 Seemingly the most

fantastical of television series, Buffy the Vampire Slayer proves on close examination to be firmly rooted in real-world concerns. In this collection of critical essays, 15 authors from several disciplines, including literature, the visual arts, theatre, philosophy, and political science, study ways in which Buffy illuminates viewers' real-life experiences. Topics include the series' complicated portrayals of the relationship between soul, morality, and identity; whether Buffy

can truly be described as a feminist icon; stereotypes of Native Americans in the episode "Pangs"; the role of signs in the interaction between Buffy's aesthetics and audience; and the problem of power and underhanded politics in the Buffy universe.

This year's budget made some significant changes to annual road tax (vehicle excise duty or VED). The main changes included: introduction of six new VED bands from 2009-10, bringing the

total number of bans to 13; applying this new regime of 13 bands to existing cars on the road first registered on or after 1 March 2001; and introduction of a new rate of VED for new cars in the first year in which they are bought. The Environmental Audit Committee's aims in this report were to examine the projected environmental impacts of these changes, to review how fair these changes are, and to make recommendations to the Treasury as to how it

should proceed. The Committee felt that there was nothing intrinsically wrong in the rebanding of cars registered since 2001 but that there was a lack of data about the financial impacts of these change on lower-income groups. The new-first year rates were welcomed. However concerns remain that the differentials between VED bands are still not large enough to drive market transformation. The Treasury should have taken much greater care to explain the changes in VED in the Budget. If the

point of green taxes is to change behaviour, they need to be properly publicised. In general, the Treasury needs to develop a proper communications strategy

 La contabilizzazione dei costi del personale rappresenta, anche per gli addetti ai lavori, un'operazione non sempre facile e spesso fonte di dubbi: la presente guida ha l'obiettivo di illustrare, in maniera semplice e mediante

l'ausilio di esempi pratici, come contabilizzare il costo del personale, evitando problematiche legate al non corretto appostamento delle voci nel bilancio di esercizio - soprattutto in presenza di eventi particolari, come la malattia, gli infortuni e così via - e alle conseguenti ripercussioni, in termini di imposizione fiscale. In virtù di questa considerazione, al fine di appostare correttamente tutte quelle voci di bilancio utili al calcolo delle imposte, è necessario valutare gli

aspetti relativi agli oneri contributivi ed assicurativi, al fine dell'eventuale deduzione dalla base imponibile IRAP. La disamina, alle cui fondamenta soggiacciono i principi contabili, si caratterizza per il gran numero di esempi - che, di fatto, rappresentano una sintesi delle casistiche più comuni che possono incontrarsi in azienda - volti a consentire un rapido approccio al lettore, soprattutto in quelle situazioni di particolare urgenza, come nel caso di

dover calcolare il costo per esigenze di budget. Viene, infine, proposto un caso concreto di contabilizzazione del costo, partendo dal cosiddetto "cedolone", vale a dire il riassunto avvenuto nel periodo di lavoro considerato. Andrea Sergiacomo

Deeply theological review of our habits of relationship with money Eve Poole offers us a book at once deeply theological and imminently practical.

She invites us into a conversation about theology—the ways in which we attempt to understand God—and their various implications. She then shifts the conversation to consumerism, raising questions along the way as to how God might view the practice—and how we might better understand our place as Christians within that system. Drawing on the Church's rich traditions of Social Liturgy, *Buying God* calls on the Christian community to renew its

confidence and strength in proclaiming this good news. Uniting theoretical work on theology, capitalism, and consumerism with a scheme of detailed practical action, the book explores how we can wean ourselves off the material and on to the eternal, through prayer, example, and vibrant social action.

"Knowledgeable and accessible, as adept at exploring economics as at delineating theological method, *Buying God* offers a steady hand

through the demands of global capitalism and the seductions of human desire. Eve Poole offers an example of how theology is always politics, and always devotional—and, at its best, both at the same time." Samuel Wells, Vicar of St Martin-in-the-Fields.

"This book is a one of a kind, definitive reference source for technical

students and researchers, government policymakers, and business leaders. It provides an overview of past and present initiatives to improve and commercialize fuel cell technologies. It provides context and analysis to help potential investors assess current fuel cell commercialization activities and future prospects. Most importantly, it gives top executive policymakers and company presidents with detailed policy recommendations as to

what should be done to successfully commercialize fuel cell technologies."--pub. desc. Estudio comparativo y posibles implicaciones para Europa y Asia Pacífico Routledge Advanced Structural Chemistry Discover the relationships between inorganic chemical synthesis, structure, and property with these comprehensive and insightful volumes Advanced Structural Chemistry: Tailoring Properties of Inorganic Materials and their

Applications (3 Volume Set) offers readers the opportunity to discover the relationship between the structure and function of matter, develop efficient and precise synthesis methodology, and to understand the theoretical tools for new functional substances. Advanced Structural Chemistry clarifies the relationships between synthesis and structure, as well as structure and property, both of which are central to the creation of new materials with unique functions. In

addition to subjects like the syntheses of metal-oxide clusters, metal-organic cages, and metal-organic frameworks with tailored optical, electric, ferroelectric, magnetic, adsorption, separation, and catalytic properties, the accomplished editor Rong Cao provides readers with information on a wide variety of topics, such as: Coordination-assembled metal-organic macrocycles and cages, including metallacycles and metallacages The structural chemistry of

metal-oxo clusters, including the oxo clusters of transition metal, main group metal, and lanthanides Synthetic approaches, structural diversities, and biological aspects of molybdenum-based heterometallic sulfide clusters and coordination polymers Group 11-15 metal chalcogenides, including discrete chalcogenide clusters synthesized in ionic liquids The structures of metal-organic frameworks, including one-, two-, and three-dimensional MOFs

Perfect for inorganic chemists, structural chemists, solid state chemists, material scientists, and solid state physicists, Advanced Structural Chemistry also belongs on the bookshelves of catalytic and industrial chemists who seek to improve their understanding of the structure and functions of inorganic materials. An examination of the views on capitalism of bishops, academics and business people in the

Church of England. Highlighting the richness and distinctiveness of these arguments, it also points to flaws and gaps. Offering a new framework for public theology, Poole urges the Church to take its proper place in re-shaping the global economy.

Electric drive vehicles (EDVs) are seen on American roads in increasing numbers. Related to this market trend and critical for it to increase are

improvements in battery technology. Battery Technology for Electric Vehicles examines in detail at the research support from the U.S. Department of Energy (DOE) for the development of nickel-metal-hydride (NiMH) and lithium-ion (Li-ion) batteries used in EDVs. With public support comes accountability of the social outcomes associated with public investments. The book overviews DOE investments in advanced battery technology,

documents the adoption of these batteries in EDVs on the road, and calculates the economic benefits associated with these improved technologies. It provides a detailed global evaluation of the net social benefits associated with DOE investments, the results of the benefit-to-cost ratio of over 3.6-to-1, and the life-cycle approach that allows adopted EDVs to remain on the road over their expected future life, thus generating economic and environmental health benefits into the future.

O'Malley explores how several British modernists applied the experimental methods of literary modernism to the writing of narrative history and historical novels. The historical novel is usually assumed to be only a concern of either nineteenth-century realism or postmodernism, but the historical texts of Joseph Conrad, Ford Madox Ford, and Rebecca West

evidence a modernist obsession with historical narrative.

Eco-driving has the potential to save fuel and reduce emissions without having to make any changes to vehicles or road infrastructure. This book provides an in-depth understanding of the contemporary issues in the human factors aspects of eco-driving strategies and interfaces and the effects on driver behaviour. A review of the

literature concerning design, behaviour, and energy use led to an exploration of Ecological Interface Design, and the Skills, Rules, and Knowledge (SRK) taxonomy of human behaviour, particularly with regard to haptic information presented through the accelerator pedal. This book explains that eco-driving can be performed by anyone in control of a vehicle. The Facts, the Figures, the Knowledge Vintage Canada
“..this most thorough

commentary must be regarded as the Bible on the Charter” Peter Oliver, Common Market Law Review This second edition of the first commentary of the EU Charter of Fundamental Rights in English, written by experts from several EU Member States, provides an authoritative but succinct statement of how the Charter impacts upon EU, domestic and international law. Following the conventional article-by-article approach, each commentator offers an

expert view of how each article is either already being interpreted in the courts, or is likely to be interpreted. Each commentary is referenced to the case law and is augmented with extensive references to further reading. This is a much-welcomed new edition of the authoritative guide to the Charter.

The controversial British writer Ford Madox Ford (1873-1939) is increasingly recognized as a major presence in early twentieth-century literature. This series of International Ford Madox Ford Studies was founded to reflect the recent

resurgence of interest in him. Each volume is based upon a particular theme or issue; and relates aspects of Ford's work, life, and contacts, to broader concerns of his time. Ford is best-known for his fiction, especially *The Good Soldier*, long considered a modernist masterpiece; and *Parade's End*, which Anthony Burgess described as 'the finest novel about the First

World War', Samuel Hynes has called 'the greatest war novel ever written by an Englishman', and which has been adapted by Tom Stoppard for the acclaimed BBC/HBO television series. This volume focuses on Ford's work from the Edwardian decade and a half before the First World War. It contains Michael Schmidt's Ford Madox Ford Lecture, and

fourteen other essays by British, American, French and German experts, both leading authorities and younger scholars. Chapters on Ford's fiction, poetry, criticism of literature and painting, writing about England, and dealings on the Edwardian literary scene as editor and with publishers, bring out his versatility and ingenuity throughout his first major creative phase.
