The goal of this project was to measure the impact on the usage of mobile banking technology by the microfinance industry. This project used SMEP, a local MFI in Kenya as a case study. Kenya was chosen because of its successful mobile payment service offered by Safaricom called M-PESA, as well as the convenience to the researcher in collecting data. This report provides detailed information on the advantages and challenges facing microfinance institutions in the implementation of mobile banking technology and ultimately strives to highlight the great potential of such technologies to increase access of financial services to the un-banked population.

 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this

point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, Vox “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you

may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Project Report from the year 2011 in the subject Information Management, University of Southern California, language: English, abstract: Over the past few thousand years of evolution, the way we pay has changed shapes and materials. It has gone from gold to coins, paper money to plastic cards and now with Google's venture into the mobile payment industry, we are at the threshold of the next big shift. Google Wallet is a mobile payment Android app that transforms a

phone into a wallet. This app utilizes the Near Field Communication (NFC) technology that allows its users to pay for purchased items and redeem offers. At this initial stage of business, there are many features and factors that Google needs to change in order to bring about the mass adoption of this service. As the Business Technology Analysts at Google, we - Kritika Maheshwari, Malvika Saraf and Rohan Handa aim at addressing the hurdles for this technology and the methods to bring it to fruition. In the process we evaluate Google's profit motivation and the bigger strategy behind this service. First, we explain the business approach which describes the importance of the adopted business model. We use Porter's Five Force analysis to determine the competitive intensity in the market followed by SWOT analysis to give recommendations that will help in the mass adoption. Finally, we focus our paper on formulating a strategy canvas in order to study the existing payment methods in comparison to our service. The paper concludes with recommendations to Google for promoting wide customer acceptance.

This report details the findings of a research evaluation conducted for UniBank (Teachers Mutual Bank Ltd) exploring the effectiveness of the Wallet\$mart mobile app in improving university students' financial capability. Students undertook to trial the Wallet\$mart app during 2020 at Western Sydney University, in partnership with UniBank and supported by App developer, Tangible. This report evaluates the effectiveness of the trial and makes recommendations for further development of the app prior to the app being rolled out to university students more broadly.

DRAWDOWN

In emergencies, distributing cash in a targeted manner can often meet people's immediate needs more quickly and appropriately than the direct distribution of commodities such as food aid. Cash gives people choices and thereby preserves their dignity. Commodity distribution may pose logistical problems, takes time, and in the case of food aid, may disrupt local markets if food is actually available within the affected country or region. But among humanitarian agencies there are fears that cash transfers will pose security risks, create inflation, and fail to be used to meet basic needs. In this guide, the first of its kind, Oxfam staff members present the

rationale behind cash-transfer programs, considering the arguments for and against cash as an alternative to commodity distribution. They also give guidance on when cash is the most appropriate intervention and how to assess this. Different types of cash intervention are compared--cash grants, vouchers, and cash-for-work--and the guide uses checklists to explain the practical steps involved in implementing them. They draw on the experience of Oxfam and other agencies of operating such programs, including responses to the devastation caused by the Indian Ocean tsunami in December 2004. The guidelines are primarily intended for NGO personnel: humanitarian program managers, food-security specialists, public-health engineers, finance staff, and logisticians. Policymakers in donor organizations and international agencies will also find them relevant. The sixteen cards contain key elements from the book to explain how to assess whether cash is the most appropriate response to any particular emergency. The cards and the paperback are also available as a set.

[Impact of Mobile Banking on Microfinance Institutions](#) John Wiley & Sons The 2015 Brookings Financial and Digital Inclusion Project (FDIP) Report and Scorecard evaluate access to and usage of affordable financial services across 21 geographically and economically diverse countries. The 2015 FDIP Report and Scorecard seek to answer a set of fundamental questions about today's global financial inclusion efforts, including: 1) Do country commitments make a difference in progress toward financial inclusion?; 2) To what extent do mobile and other digital technologies advance financial inclusion?; and 3) What legal, policy, and regulatory approaches promote financial inclusion? John D. Villasenor, Darrell M. West, and Robin J. Lewis analyzed the financial inclusion landscape in Afghanistan, Bangladesh, Brazil, Chile, Colombia, Ethiopia, India, Indonesia, Kenya, Malawi, Mexico, Nigeria, Pakistan, Peru, the Philippines, Rwanda, South Africa, Tanzania, Turkey, Uganda, and Zambia. Countries received scores and rankings based on 33 indicators spanning four dimensions: country commitment, mobile capacity, regulatory environment, and adoption of traditional and digital financial services. The authors' analysis provides several takeaways with respect to expanding financial inclusion across diverse cultural, economic, and political contexts: · Country commitment is

fundamental. · Movement toward digital financial services will accelerate financial inclusion. · Geography generally matters less than policy, legal, and regulatory changes, although some regional trends in terms of financial services provision are evident. · Central banks, ministries of finance, ministries of communications, banks, nonbank financial providers, and mobile network operators play major roles in achieving greater financial inclusion. · Full financial inclusion cannot be achieved without addressing the financial inclusion gender gap. This year's Report and Scorecard are the first of a series of publications intended to provide policymakers, the private sector, nongovernmental organizations, and the general public with information that can help improve financial inclusion in these countries and around the world. *Learning Mobile App Development* LAP Lambert Academic Publishing Seminar paper from the year 2018 in the subject Business economics - Business Management, Corporate Governance, grade: 74, University of South Wales (Business School), course: Management Project, language: English, abstract: This paper is concerned with the development of a bid proposal for a company, which was looking for a consultant to conduct a scoping study that determines the necessary requirements for development and implementation of a B2B mobile application. This reflective portfolio focuses on how the process of completing my dissertation that included the above brief main steps will assist me to apply this knowledge to my business' future operations as well identify how this learning process expanded my thinking and developed my skills as a future business leader. The portfolio consists of five major chapters: an introductory chapter presents the project, discusses the learning goals and expectations as well as the learning methodologies applied throughout the course. While the second chapter discusses the potential of identifying clear business requirements, the third chapter indicates how I was able to apply my ethical principles and values in identifying the client specific aim and objectives as well as how these objectives reflect corporate social responsibility. In the fourth chapter, you will read the importance of a Gantt chart and lastly, my learning from experience will be reflected in the fifth chapter. The management project module builds on the research methodology skills and requirements of critical debate, explored in the previous modules, to enable students to better understand project management and

consulting skills and to demonstrate how critical these skills are in a business context to ensure rigorous decision-making. The course also aims to enable an evidence-based approach to problem-solving within an organization, focusing on the ability of participants to manage complex projects in various dynamic business environments in entrepreneurial contexts, leadership and management of change. *Research Handbook on Central Banking* World Bank Publications Electronics in Advanced Research Industries A one-of-a-kind examination of the latest developments in machine control In Electronics in Advanced Research Industries: Industry 4.0 to Industry 5.0 Advances, accomplished electronics researcher and engineer Alessandro Massaro delivers a comprehensive exploration of the latest ways in which people have achieved machine control, including automated vision technologies, advanced electronic and micro-nano sensors, advanced robotics, and more. The book is composed of nine chapters, each containing examples and diagrams designed to assist the reader in applying the concepts discussed within to common issues and problems in the real-world. Combining electronics and mechatronics to show how they can each be implemented in production line systems, the book presents insightful new ways to use artificial intelligence in production line machines. The author explains how facilities can upgrade their systems to an Industry 5.0 environment. Electronics in Advanced Research Industries: Industry 4.0 to Industry 5.0 Advances also provides: A thorough introduction to the state-of-the-art in a variety of technological areas, including flexible technologies, scientific approaches, and intelligent automatic systems Comprehensive explorations of information technology infrastructures that support Industry 5.0 facilities, including production process simulation Practical discussions of human-machine interfaces, including mechatronic machine interface architectures integrating sensor systems and machine-to-machine (M2M) interfaces In-depth examinations of Internet of Things (IoT) solutions in industry, including cloud computing IoT Perfect for professionals working in electrical industry sectors in manufacturing, production line manufacturers, engineers, and members of R&D industry teams, Electronics in Advanced Research Industries: Industry 4.0 to Industry 5.0 Advances will also earn a place in libraries of technicians working

Empowering the Global Workforce with ChatGPT Expertise. KEY FEATURES ● Comprehensive Guide to GPT Evolution, AI Capabilities, and Prompt Engineering. ● Design Patterns for Enterprise Personas, Architectures, and AI Assistants. ● Management of the GPT Solution Development Cycle. DESCRIPTION "Ultimate ChatGPT Handbook for Enterprises" is your indispensable resource for navigating the transformative world of ChatGPT within the enterprise domain. It provides a deep dive into ChatGPT's evolution, capabilities, and its potential to democratize technology interactions through natural language. Throughout its chapters, you'll embark on a journey that spans from comprehending the lineage of GPT models to mastering advanced prompt engineering techniques. It will help you take a step into a futuristic enterprise landscape where ChatGPT seamlessly collaborates with human intelligence, fundamentally transforming daily work routines across various enterprise roles. The latter chapters will help you attain proficiency in managing GPT projects, discovering the agile and iterative approach to GPT solution life cycles using real-world scenarios. You will also be introduced to practical GPT implementation frameworks for both Python and Java. This book offers practical insights and applicable skills, fostering informed dialogue and active participation in the ongoing enterprise AI revolution. If you want to stay at the forefront of the

rapidly evolving AI landscape and unlock enterprise excellence through ChatGPT, this book is your go-to companion. WHAT WILL YOU LEARN ● Discover strategies to maximize ChatGPT's capabilities, fostering innovation and process optimization across global industry sectors. ● Develop proficiency in crafting effective prompts using Prompt Engineering for seamless AI interactions, enhancing ChatGPT's utility in enterprise contexts. ● Acquire the expertise to design intelligent assistants that elevate enterprise operations, promoting efficiency and innovation. ● Gain practical skills to implement ChatGPT solutions using Python and Java, enabling seamless integration with your enterprise systems. ● Learn effective project management from initiation to validation and change management, ensuring successful GPT solution implementation in enterprises. ● Explore how ChatGPT can reshape various roles, boosting productivity and fostering harmonious AI-human collaboration in the workplace. WHO IS THIS BOOK FOR? This book is designed for business professionals, IT specialists, and AI enthusiasts who are eager to delve into the transformative world of ChatGPT and its applications in the enterprise landscape. A foundational understanding of AI concepts and familiarity with enterprise dynamics will be beneficial, but not mandatory, as the book is structured to guide readers from basic concepts to advanced implementations, catering to both novices and experts alike.
