PROCESS DYNAMICS AND CONTROL | MATHEMATICAL MODEL | CHEMICAL ENGINEERING | BY VANDANA MA'AM

Modelling, Dynamics and Control of Electrified Vehicles provides a systematic overview of EV-related key components, including batteries, electric motors, ultracapacitors and system-level approaches, such as energy management systems, multi-source energy optimization, transmission design and control, braking system control and vehicle dynamics control.

Process Dynamics, Modeling, and Control by Ray Ogunnaike

This course introduces dynamic processes and the engineering tasks of process operations and control. Subject covers modeling the static and dynamic behavior of processes; control strategies; design of feedback, feedforward, and other control structures; and applications to process equipment. Dedication In preparing this material, the author has recalled with pleasure his own introduction ...

(PDF) Process Modelling, Stimulation and Control for ...

There are three important process variables in a process control system. (1) Controlled variables (2) Manipulated variables (3) Disturbance variables. Feedback control system measures the controlled variable and compares the measured value with the desired value and then adjusts the manipulated variables for the control of the system accordingly.
