In just few years, case-based reasoning has evolved from a research topic studied at a small number of specialized academic labs into an industrial-strength technology applied in various fields. The INRECA methodology presented in detail in this monograph provides a data analysis framework for developing case-based reasoning solutions for successful applications in real-world industrial contexts. The book is divided into parts on: - smarter business with case-based decision support; - developing case-based applications using the INRECA methodology; and - using the methodology in various application domains. The book provides a self-contained introduction to case-based reasoning applications that address both R&D professionals and general IT managers interested in this powerful new technology. In this second edition, improvements and updates have been incorporated throughout the text. Particularly useful is the systematic coverage of experience factory applications at various steps; and, of course, the references have been extended substantially.

This is Barthes' seminal text reimagined in a contemporary context by contemporary academics. Through a revisiting of Mythologies, a key text in cultural and media studies, this volume explores the value these disciplines can add to an understanding of contemporary society and culture. Leading academics in media, English, education, and cultural studies here are tasked with identifying the "new mythologies" some fifty or so years on from Barthes' original interventions. The contributions in this volume, then, are readings of contemporary culture, each engaging with a cultural event, practice, or text as mythological. These readings are then contextualized by an introduction which reflects on the 'how' of these engaging responses and an "essay at the back of the book" which replaces Myth Today with a reflection on the contemporary provenance of both Barthes and his most famous book. Thus the book is at least two things at once whichever way you look: a 'new' Mythologies and a book about Barthes' legacy, an exploration of the place of theory in critical writing, and a book about contemporary culture.

In this adventure in the #1 New York Times bestselling series, husband-and-wife treasure hunters Sam and Remi Fargo must out-pace a self-made millionaire in pursuit of an incredible fortune... Thousands of years ago, two superpowers of the ancient world went to war, and a treasure of immeasurable value was lost to the shadows of history. In 1800, while crossing the Pennine Alps with his Grand Reserve Army, Napoleon Bonaparte stumbled across a startling discovery. Unable to transport it, he created an enigmatic map on the labels of twelve bottles of rare wine. When Napoleon died, the bottles disappeared—and the treasure was lost again. Until now. Treasure-hunting husband-and-wife team Sam and Remi Fargo are exploring the Great Pocomoke Swamp in Maryland when they are shocked to discover a World War II German U-boat. Inside, they find a bottle taken from Napoleon's famous "Lost Cellar," and fascinated, they set out to find the rest of the collection. But another connoisseur of sorts is hunting his own prize, and the Lost Cellar is his key to finding it. That man is Hadeon Bondaruk, a half-Russian, half-Persian millionaire, and the treasure will be his, no matter what.

Bowler's Name is a tale of a life in cricket's margins. Tom Hicks is no household name, but he often rubbed shoulders with cricketing royalty, going from the village green to walking out as captain at Lord's. As an ambitious youngster, Hicks dreamed of reaching the top. But trying to make it big and balance the demands of university, family, a full-time job and a penchant for post-match fun was no easy feat. Settling for an unglamorous life as a minor county player, cricket took him to all corners of the country, and then across the globe, getting an insight into the nether regions of a cricketing world that was rapidly vanishing. Through the eyes of a cricket nut, Bowler's Name takes us on a journey of success, failure, hilarity and often sheer madness. If you've ever wondered what it's like to face 90mph bowling, to have lunch with Mike Gatting or to infiltrate an England post-match party, Hicks is your man. Bowler's Name is for fans of cricket idiosyncrasies, lovers of the underdog and anyone who has tried and failed.

Our relationship with ads: it's complicated A must-read for anyone intrigued by the role and influence of the ad world, *Seducing the Subconscious* explores the complexities of our relationship to advertising. Robert Heath uses approaches from experimental psychology and cognitive neuroscience to outline his theory of the subconscious influence of advertising in its audience's lives. In addition to looking at ads' influence on consumers, Heath also addresses how advertising is evolving, noting especially the ethical implications of its development. Supported by current research, *Seducing the Subconscious* shows us just how strange and complicated our relationship is with the ads we see every day.

This book provides readers with a timely snapshot of ergonomics research and methods applied to the design, development and evaluation, of products, systems and services. It gathers theoretical contributions, case studies and reports on technical interventions focusing on a better understanding of human machine interaction, and user experience for improving product design. The book covers a wide range of established and emerging topics in user-centered design, relating to design for

special populations, design education, workplace assessment and design, anthropometry, ergonomics of buildings and urban design, sustainable design, as well as visual ergonomics and interdisciplinary research and practices, among others. Based on the AHFE 2021 International Conference on Ergonomics in Design, held virtually on 25–29 July, 2021, from USA, the book offers a thought-provoking guide for both researchers and practitioners in human-centered design and related fields.

How our stone-age brains made modern society, and why it matters for relationships between men and women As countless love songs, movies, and self-help books attest, men and women have long sought different things. The result? Seemingly inevitable conflict. Yet we belong to the most cooperative species on the planet. Isn't there a way we can use this capacity to achieve greater harmony and equality between the sexes? In *The War of the Sexes*, Paul Seabright argues that there is—but first we must understand how the tension between conflict and cooperation developed in our remote evolutionary past, how it shaped the modern world, and how it still holds us back, both at home and at work. Drawing on biology, sociology, anthropology,

and economics, Seabright shows that conflict between the sexes is, paradoxically, the product of cooperation. The evolutionary niche—the long dependent childhood—carved out by our ancestors requires the highest level of cooperative talent. But it also gives couples more to fight about. Men and women became experts at influencing one another to achieve their cooperative ends, but also became trapped in strategies of manipulation and deception in pursuit of sex and partnership. In early societies, economic conditions moved the balance of power in favor of men, as they cornered scarce resources for use in the sexual bargain. Today, conditions have changed beyond recognition, yet inequalities between men and women persist, as the brains, talents, and preferences we inherited from our ancestors struggle to deal with the unpredictable forces unleashed by the modern information economy. Men and women today have an unprecedented opportunity to achieve equal power and respect. But we need to understand the mixed inheritance of conflict and cooperation left to us by our primate ancestors if we are finally to escape their legacy.

In this new view of the Citroën story, automotive/aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroën, but the aeronautical and cultural origins that lay behind Citroën's form and function. The book digs deep into the ethos of Automobiles Citroën to create a narrative on one of the greatest car manufacturers in history. Using interviews,

translations, archive documents and specially-commissioned photographs, the Citroën journey is cast in a fresh perspective. It explains in detail the influences upon Citroën design: Voisin, Lefebvre, Bertoni, Boulanger, Mages, Opron and recent Citroën designers such as Coco, Blakeslee and Soubirou. As well as all the men of the great period of 1920s-1970s expansion, it also cites less well-known names of Citroën's French engineering, design, and influence such as Cayla, Gerin, Giret, Harmand, Dargent and others, to give a full picture of Citroën heritage. The book provides in-depth analysis of all major Citroën models with an engineering and design focus and profiles key individuals and cars up to the present day and Citroën's 'DS'-branded resurgence. It features many newly commissioned photographs, rare archive drawings and interviews with Citroën owners. Researched amongst leading Citroën experts and restorers, Lance Cole provides a fresh perspective on the Citroën car manufacturer, its design language and the legacy of its extraordinary engineering which will be of great interest to all Citroën and motoring enthusiasts. Superbly illustrated with 329 colour photographs, many newly commissioned along with rare archive drawings.
