International, last published in 1988. This completely new and fully updated volume enhances the qualities of the earlier publication and updates the presentation to make the volume easier to use. This is an essential reference book for all who are hoping to develop a career in museum work or to enhance their professional qualifications.

INCONVENIENT HERITAGE

Routledge

This sweeping new history recognizes that the Civil War was not just a military conflict but also a moment of profound transformation in Americans' relationship to the natural world. To be sure, environmental factors such as topography and weather powerfully shaped the outcomes of battles and campaigns, and the war could not have been fought without the horses, cattle, and other animals that were essential to both armies. But here Judkin Browning and Timothy Silver weave a far richer story, combining military and environmental history to forge a comprehensive new narrative of the war's significance and impact. As they reveal, the conflict created a new disease environment by fostering the spread of microbes among vulnerable soldiers, civilians, and animals; led to large-scale modifications of the landscape across several states; sparked new thinking about the human relationship to the natural world; and demanded a reckoning with disability and death on an ecological scale. And as the guns fell silent, the change continued; Browning and Silver show how the war influenced the future of weather forecasting, veterinary medicine, the birth of the conservation movement, and the establishment of the first national parks. In considering human efforts to find military and political advantage by reshaping the natural world, Browning and Silver show not only that the environment influenced the Civil War's outcome but also that the war was a watershed event in the history of the environment itself.

Contemporary Issues in Cultural Heritage Tourism Amsterdam

University Press

Research into the ways in which the past is constructed and consumed in the present is now reaching a mature stage. This maturity derives from the general acceptance that heritage as a social and cultural construct is closely connected to the making and maintaining of identity at all spatial scales. This unique book contributes to the developing discourse by focusing on 'heritage from below' in a field where the literature on the relationship between heritage and identity has, rightly, been focused on national identity. Never before have the contemporary manifestations and the theoretical structuring framework of the idea of heritage from below been discussed in the depth offered by this book. The authors first establish the concept and then engage with the actual practice and practitioners of heritage from below in the UK, Europe, Australia and North America.

Preserving a Tangible Past CABI

This book presents a fresh perspective on rock art by considering how ancient images function in the present. It focuses on how ancient heritage is recognized and reified in the modern world, and how rock art stimulates contemporary processes of cultural identity-making.

CULTURAL MANAGEMENT AND POLICY IN LATIN AMERICA

Kogan Page Publishers

Cultural competence in education promotes civic engagement among students. Providing students with educational opportunities to understand various cultural and political perspectives allows for higher cultural competence and a greater understanding of civic engagement for those students. The Handbook of

Research on Citizenship and Heritage Education is a critical scholarly book that provides relevant and current research on citizenship and heritage education aimed at promoting active participation and the transformation of society.

Readers will come to understand the role of heritage as a symbolic identity source that facilitates the understanding of the present and the past, highlighting the value of teaching. Additionally, it offers a source for the design of didactic proposals that promote active participation and the critical conservation of heritage. Featuring a range of topics such as educational policy, curriculum design, and political science, this book is ideal for educators, academicians, administrators, political scientists, policymakers, researchers, and students.

BECOMING AN IRISH TRADITIONAL MUSICIAN

CRC Press

Coupling the narratives of twenty-two Irish traditional musicians alongside intensive field research, *Becoming an Irish Traditional Musician* explores the rich and diverse ways traditional musicians hone their craft. It details the educational benefits and challenges associated with each learning practice, outlining the motivations and obstacles learners experience during musical development. By exploring learning from the point of view of the learners themselves, the author provides new insights into modern Irish traditional music culture and how people begin to embody a musical tradition. This book charts the journey of becoming an Irish traditional musician and explores how musicality is learned, developed, and embodied.

AN HISTORICAL GEOGRAPHY OF TOURISM IN VICTORIA, AUSTRALIA

IGI Global

The major international recognition of a World Heritage Site designation can bring important preservation efforts and a wealth of tourist dollars to an impoverished area—but it can also have destructive side effects. In a revealing study with lessons for tourism and preservation projects around the world, this book examines the redevelopment and packaging of Luang Prabang, Laos, as one of UNESCO's World Heritage Sites that "belong to all peoples of the world, irrespective of the territory on which they are located." It tells the story of how the world's most prestigious preservation initiative led to a management plan designed to attract tourists and global capital, which in turn developed the most "appealing" parts of the city while destroying or neglecting other areas. This book makes a valuable contribution to tourism and heritage studies and international development.

MORGAN RICHARD TSVANGIRAI'S LEGACY

International

Academic pipeline programs are critical to effectively support the steady increase of diverse students entering the academy. *Academic Pipeline Programs: Diversifying Pathways from the Bachelor's to the Professoriate* describes best practices of successful academic government and privately funded pre-collegiate, collegiate, graduate, and postdoctoral/faculty development pipeline programs. The authors explore 21 hallmark academic pipeline programs using their THRIVE index: Type, History, Research, Inclusion, Identity, Voice, and Expectation. The final chapter of the

book offers information for using and starting similar programs. The appendix offers an interactive Geographic Information System (GIS) mapped database of programs using the THRIVE index. This book will equip parents, high school counselors, college advisors, faculty, department chairs, and higher education administrators to identify academic pipeline programs that fit their needs. Readers will also learn about how academic pipeline programs are situated within an institutional or organizational change model.

Ideological, Social and Cultural Aspects of Events Routledge

Every site that is inscribed on the World Heritage List (WHL) must have a management plan or some other management system. According to the UNESCO Operational Guidelines, the purpose of a management plan is to ensure the effective protection of the nominated property for present and future generations. This requirement was in part necessitated by the need to implement real systems of monitoring on the management of World Heritage Sites. Since its implementation in 2005, discussion on the function and the contents of management plans for World Heritage Sites has grown tremendously. The discussions have mainly been focused on the theoretical frameworks of World Heritage site management plans and proposals of practical guidelines for their implementation. This volume provides a platform for heritage practitioners, especially those working at Cultural World Heritage Sites, to put in writing their experiences and impressions about the implementation of site management plans at properties that are inscribed on the WHL. Cultural World Heritage Sites in this case refer to world heritage properties such as

archaeological sites, cultural landscapes, religious sites and architectural structures. The book also seeks to examine the extent to which site management plans have been or are being implemented at Cultural World Heritage Sites.
