ART AND THOUGHT IN THE COLD WAR

"The epic story of the rise and fall of the empire of cotton, its centrality in the world economy, and its making and remaking of global capitalism. Sven Beckert's rich, fascinating book tells the story of how, in a remarkably brief period, European entrepreneurs and powerful statesmen recast the world's most significant manufacturing industry combining imperial expansion and slave labor with new machines and wage workers to change the world. Here is the story of how, beginning well before the advent of machine production in 1780, these men created a potent innovation (Beckert calls it war capitalism, capitalism based on unrestrained actions of private individuals; the domination of masters over slaves, of colonial capitalists over indigenous inhabitants), and crucially affected the disparate realms of cotton that had existed for millennia. We see how this thing called war capitalism shaped the rise of cotton, and then was used as a lever to transform the world. The empire of cotton was, from the beginning, a fulcrum of constant global struggle between slaves and planters, merchants and statesmen, farmers and merchants, workers and factory owners. In this as in so many other ways, Beckert makes clear how these forces ushered in the modern world. The result is a book as unsettling and disturbing as it is enlightening: a book that brilliantly weaves together the story of cotton with how the present global world came to exist"--Résumé de l'éditeur.

A New York Times Book Review Editors' Choice "Extremely wide-ranging and well researched . . . In a tradition of protest literature rooted more in William Blake than in Marx." —Adam Gopnik, *The New Yorker* The epic story of how coffee connected and divided the modern world Coffee is an indispensable part of daily life for billions of people around the world. But few coffee drinkers know this story. It centers on the volcanic highlands of El Salvador, where James Hill, born in the slums of Manchester, England, founded one of the world's great coffee dynasties at the turn of the twentieth century. Adapting the innovations of the Industrial Revolution to plantation agriculture, Hill helped turn El Salvador into perhaps the most intensive monoculture in modern history—a place of extraordinary productivity, inequality, and violence. In the process, both El Salvador and the United States earned the nickname "Coffeeland," but for starkly different reasons, and with consequences that reach into the present. Provoking a reconsideration of what it means to be connected to faraway people and places, *Coffeeland* tells the hidden and surprising story of one of the most valuable commodities in the history of global capitalism.

Concept and Contours Penguin

As the meeting point between Europe, colonial America, and Africa, the history of the Atlantic world is a constantly shifting arena, but one which has been a focus of huge and vibrant debate for many years. In over thirty chapters, all written by experts in the field, *The Atlantic World* takes up these debates and gathers together key, original scholarship to provide an authoritative survey of this increasingly popular area of world history. The book takes a thematic approach to topics including exploration, migration and cultural encounters. In the first chapters, scholars examine the interactions between groups which converged in the Atlantic world, such as slaves, European migrants and Native Americans. The volume then considers questions such as finance, money and

commerce in the Atlantic world, as well as warfare, government and religion. The collection closes with chapters examining how ideas circulated across and around the Atlantic and beyond. It presents the Atlantic as a shared space in which commodities and ideas were exchanged and traded, and examines the impact that these exchanges had on both people and places. Including an introductory essay from the editors which defines the field, and lavishly illustrated with paintings, drawings and maps this accessible volume is invaluable reading for all students and scholars of this broad sweep of world history.

There has been a terrible mistake. Instead of having thirty classrooms side by side, Wayside School is thirty storeys high! (The builder said he was sorry.) Perhaps that's why all sorts of strange and unusual things keep happening – especially in Mrs Jewls's classroom on the very top floor. There's the terrifying Mrs Gorf, who gets an unusually fruity comeuppance; Terrible Todd, who always gets sent home early; and Mauricia, who has a strange ice-cream addiction. Meanwhile, John can only read upside down, and Leslie is determined to sell her own toes. From top to bottom, Wayside is packed with quirky and hilarious characters who are all brought to life in this new edition with delightful illustrations by Aleksei Bitskoff throughout. This is an unmissable, irrepressible story of mixed-up mayhem from Louis Sachar, the bestselling author of *Holes*.

This book argues that Angola and Brazil were connected, not separated, by the Atlantic Ocean. Roquinaldo Ferreira focuses on the cultural, religious and social impacts of the slave trade on Angola. Reconstructing biographies of Africans and merchants, he demonstrates how cross-cultural trade, identity formation, religious ties and resistance to slaving were central to the formation of the Atlantic world. By adding to our knowledge of the slaving process, the book powerfully illustrates how Atlantic slaving transformed key African institutions, such as local regimes of forced labor that predated and coexisted with Atlantic slaving and made them fundamental features of the Atlantic world's social fabric.

A comprehensive collection of primary documents for students of early American and Atlantic history, *Colonial North America and the Atlantic World* gives voice to the men and women, Amerindian, African, and European, who together forged a new world. These compelling narratives address the major themes of early modern colonialism from the perspective of the people who lived at the time: Spanish priests and English farmers, Indian diplomats and Dutch governors, French explorers and African abolitionists. Evoking the remarkable complexity created by the bridging of the Atlantic Ocean, *Colonial North America and the Atlantic World* suggests that the challenges of globalization, and the growing reality of American diversity, are among the most important legacies of the colonial world.

The slave revolution that two hundred years ago created the state of Haiti alarmed and excited public opinion on both sides of the Atlantic. Its repercussions ranged from the world commodity markets to the imagination of poets, from the council chambers of the great powers to slave quarters in Virginia and Brazil and most points in between. Sharing attention with such tumultuous

events as the French Revolution and the Napoleonic War, Haiti's fifteen-year struggle for racial equality, slave emancipation, and colonial independence challenged notions about racial hierarchy that were gaining legitimacy in an Atlantic world dominated by Europeans and the slave trade. The *Impact of the Haitian Revolution in the Atlantic World* explores the multifarious influence—from economic to ideological to psychological—that a revolt on a small Caribbean island had on the continents surrounding it. Fifteen international scholars, including eminent historians David Brion Davis, Seymour Drescher, and Robin Blackburn, explicate such diverse ramifications as the spawning of slave resistance and the stimulation of slavery's expansion, the opening of economic frontiers, and the formation of black and white diasporas. They show how the Haitian Revolution embittered contemporary debates about race and abolition and inspired poetry, plays, and novels. Seeking to disentangle its effects from those of the French Revolution, they demonstrate that its impact was ambiguous, complex, and contradictory.

Bridging the Early Modern Atlantic World brings together ten original essays by an international group of scholars exploring the complex outcomes of the intermingling of people, circulation of goods, exchange of information, and exposure to new ideas that are the hallmark of the early modern Atlantic. Spanning the period from the earliest French crossings to Newfoundland at the beginning of the sixteenth century to the end of the wars of independence in Spanish South America, c. 1830, and encompassing a range of disciplinary approaches, the contributors direct particular attention to regions, communities, and groups whose activities in, and responses to, an ever-more closely bound Atlantic world remain relatively under-represented in the literature. Some of the chapters focus on the experience of Europeans, including French consumers of Newfoundland cod, English merchants forming families in Spanish Seville, and Jewish refugees from Dutch Brazil making the Caribbean island of Nevis their home. Others focus on the ways in which the populations with whom Europeans came into contact, enslaved, or among whom they settled - the Tupi peoples of Brazil, the Kriston women of the west African port of Cacheu, among others - adapted to and were changed by their interactions with previously unknown peoples, goods, institutions, and ideas. Together with the substantial Introduction by the editor which reviews the significance of the field as a whole, these essays capture the complexity and variety of experience of the countless men and women who came into contact during the period, whilst highlighting and illustrating the porous and fluid nature, in practice, of the early modern Atlantic world.

The Routledge History of Slavery is a landmark publication that provides an overview of the main themes surrounding the history of slavery from ancient Greece to the present day. Taking stock of the field of Slave Studies, the book explores the major advances that have taken place in the past few decades of study in this crucial field. Offering an unusual, transnational history of slavery, the chapters have all been specially commissioned for the collection. The volume begins by delineating the global nature of the institution of slavery, examining slavery in different parts of the world and over time. Topics covered here include slavery in Africa and the Indian Ocean World, as well as the

Transatlantic Slave Trade. In Part Two, the chapters explore different themes that define slavery such as slave culture, the slave economy, slave resistance and the planter class, as well as areas of life affected by slavery, such as family and work. The final part goes on to study changes and continuities over time, looking at areas such as abolition, the aftermath of emancipation and commemoration. The volume concludes with a chapter on modern slavery. Including essays on all the key topics and issues, this important collection from a leading international group of scholars presents a comprehensive survey of the current state of the field. It will be essential reading for all those interested in the history of slavery.

WE DON'T KNOW OURSELVES: A PERSONAL HISTORY OF MODERN IRELAND

Cambridge University Press

A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

Nitrogen in the Marine Environment provides information pertinent to the many aspects of the nitrogen cycle. This book presents the advances in ocean productivity research, with emphasis on the role of microbes in nitrogen transformations with excursions to higher trophic levels. Organized into 24 chapters, this book begins with an overview of the abundance and distribution of the various forms of nitrogen in a number of estuaries. This text then provides a comparison of the nitrogen cycling of various ecosystems within the marine environment. Other chapters consider chemical distributions and methodology as an aid to those entering the field. This book discusses as well the enzymology of the initial steps of inorganic nitrogen assimilation. The final chapter deals with the philosophy and application of modeling as an investigative method in basic research on nitrogen dynamics in coastal and open-ocean marine environments. This book is a valuable resource for plant biochemists, microbiologists, aquatic ecologists, and bacteriologists.

For centuries, historians have narrated the arrival of Europeans using terminology (discovery, invasion, conquest, and colonization) that emphasizes their agency and disempowers that of Native Americans. This book explores firsting, a discourse that privileges European and settler-colonial presence, movements, knowledges, and experiences as a technology of colonization in the early modern Atlantic world, 1492-1900. It exposes how textual culture has ensured that Euro-settlers dominate Native Americans, while detailing misrepresentations of Indigenous peoples as unmodern and proposing how the western world can be un-firsted in scholarship on this time and place.

The Earth and Its Peoples, Brief Edition, Volume II Farrar, Straus and Giroux

The British role in the shaping of the African diaspora was central: the British carried more Africans across the Atlantic than any other nation and their colonial settlements in the Caribbean and North America absorbed vast numbers of Africans. The crops produced by those slaves helped to lay the foundations for Western material well-being, and their associated cultural habits helped to shape key areas of Western sociability that survive to this day. Britain was also central in the drive to end slavery, in her own possessions and elsewhere in the world. Making the Black Atlantic presents a coherent story of Britain's role in the African diaspora, its origins, progress, and transformation.

Readable and concise, this Brief Edition of THE EARTH AND ITS PEOPLES: A GLOBAL HISTORY VOLUME II provides the essential narrative of world history in an abbreviated format. This global text employs the fundamental themes of environment and technology and diversity and dominance to explore patterns of human interaction with their surroundings and with each other. The authors approach shifts the focus away from political centers and power, reveals how humanity continues to shape and be shaped by our environments, and how dominant structures and traditions are balanced and challenged by alternate beliefs. Special emphasis is given to technological development and how it underlies all human activity. Available in the following split options: THE

Fully original, beautifully written . . . One hopes Menand has a sequel in mind. The Cold War was not just a contest of power. It was also about ideas, in the broadest sense—economic and political, artistic and personal. In *The Free World*, the acclaimed Pulitzer Prize-winning scholar and critic Louis Menand tells the story of American culture in the pivotal years from the end of World War II to Vietnam and shows how changing economic, technological, and social forces put their mark on creations of the mind. How did elitism and an anti-totalitarian skepticism of passion and ideology give way to a new sensibility defined by freewheeling experimentation and loving the Beatles? How was the ideal of "freedom" applied to causes that ranged from anti-communism and civil rights to radical acts of self-creation via art and even crime? With the wit and insight familiar to readers of *The Metaphysical Club* and his *New Yorker* essays, Menand takes us inside Hannah Arendt's Manhattan, the Paris of Jean-Paul Sartre and Simone de Beauvoir, Merce Cunningham and John Cage's residencies at North Carolina's Black Mountain College, and the Memphis studio where Sam Phillips and Elvis Presley created a new music for the American teenager. He examines the post war vogue for French existentialism, structuralism and post-structuralism, the rise of abstract expressionism and pop art, Allen Ginsberg's friendship with Lionel Trilling, James Baldwin's transformation into a Civil Right spokesman, Susan Sontag's challenges to the New York Intellectuals, the defeat of obscenity laws, and the rise of the New Hollywood. Stressing the rich flow of ideas across the Atlantic, he also shows how Europeans played a vital role in promoting and influencing American art and entertainment. By the end of the Vietnam era, the American government had lost the moral prestige it enjoyed at the end of the Second World War, but America's once-despised culture had become respected and adored. With unprecedented verve and range, this book explains how that happened.

A COMPANION TO AFRICAN AMERICAN HISTORY

The Atlantic World

This book explores Africa's involvement in the Atlantic world from the fifteenth century to the eighteenth century. It focuses especially on the causes and consequences of the slave trade, in Africa, in Europe, and in the New World. African institutions, political events, and economic structures shaped Africa's voluntary involvement in the Atlantic arena before 1680. Africa's

economic and military strength gave African elites the capacity to determine how trade with Europe developed. Thornton examines the dynamics of colonization which made slaves so necessary to European colonizers, and he explains why African slaves were placed in roles of central significance.

Estate structure and demography affected the capacity of slaves to form a self-sustaining society and behave as cultural actors, transferring and transforming African culture in the New World.
